North East London Health & Care Partnership

DRAFT

Minutes of the North East London Integrated Care Partnership

Wednesday 4 October 2023; 11:00-13:00; Held via MS Teams

Members:		
Marie Gabriel	(MG)	Chair, NHS North East London
Cllr Neil Wilson	(NW)	Cabinet Member, London Borough of Newham
Cllr Maureen Worby	(MW)	Cabinet Member, London Borough of Barking & Dagenham
Cllr Christopher Kennedy	(CK)	Cabinet Member, London Borough of Hackney
Cllr Mark Santos	(MS)	Cabinet Member, London Borough of Redbridge
Cllr Gillian Ford	(GF)	Cabinet Member, London Borough of Havering
Cllr Mary Durcan	(MD)	Cabinet Member, London Borough of City of London
Cllr Naheed Asghar	(NA)	Cabinet Member, London Borough of Waltham Forest
Rt Hon Jacqui Smith	(JS)	Chair in Common, Barts Health and Barking Havering and Redbridge University Hospitals Trust
Rachel Cleave	(RC)	Healthwatch City of London
Oscar van Zijl	(OvZ)	Healthwatch Newham
Dianne Barham	(DB)	Waltham Forest Healthwatch
Ian Buckmaster	(IB)	Healthwatch Havering
Tony Wong	(TW)	Hackney CVS
Sam Crosby	(SC)	Tower Hamlets CVS
Zina Etheridge	(ZE)	Chief Executive Officer, NHS North East London
Johanna Moss	(JM)	Chief Strategy & Transformation Officer, NHS North East London
Attendees:		
Andrew Hudson	(AH)	Non-Executive Director, Homerton Healthcare *for John Gieve*
Aamir Ahmed	(AA)	Non-Executive Director and Vice Chair, East London Foundation Trust *for Eileen Taylor*
Charlotte Pomery	(CP)	Chief Participation & Place Officer, NHS North East London
Alison Robert	(AW)	Tower Hamlets CVS
Anne-Marie Keliris	(AMK)	Head of Governance, NHS North East London
Laura Anstey	(LA)	Chief of Staff, NHS North East London
Keeley Chaplin	(KC)	Minutes - Governance Manager, NHS North East London
Zoe Anderson	(ZA)	Associate Director, Communications and Engagement, NHS North East London
Susan Nwanze	(SN)	Interim Director of Culture, Education & Workforce Transformation, NHS North East London
Francesca Okosi	(FO)	Chief People and Culture Officer, NHS North East London
Anna Carratt	(AC)	Deputy Director of Strategy, Planning and Performance, NHS North East London
Apologies:		
Sir John Gieve	(JG)	Chair, Homerton Healthcare
Eileen Taylor	(ET)	Joint Chair, East London Foundation Trust and North East London Foundation Trust
Catherine Perez-Phillips	(CPP)	Healthwatch Hackney
Cathy Turland	(CT)	Healthwatch Redbridge
Matthew Adrien	(MA)	Healthwatch Tower Hamlets
Manisha Modhvadia	(MM)	Healthwatch Barking & Dagenham
Catherine Perez Phillips	(CPP)	Healthwatch Hackney

DRAFT

Item No.	Item title	Action
1.0	**Welcome, introductions and apologies**	
	The Chair welcomed everyone to the meeting of the Integrated Care Partnership (ICP) held virtually on MS Teams. Apologies were noted as above.	
1.1.	**Declaration of conflicts of interest**	
	The Chair reminded members of their obligation to declare any interest they may have on any issues arising at the meeting which might conflict with the business of the ICB. Cllr Ford added a new interest as a member of the NELFT governance board. Declarations made by members of the ICP are listed on the Register of Interests. The Register is available from either the Governance Team or on the ICB's website (northeastlondonicb.nhs.uk)	
1.2.	**Minutes of last meeting**	
	The minutes of the meeting held on 6 July 2023 were noted as a correct record.	
1.3.	**Matters arising**	
	Actions from the last meeting were noted as follows: ACT005 Action completed and closed. ACT006 Engagement with migrant population has been explored for opportunities with focus groups and will review responses to consider further engagement. This action is now closed. ACT007 There is ongoing evaluation of the big conversation. Details of how it will be evaluated will be advised at the next meeting under matters arising. ACT008 Action completed and closed.	CP
2.0	**Questions from the public**	
	No questions were submitted in advance of the meeting.	
3.0	**Workforce Strategy**	
	SW outlined progress on developing a NEL Integrated Care System (ICS) People and Workforce Strategy noting the following: • Its aim is to address critical workforce supply issues across our health and care partnership, developing an integrated 'one workforce' model to support the delivery of the four system priorities of the Integrated Care Strategy. • There has been wide engagement across the system with health and social care partners, including our Trusts, local authorities, place leaders, provider collaboratives, primary care, the independent care sector, the voluntary care sector, education providers and our residents, towards co-designing the strategy and developing a five-year, detailed strategy delivery action plan. • Examples of good practice across the system will be factored into the plan. • A five year strategy plan will be developed. • Actions against the themes to Attract, Retain, Reform and Inclusive Culture and Leadership include creating a centralised hub for live job	

DRAFT

Item No.	Item title	Action
	adverts across health care, social care and the voluntary sector; to offer a joint base offer for the first 12 months in health and social care; have a joint induction across the system for all staff into NEL. Delivery plans will be created with short, medium and long term actions. • The final draft will be submitted to the November ICB Board for approval. Updates will be provided to the ICP on next steps and progress against actions. Members discussed the item and suggested the following: • To be explicit that it is for the NEL partnership rather than just NEL. • To highlight the positives of these career paths. • To ensure joint induction across the care sector and health. • The voluntary care sector (VCS) have similar issues such as staff retention, and an aging workforce therefore to include career opportunities in the voluntary care sector (VCS) as well as having career transition from VCS into health and encouraging younger people into these roles. • The VCS have a schools and employment workstream which could feed into this plan. • Issue of London Living Wage and pay differences for outer London boroughs vs inner London is a challenge. • The ELFT strategy have pathways that help service users into its workforce, which we should consider within the plan. • Organisations rely on volunteers and if there is a recruitment hub could this be considered to attract people that wish to volunteer into health and social care. SN and FO noted and will consider all comments made and added: • This is a system People and workforce strategy encompassing all health and social care and will ensure this is made clear. • Developing actions to support the London Living Wage as well as how to bring better parity of benefits for all staff. London weighting is a discussion being held at national and regional level.	SN/TW
4.0	**Reflections on the Big Conversation**	
	CP outlined the work that was undertaken for the 'Big Conversation' which is about listening to the people in our communities, and understanding their views about health, care and wellbeing, to help us to focus on what matters to them, and to help us to improve what we do. Engagement with over 2000 people was undertaken over the summer with over 1000 responses to a survey as well as face to face events and targeted focus groups held. The outcome of these helped to inform our success measures as follows: • Compassionate care and support which feels human, culturally competent and personalised • Organisations working closely together to provide joined up care and support • Improved access to primary care as for the majority of local people it is their key connection with health services • Clearer ways to support everyone to be physically and mentally well in their local communities by incorporating the wider determinants of health (employment, housing, environment, poverty)	

DRAFT

Item No.	Item title	Action
	• Greater opportunities to work in health and care with flexible and accessible routes to apprenticeships, work experience and employment Members raised the following: • The return rate on the survey was quite disappointing and that we should be more proactive using more platforms to get out there. MG advised that this i is important for the ongoing conversation and there was a huge amount of Insight from residents which HealthWatch was included. • There were gaps in the population surveyed and targeted focus groups were arranged to address some of this but there are still some groups that are being missed such as Black African and Eastern European. • There is a need to build the trust to create behaviour change. • Carers are another group that could be included. Members were asked to join breakout rooms to discuss how to measure success based on what is most important to local people. Each group then fed back on each of the five success measure themes. Next steps will include: • A briefing on the output from these groups is attached as an appendix to these minutes. • Discussions today will help to form the 'I' statements that will be used for the strategy. • Success measures will be aligned with places where appropriate. CP thanked all people that worked really hard on the Big Conversation with in particular to the Communications and Engagement team, HealthWatch and community organisations involved in supporting focus groups and community events. The Chair offered to write to individuals/groups to provide the partnership's gratitude for their valued involvement.	CP CP/MG
5.0	**ICP system planning cycle**	
	JM advised the system planning process is about the allocation of NHS resources in 2024/25. Two key outputs to deliver is a refreshed Joint Forward Plan and the Operating Plan for NHS services in NEL. The planning process is inclusive of all partners across NEL. Out of lessons learned from the last year a key lesson was to start the planning process much earlier with much broader engagement. We are asking NHS providers to share early versions of their plans by the Autumn. Early drafts will then be shared so that all system partners will have the opportunity to review and comment and help shape the plan for the next year. Engagement will be through a number of fora including with place based partnerships, and incorporating the resident voice building on the themes from the Big Conversation. Members raised the following: • An interim discussion with Health and Wellbeing Boards should be held much sooner than proposed in March.	JM/AC

DRAFT

Item No.	Item title	Action
	• Financial planning and workforce planning should be aligned with service planning. • Concerns were raised that this process may add to people's workload across all organisations. JM advised that a lot of work is ongoing on the financial recovery plan, as well as the medium to long term financial strategy being developed and ensuring they connect with all planning for the next year. The national team have indicated they will share requirements in November but as a system we propose to share early assumptions on what basis we are planning by end October. It is intended that this will be picked up in existing meetings thereby reducing any additional burden on staff's time. Members **noted** the roadmap and the system planning design principles, the deliverables and system planning timeline.	
6.0	**ICP development plan**	
	CP provided an overview of the report which reminded members of the role of the ICP, work achieved to date, an improvement plan following a review of the first year, and proposed change in membership and extending the membership to the Care Provider Voice. There had also been suggestions to invite other partners to join this committee however upon consideration of their available capacity, it is proposed there are other ways that they can input into the work of the partnership such as in themed development sessions and workshops. Members **noted** the ICPs improvement plan and how much progress has already been made and **approved** the revise membership to include a representative from the Care Provider Voice. The terms of reference will be updated to reflect this. Members also agreed to add a themed session on housing and environment at a future meeting.	
7.0	**System pressures**	
7.1.	Industrial Action	
	ZE advised that the current area of pressure in the system is with the ongoing industrial action by consultants and junior doctors which is creating increased work for colleagues in terms of planning for industrial action and changes to appointments and the impact it is having on our residents both in terms of physical and mental health with planned care cancellations and delays.	
7.2.	Winter Planning	
	Winter is expected to be challenging, partly due to industrial action and partly potential impact from respiratory problems but as a partnership we are in a stronger position in planning, with a whole system winter planning workshop arranged. This work is driven at place to ensure all are connected to keep people healthy safe and well both at home or back into home.	
7.3.	Financial position	
	There is a large amount of work being undertaken to address the financial challenges across the system balancing this with quality and safety.	

DRAFT

Item No.	Item title	Action
	It was acknowledged that Havering have undertaken work to clarify and set out clearly their financial position and that other local authorities are also seeing financial challenges. As a unified partnership the ICS are advocating the need for fairer allocation for our growing and more deprived population.	
8.0	**Any other business**	
	None raised	
	Date of Next meeting – 10 January 2024

North East London Health & Care Partnership

Integrated Care Partnership Actions Log

OPEN ACTIONS

Action ref:	Date of meeting	Item no	Action required	Lead	When	Status
ACT007	06/07/23	2.0	**The Big Conversation** It was agreed that the ICB, in conversation with Healthwatch and the Voluntary, Community and Social Enterprise Collaborative, would consider how to evaluate the Big Conversation.	CP	Oct 2023	**Completed**: A joint meeting of designated leads from the ICB, Healthwatch and the VCSE Collaborative will meet in January to propose an approach.
ACT009	04/10/23	1.3	**Action log** There is ongoing evaluation of the big conversation. Details of how it will be evaluated will be advised at the next meeting under matters arising.	CP	Jan 2024	**Completed:** As per the above, a joint meeting is being held to ensure a joined up evaluation approach across the partnership.
ACT010	04/10/23	3.0	**Workforce Strategy** The VCS have a schools and employment workstream which could feed into this plan. Susan Nwanze and Tony Wong to discuss.	SN/TW	Jan 2024	**Completed**: SN has been in contact with TW. This work will form part of what is fed back to the People Board in January as part of discussions about the delivery plan.
ACT011	04/10/23	4.0	**Reflections on the Big Conversation** A briefing on the output from these groups is attached as an appendix to these minutes. The Chair offered to write to individuals/groups to provide the partnership's gratitude for their valued involvement.	CP CP/MG	Jan 2024 Jan 2024	**Completed**. **In progress:** We are planning a big event as an opportunity to express thanks to those involved.

Action ref:	Date of meeting	Item no	Action required	Lead	When	Status
ACT012	04/10/23	5.0	**ICP system planning cycle** An interim discussion with Health and Wellbeing Boards should be held sooner than proposed in March.	JM/AC	Jan 2024	**Completed:** A schedule of attendances at Health and Wellbeing Boards has been arranged with opportunities for earlier conversations at the Boards as well as follow up discussions.

North East London Health & Care Partnership

Integrated Care Partnership

10 January 2024

Title of report	Update on the Big Conversation and developing success measures
Author	Charlotte Pomery, Participation and Place
Presented by	Charlotte Pomery, Participation and Place
Contact for further information	charlotte.pomery@nhs.net
Executive summary	The 'Big Conversation' is the result of the commitment that was made in our '*working with people and communities'* strategy to work with local people to identify priorities and the criteria against which we will evaluate the impact of our approach and work as a system. This has been followed through to the Integrated Care Partnership's Interim Integrated Care Strategy, where we agreed that the success measures would be initiated and shaped by local people through a big conversation approach. The Big Conversation is an approach to an ongoing dialogue rather than a one off event or series of events. We recognise that it is not scale of response but rather depth of conversation which has been demonstrated through this particular phase of the process and that continuing to engage broad segments of our population in conversations, at different times and in different places, is part of our ongoing system development. Over the summer we heard from around 2000 local people via: • face to face events in each of our eight areas • focus groups with under-represented groups in our community run by our local Healthwatch organisations • online survey The Big Conversation focused on the four priorities for improving quality and outcomes and tackling health inequalities set out in our interim Strategy. An initial analysis of the data from all the conversations has now been completed and we have clustered the following findings as the basis for developing success measures: • People like to see trustworthy, accessible, competent and person-centred care from health and care staff • People like to see agencies/organisations working well together and to know where they can go to get help/answers

	• People would like to see more ways to support people's wellbeing - to be physically and mentally well - in their local communities • People find navigating ways into health and care jobs complicated – people are not sure where to start/being put off • People like it when access is made straightforward, especially to primary care The Big Conversation findings for each Place are being shared and developed through Place Partnerships and will form part of their approach to engagement, co-production and quality improvement. In each Place the work is being embedded within their framework approaches to co-production to ensure we have the appropriate reach and depth of engagement needed. At a system level, the Integrated Care Partnership is overseeing the finalisation of the success measures for the Integrated Care Strategy, developing a small number, not more than ten, which will be used to measure progress and impact and which can be derived directly from outputs from the Big Conversation. There is a proposal that a Big Event is held in the early Spring to test the emerging success measures with system partners, including statutory and non-statutory partners and local communities, and to agree the final set. At the same time, local partnerships will be responding to the specific findings from their local populations. We are also exploring how the emerging pillars of good care as shaped by local people might complement and potentially align with the 8 quality pillars which form our quality framework and specifically what that might mean for quality improvement approaches.
Action / recommendation	The ICP is asked to comment on the findings and the initial analysis and provide feedback on next steps including the finalisation of success measures, the alignment with the quality framework and how we might best promote and use the analysis across the system and through our commissioning approaches.
Previous reporting	Previous Integrated Care Partnership and Integrated Care Partnership Steering Group meetings; Place based Partnerships; updates provided to the ICB Board and the Population Health and Integration Committee.

Next steps/ onward reporting	Future Integrated Care Partnership meetings, Place Partnerships, Collaboratives and Population Health and Integration Committee.
Conflicts of interest	n/a
Strategic fit	The Big Conversation has offered an opportunity to engage in some depth with local people on all four ICS aims as follows: • To improve outcomes in population health and healthcare • To tackle inequalities in outcomes, experience and access • To enhance productivity and value for money • To support broader social and economic development Local people have highlighted the role of the wider determinants of health in maintaining good health and wellbeing as well as of person centred and joined up care underlining the importance of continuing to integrate horizontally and vertically across our system.
Impact on local people, health inequalities and sustainability	The Big Conversation aims to reduce health inequalities by using feedback to understand what local people feel will make the most difference to their health and wellbeing. Using the findings of the Big Conversation will help inform the improvement focus of the north east London system.
Impact on finance, performance and quality	As a result of the 'Big Conversation' we are developing new success measures developed to understand how well we are achieving our strategic priorities and objectives – and whether we are making a difference.
Risks	There is a risk that we are not able to respond to the success measures developed. We recognise the importance of trust and there is a risk that we are not able to follow through the outcomes of the success measures agreed as we seek to implement the Strategy across our system.

1.0 Introduction

1.1 The 'Big Conversation' is the result of the commitment that was made in our 'w*orking with people and communities'* strategy to work with local people to identify priorities and the criteria against which we will evaluate the impact of our approach and work as a system. This has been followed through to the Integrated Care Partnership's Interim Integrated Care Strategy, where we agreed that the success measures would be initiated and shaped by local people through a big conversation approach.

1.2 This discussion paper outlines our emerging thinking on the set of success measures which can be deprived from the outputs of the Big Conversation.

2.0 Background

2.1 North east London is a vibrant, diverse and fast-growing sub-region with a population of over 2 million, rich diversity and huge inequalities. Our health and care landscape is complex and constantly evolving to meet emerging needs and demand – and we know that local wellbeing is affected not only by the services we commission and deliver but also by our community infrastructure, by poverty and by wider determinants of health such as employment, housing and education. Through our Integrated Care Strategy we aimed to set out our key priorities and to highlight our intended ways of working – and through the Big Conversation we further aimed to understand how we would know we are being successful in addressing those areas which are of most importance to our local population.

2.2 Over the summer we heard from around 2000 local people about what good care looks like and what matters most to them via:

- face to face events in each of our eight areas
- focus groups with under-represented groups in our community run by our local Healthwatch organisations
- online survey

2.3 The Big Conversation focused on the four priorities for improving quality and outcomes and tackling health inequalities set out in our interim Strategy and on the six cross-cutting themes underpinning our ways of working as an ICS. We have always recognised that the Big Conversation is an approach to an ongoing dialogue rather than a one-off event or series of events. We recognise that it is not scale of response but rather depth of conversation which has been demonstrated through this particular phase of the process and that continuing to engage broad segments of our population in conversations, at different times and in different places, is part of our ongoing system development. We continue to work to ensure that this is a reality – and are actively following up with community conversations in individual places.

2.4 In analysing the rich conversations and dialogue captured through the Big Conversation to date, we are aware that the findings can and should be used in a variety of ways. First, the subject of this paper, to inform the success measures for our Integrated Care Strategy. Second, to inform our emerging commissioning model and to provide service specific feedback at both Place and Collaborative on what matters most to local people and specifically to develop a conversation on how good care – care which is trustworthy, competent, accessible and person-centred – is enabled and delivered. Third, to inform ways of working at Place and Collaborative which ensure that the voice of local people is reflected in all that we do, a voice which not only provides feedback and responses but initiates conversations and focus. Fourth, to build co-production as a model for us going forward not as a one-off but as the way that we build for the future. And fifth, to ensure that our approach to quality improvement, safety and risk is aligned to the priorities for local people – there is a specific opportunity to align our big conversation outcomes with the 8 pillars of quality in our quality framework for example. There may be other uses to which the findings can be applied and we will continue to ensure that we iterate and grow the findings as we develop as an integrated care system.

3. Draft Success Measures for the Integrated Care Strategy

3.1 Our Integrated Care Strategy, once finalised, will be our long term approach to making a difference to the health and wellbeing of local people, across our complex and varied social and geographic environment. As such, we recognise that the success measures need both to have strategic impact and to be authentically aligned to areas which are important to local people. The themes drawn out from the Big Conversation have the most immediate relevance for our six cross-cutting ways of working but are also relevant to how we consider taking forward our four priorities for tackling health inequalities and improving outcomes and quality. We are therefore proposing to reflect the impact of the Big Conversation findings to date on the interim Strategy in two ways: first, on the six cross-cutting themes and second on our four priorities.

3.2 Focusing first on the six cross-cutting ways of working, they are set out in the draft Strategy as follows:

- Tackling **Health Inequalities**
- Greater focus on **Prevention**
- Holistic and **Personalised** Care
- **Co-production** with local people
- Creating a **High Trust Environment** that supports integration and collaboration
- Operating as a **Learning System** driven by research and innovation

3.2.1 Local people's responses through the Big Conversation supported a continued and firm focus on the importance of working on these cross-cutting themes. What mattered to local people as described through the Big Conversation reflected significantly on how we work together as a system (a system which actively involves local people as key agents in their health and wellbeing) to create better health, rather than a focus solely on specific priorities or services. Their responses focused on what matters all the time, rather than what matters in the delivery of a particular service at a particular point. Given the responses from local people, it is proposed that the cross-cutting ways of working are reshaped along the following lines:

- Tackling Health Inequalities and improving access for everyone
- Creating physical and mental wellbeing and optimising the impact of the wider determinants of health, bringing greater focus to Prevention
- Delivering Care which is trustworthy, accessible, competent and person-centred
- Building Co-production and always involving local people as active agents in their health and wellbeing
- Supporting organisations to work closely and well together to provide joined up care and support through greater integration and collaboration in a High Trust Environment
- Operating as a Learning System driven by research and innovation including hearing what local people are saying to us and acting on it

3.3 Moving next to the four priorities in the Interim Strategy, and taking the key findings from the Big Conversation at a strategic level, the emerging success measures are set out below for consideration. Work on the levels of aspiration and ambition will be developed if these are considered to be the key areas of focus.

3.3.1 To create meaningful work opportunities and employment for people in north east London now and in the future

A: Success measure: Given the focus from the Big Conversation on Clearer ways to support everyone to be physically and mentally well in their local communities by incorporating the wider determinants of health (for example, employment, housing, environment, poverty) and on Greater opportunities to work in health and care with flexible and accessible routes to apprenticeships, work experience and employment, we are proposing the following success measures:

% increase in numbers of people who enter and remain employed (on a paid or voluntary basis) in health and social care locally who also live in north east London

% reduction in numbers of local people in employment in health and care who experience in work poverty. These are most likely to be disabled people and households with children.

3.3.2 To support everyone at risk of developing or living with a long term condition in north east London to live a longer and healthier life

A: Success measure: Given the focus from the Big Conversation on the revised cross-cutting themes, we are proposing that each priority develops a set of measures relating to some or all of the revised cross-cutting themes. An example could be, a measure of what joined up care and support looks like for people living with long term conditions.

B: Success measure: Given the focus from the Big Conversation on Clearer ways to support everyone to be physically and mentally well in their local communities by incorporating the wider determinants of health (for example, employment, housing, environment, poverty) we are proposing either:

% reduction in the rate of increase in long term conditions across north east London
or
% increase in people with long term conditions able to manage their conditions themselves and prevent them becoming worse as measured by the rate of progression into more specialised services

3.3.3 To provide the best start in life for the Babies, Children and Young People of North East London

A: Success measure: Given the focus from the Big Conversation on the revised cross-cutting themes, we are proposing that each priority develops a set of measures relating to the revised cross-cutting themes. An example could be, a measure of what good care (trustworthy, competent, accessible, person-centred) looks like for people babies, children, young people and families.

B: Success measure: Given the focus from the Big Conversation on Clearer ways to support everyone to be physically and mentally well in their local communities by incorporating the wider determinants of health (for example, employment, housing, environment, poverty) we are proposing:

% decrease in rates of childhood obesity in each of the Places across north east London

3.3.4 To improve the mental health and wellbeing of the people of north east London

A: Success measure: Given the focus from the Big Conversation on the revised cross-cutting themes, we are proposing that each priority develops a set of measures relating to the revised cross-cutting themes. An example could be, a measure of what tackling health Inequalities and improving access for everyone looks like for people with mental health and wellbeing needs.

B: Success measure: Given the focus from the Big Conversation on Clearer ways to support everyone to be physically and mentally well in their local communities by incorporating the wider determinants of health (employment, housing, environment, poverty), we are proposing either:

% decrease in people reporting that they are socially isolated
or
% decrease in people with mental health needs experiencing physical ill health at a younger age

4. Recommendations

4.1 The Integrated Care Partnership is asked to consider approach set out above to finalising the success measures and to discuss whether the model proposed reflects both the strategic ambition set out in our strategy and the responses from local people about what is important. We will then seek some input from those working on the outcomes frameworks for the priorities to agree a final set of measures. This will reflect a broader sweep of expertise and incorporate the views of local people too.

4.2 It has not been straightforward to map the responses through the richness and depth of the Big Conversation responses to success measures and we are therefore proposing this as an approach going forward. Whilst this means we are not signing off final success measures at this meeting, it sets out a layered approach to determining what is important.

5. End

Title of report	Supporting Equity and Sustainability in north east London – briefing pack for NHS England meeting, outcome and next steps
Author	Hilary Ross, Director of Strategy, System Development and Innovation
Presented by	Johanna Moss, Chief Strategy and Transformation Officer
Contact for further information	hilary.ross1@nhs.net
Executive summary	One of the ICB's roles is to plan to meet the health needs of the population. In response to the policy of successive national and regional administrations, north east London is the fastest growing health economy in the country. Alongside significant overall growth, the population in our places is also changing with an aging population in some traditionally younger places whilst some of our outer boroughs have the fastest growing child population in the country. The speed and volume of growth means that our funding is already challenged across revenue and capital. This pack sets out the key parameters of that growth and explains why funding mechanisms don't keep pace. It sets out the case for funding to meet the needs of our growing population, and describes the importance of investing in population health, innovation and prevention so that our health economy is sustainable and supports our people to have healthy lives. We are working with NHS England (NHSE) to further develop our collective understanding of the programme of work required to develop robust future plans that can be invested in. We will continue to make the case for north east London to be a test bed for innovation – following our recent success in gaining investment for a health navigator programme. We are working with NHSE to make the case for further capital investment.
Action / recommendation	The ICP is invited to consider: • How to further make the case for funding to meet the needs of our fast growing population; • To consider how population health approaches can help deliver a sustainable health economy which supports healthy lives within the context of rapid growth; • To consider how we can, within very tight current financial constraints, continue to focus on prevention as part of our overall response to preventing that growing population increasing in ill health to the same proportion as growth.

Previous reporting	Population Health & Integration Committee - 25 October 2023 ICB Board - 29 November 2023
Next steps/ onward reporting	Dependent on the discussion, it is anticipated that the population health and integration committee will return to the themes in the pack as part of its ongoing work and to receive updates on the programme of work described above. Elected members have already asked for a shorter version of the pack to support their discussions with stakeholders, in the form of a 'manifesto for north east London'.
Conflicts of interest	No conflicts of interest have been identified in relation to this report.
Strategic fit	The ICS aims this report aligns with are: • To improve outcomes in population health and healthcare • To tackle inequalities in outcomes, experience and access • To enhance productivity and value for money • To support broader social and economic development
Impact on local people, health inequalities and sustainability	This pack aimed to support discussion with national colleagues on greater support for north east London (NEL) to increase equity for our population. Greater understanding of the unique challenges being faced in NEL will be key to increasing support/ resource from NHSE. National support will aid local people by helping NEL manage the expected future service demands, for example, strengthening and growing services in areas such as primary and community care in order to improve preventative pathways. This will in turn support sustainability of services in the face of our growing population whilst also providing an opportunity to embed health inequality approaches.
Impact on finance, performance and quality	Securing further support/ resources against our revenue and capital requests will contribute to improving our performance, quality and finance challenges by helping to mitigate against our unfunded increased population growth. NEL would also have the opportunity to receive priority consideration for national innovation programmes concerning areas such as prevention and equity, further supporting new ways of working and ensuring quality and performance are improved.
Risks	The risks in this paper relate to the impact of future growth on services without adequate planning and resource. There are no significant risks associated with the production of a narrative.

North East London

Supporting equity and sustainability in North East London

Summary of our ask

Key areas of support

North East London has a **large, vibrant and highly diverse population** spanning eight local authorities. Our **rapidly growing** population experiences some of the worst **poverty and deprivation** in the country, **poorer outcomes** across many indicators and there is evidence of **significant unmet need**.

There is **collective agreement and support** across the integrated care partnership in north east London for our **new and ambitious strategy** that puts **innovation**, **co-production, prevention, personalisation, and equity** at the heart of how we work. Building on our successful track record of delivering transformation, our expanding architecture for innovation and research, as well as the new opportunities afforded to us through the ICS, we believe we can make a significant difference to **population health and equity** while also creating a more **sustainable health and care economy** in north east London.

However, systemic barriers are currently impeding our progress. Our ICS is **undercapitalised** which means it is impossible to invest in the technology and digital developments that are needed to move away from more traditional and resource intensive models of care. We lack the investment in **physical infrastructure** that is needed for population growth of the scale we expect to experience in north east London, and our **revenue** is inadequate for meeting our population need.

We are therefore seeking national support in the following key areas -

I. Additional non-recurrent revenue investment in a 10 year programme that seeks to strengthen, transform and grow capacity in primary and community services to help mitigate the unfunded increased population over and above that assumed in the funding formula

II. National funding of a team to work through the detail of the above, with a view to jointly agreeing a methodology and funding

III. Further investment in NEL capital to address our current baseline deficit, historic shortfalls in funding and the new capacity required to meet the demands of unprecedented population growth

IV. Prioritisation of NEL ICS by national teams as a test-bed of choice for innovation, particularly digital (as has recently been agreed for the Health Navigator urgent care innovation) supporting our increased focus on prevention and equity

V. Unlocking of the existing scheme at Whipps cross to secure the benefits for our current population and reduce the impact of the risks being held by the ICS

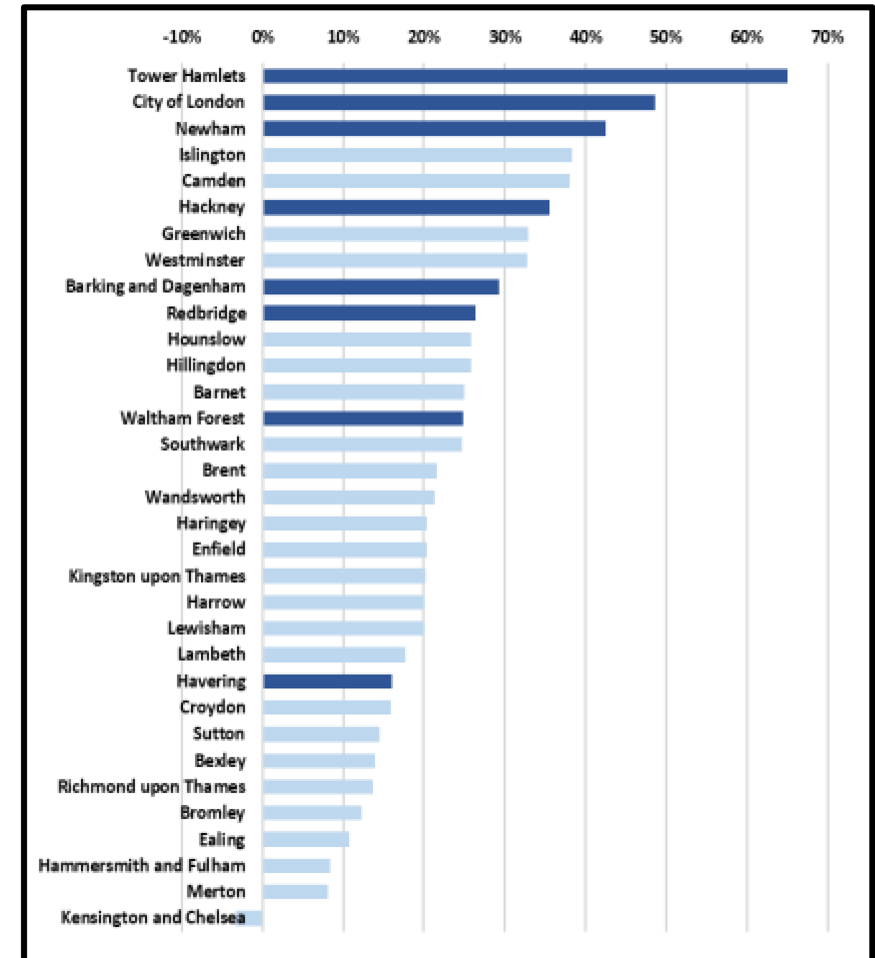
Context: our diverse and deprived population is growing (and ageing) rapidly

The scale of population growth in NEL has put significant pressure on health and care services over the last 20 years

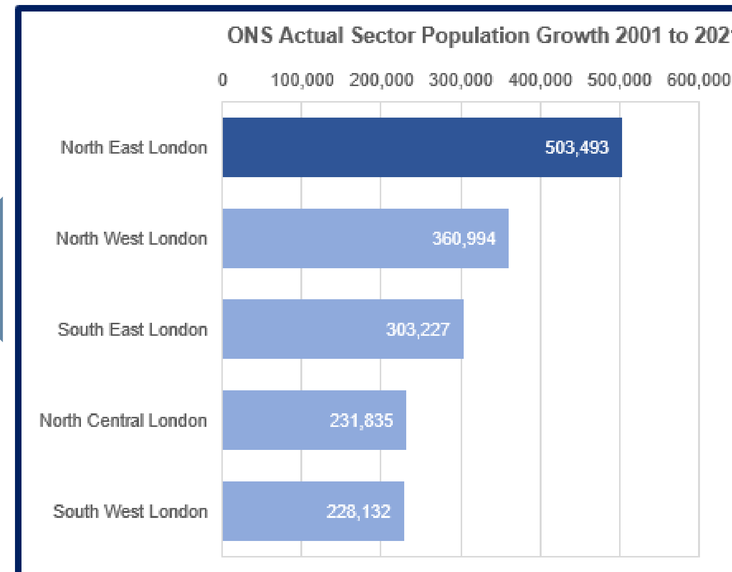
NEL has had the fastest growing population in the country over the last 20 years

- The London region has seen the largest population growth in the country over the last 20 years, growing twice as fast as the rest of the country.
- NEL continues to be the fastest growing ICS in London, growing twice as fast as the other ICS's.
- NEL has the three fastest growing boroughs in England, and six of the 10 fastest growing boroughs in London.

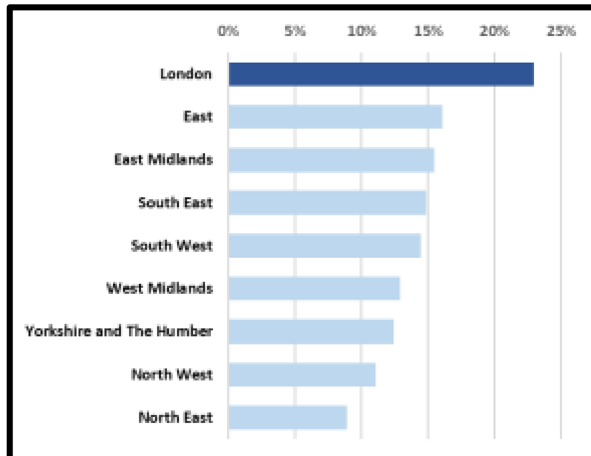
ONS London Neighbourhood population growth 2001-2021



ONS Sector population growth 2001-2021



ONS Regional population growth 2001-2021



Rapid population growth in NEL is set to continue and will exceed national projections

The rapid population growth for NEL is forecast to continue driven by population demographics and London's housing plans

The ONS forecast on which NHS allocations are based indicates continued high growth in NEL, however, the Greater London Authority (GLA) population projections which also take account of local housing plans point to growth being significantly higher than the ONS forecast. This is true even of the GLA's most conservative planning scenario. The implications of this are a significant lag in funding for NEL to match the rate of growth.

The ONS forecasts a growth in NEL population of **206,226** between 2021 and 2041.

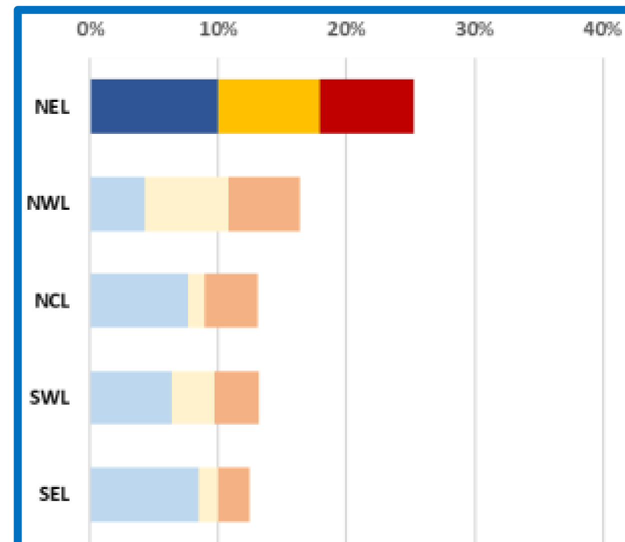
The GLA has produced planning scenarios indicating significantly increased growth in NEL:

Past Delivery Scenario:
Housing growth at historic delivery rates
Projecting a population increase of **308,576** by 2041

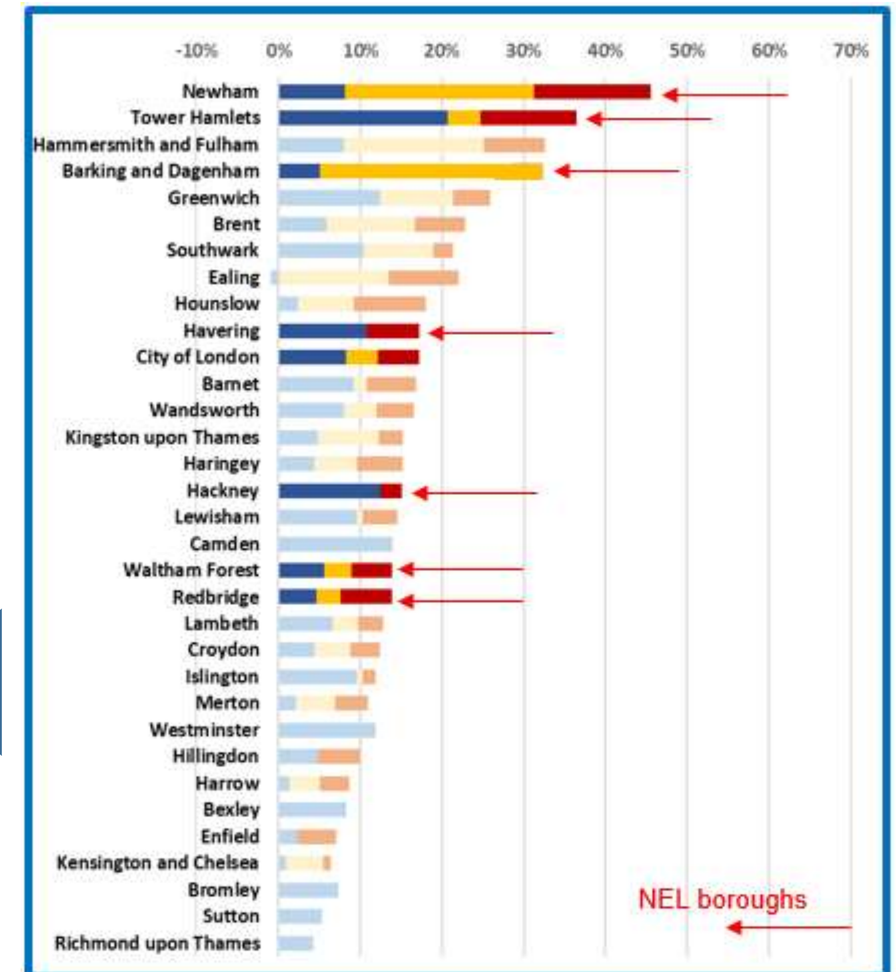
Identified Capacity Scenario:
Housing growth in line with identified development sites
Projecting a population increase of **331,432** by 2041

Housing Targets Scenario:
Housing growth in line with government housing targets
Projecting a population increase of **379,757** by 2041

GLA housing-led population projections by ICS 2021-2041



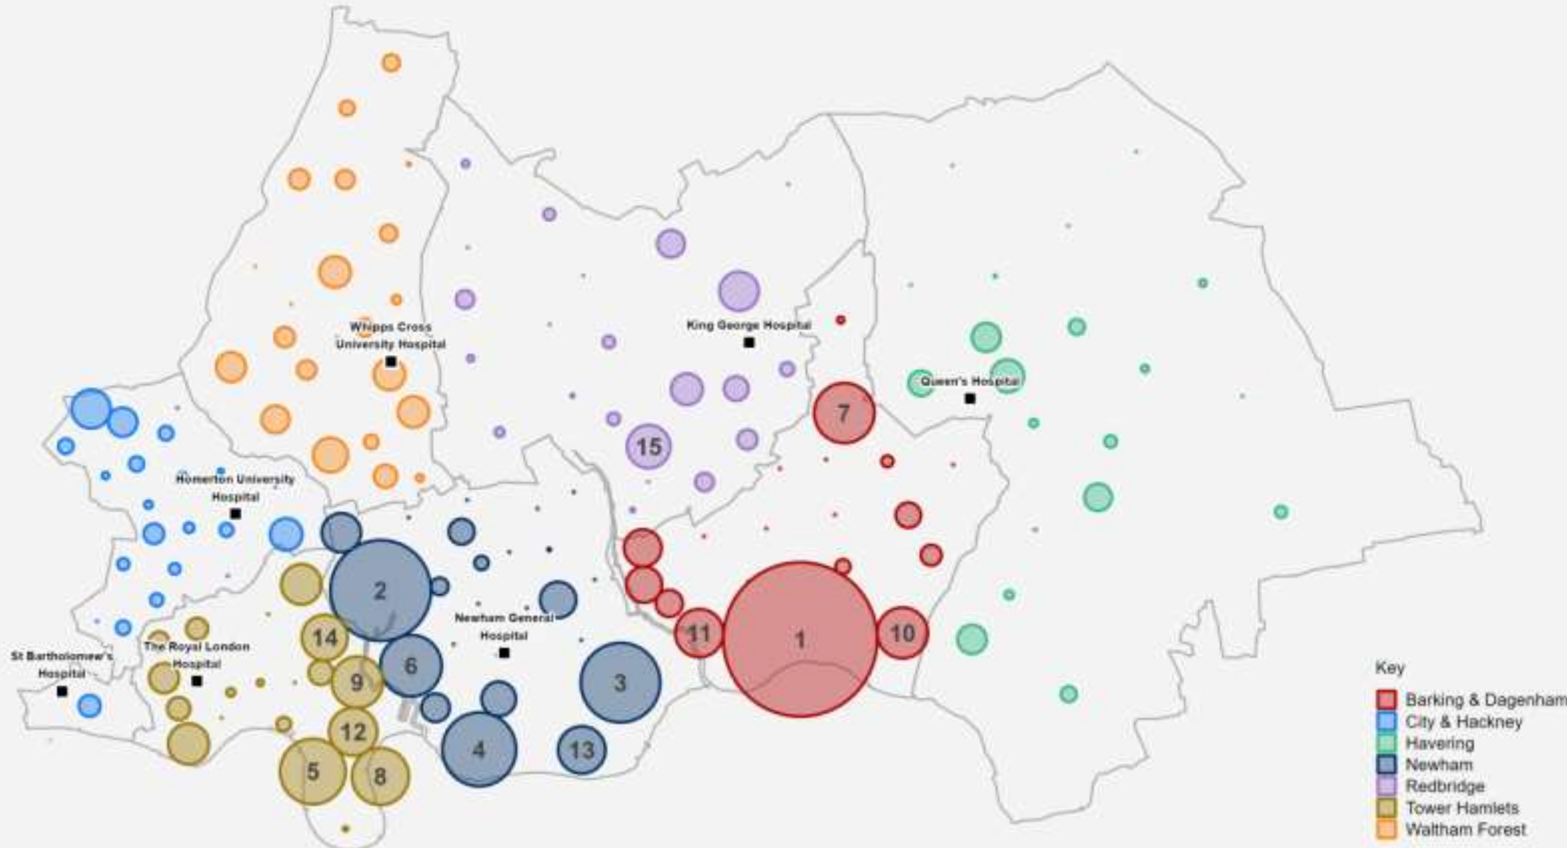
GLA housing-led population projections by LA 2021-2041



Sources: ONS sub-national population projection by local authority, 2018-based ; GLA housing-led population projections, 2020-based (graphs) and 2021-based (quoted figures)

Growth is unevenly distributed across NEL and particularly significant in some of our most deprived and currently underserved places

NEL service provision will need to adapt to new demands as NEL's Population Growth is unevenly dispersed .



Our **rapidly growing** population experiences some of the worst **poverty and deprivation** in the country, with **poorer outcomes** across many indicators and evidence of **significant unmet need** (Annex 1, slides 16-19).

Furthermore, our **hotspots of population growth** in NEL are focused in some of the most deprived parts of our geography including LB Barking & Dagenham where over half of the current population (54%) live in the most deprived quintile nationally and LB Newham where a quarter of the population live in the most deprived areas nationally (24%).

The place with highest projected growth in north east London (LB Barking & Dagenham) currently **lacks the essential infrastructure for health and care**. There is insufficient primary care capacity for existing growth in Barking and Dagenham and no acute provision whatsoever within the borough.

Demographic changes within our growing population will require greater investment in new infrastructure and services

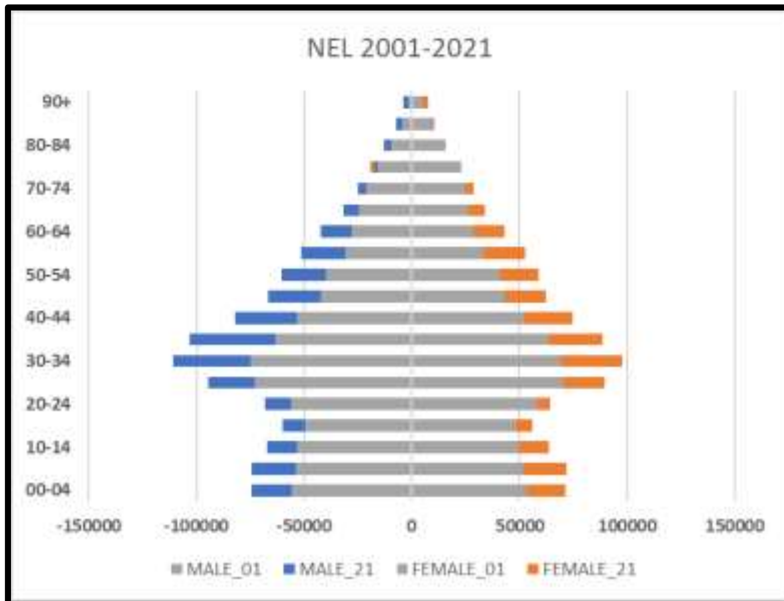
Trends in growth across NEL have typically been in young people and adults – whereas future growth will be across adults and older people contributing to a forecast 72% increase in outpatient and inpatient activity over the next 19 years

Historically our population growth has been mostly across children and adults whereas in future NEL will see growth predominantly in adults and older people. This will lead to significantly increased pressure on older peoples care services, frailty services, primary care services, and increasing pressure on emergency and urgent care services, adult care services, and adult mental health services.

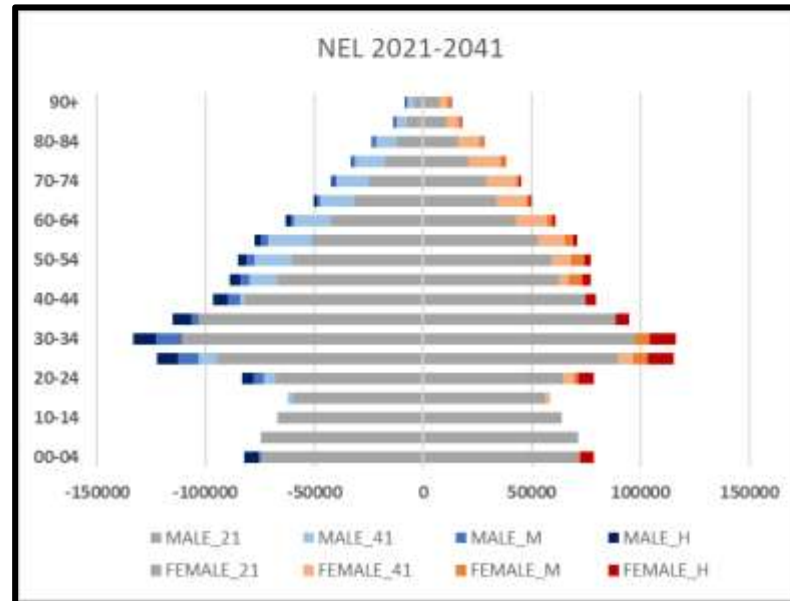
Increased investment in developing services and infrastructure for a changing population will be needed particularly in those places (e.g. LB Tower Hamlets and LB Hackney) where historically there has been a very young population and in future we will see a significant increase in over 60s.

While an ageing population is an overall trend in what have been historically young boroughs, LB Barking & Dagenham will see the opposite trend and as such will need to increase investment in services for children and young people.

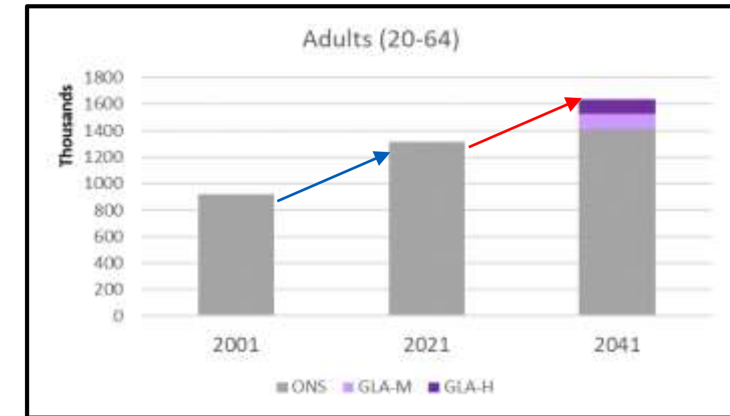
Historic Demographic Growth

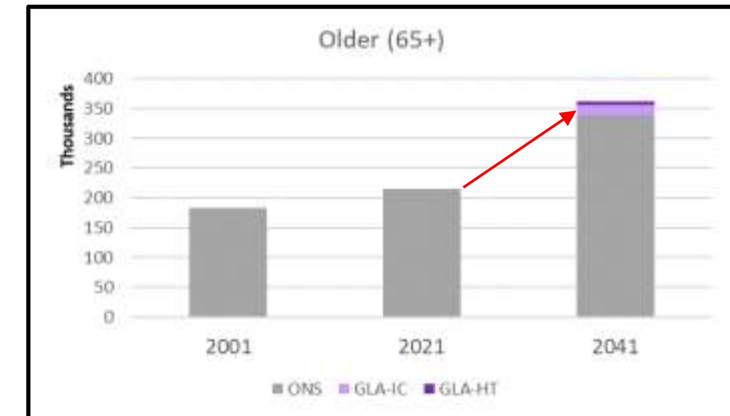


Future Demographic Growth



Growth by cohort





Addressing our challenges as an ICS in NEL

NEL ICS has aligned around a new integrated care strategy

Our integrated care partnership's ambition is to –

"Work with and for all the people of north east London to create meaningful improvements in health, wellbeing and equity."

Improving quality & outcomes

Deepening collaboration

Creating value

Securing greater equity

Six *crosscutting themes* underpinning our new ICS approach

- Tackling *Health Inequalities*
- Greater focus on *Prevention*
- Holistic and *Personalised* Care
- *Co-production* with local people
- Creating a *High Trust Environment* that supports integration and collaboration
- Operating as a *Learning System* driven by improvement, research and innovation

Four *system priorities* for improving quality and outcomes, and tackling health inequalities

- *Babies, Children & Young People*
- *Long Term Conditions*
- *Mental Health*
- *Local employment and workforce*

Securing the foundations of our system

Improving our *physical* and *digital infrastructure*
Maximising *value* through collective financial stewardship, investing in *prevention* and *innovation*, and improving *sustainability*
Embedding *equity*

We are becoming a thriving testbed for research and innovation

In addition to the many examples of successful service developments (e.g. Barts Heart Centre) and wider transformation across all parts of the system in NEL (Annex 2, slides 20-21), we are actively growing our research and innovation architecture to ensure we can deliver better outcomes for our growing population aswell as enabling greater value for money and sustainability as a system.

Bart's Health Life Sciences will be a major local and national asset bringing key infrastructure for researchers, scientists and clinicians working alongside businesses and entrepreneurs with the aim of becoming world-leading in prevention, prediction and precision (see box, right).

NEL already hosts a wealth of research and innovation assets:

- The **Clinical Effectiveness Group** at Queen Mary University London established 30 years ago uses data to support primary care improvement in population health (NEL ICS has just been ranked first nationally in CVD prevention and outcomes).
- **Care City** is an innovation centre for healthy ageing and regeneration with a mission for happier and healthier older age for east Londoners, achieved via research, innovation and workforce development.
- **EQUIP** (Enabling Quality Improvement in Practice) works across east London primary care supporting staff engagement and improvement approaches.
- We are also an active member of the North Thames Clinical Research Network, North Thames Applied Research Collaborative and UCLPartners.

Bart's Life Science Vision:

- Working with a **highly diverse population**, we will make a significant impact on health inequalities
- Extending and developing our **clinical research capacity**
- Using **big data and AI** to develop analytic and predictive tools
- **Precision medicine** for targeted interventions
- Creating **thousands of jobs** and **£Bs economic impact**
- Tackling economic determinants of health through **skills and employment opportunities**

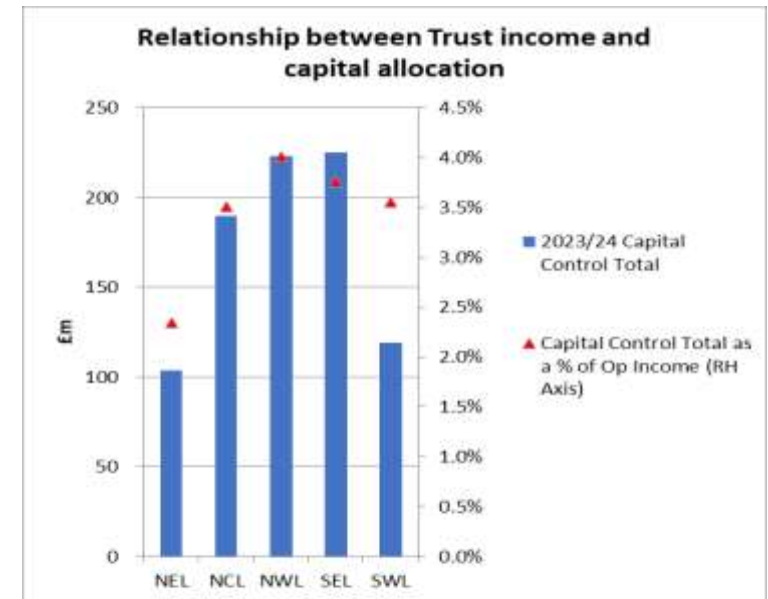
Innovation is at the heart of new developments in NEL – we are launching a **Research Centre for Healthy Ageing** at Whipps Cross Hospital. The centre led by Barts Health and QMUL will create a collaborative network of clinicians, researches, educators, policymakers working with local communities researching how to transform how services work for older people, supporting them to live well and independently. Other developments we are scoping include the opportunities for primary care from the life sciences developments at Whitechapel, lifesciences developments at Canary Wharf, and a partnership with the national Dementia Research Institute to support our centre of excellence for older people at East Ham.

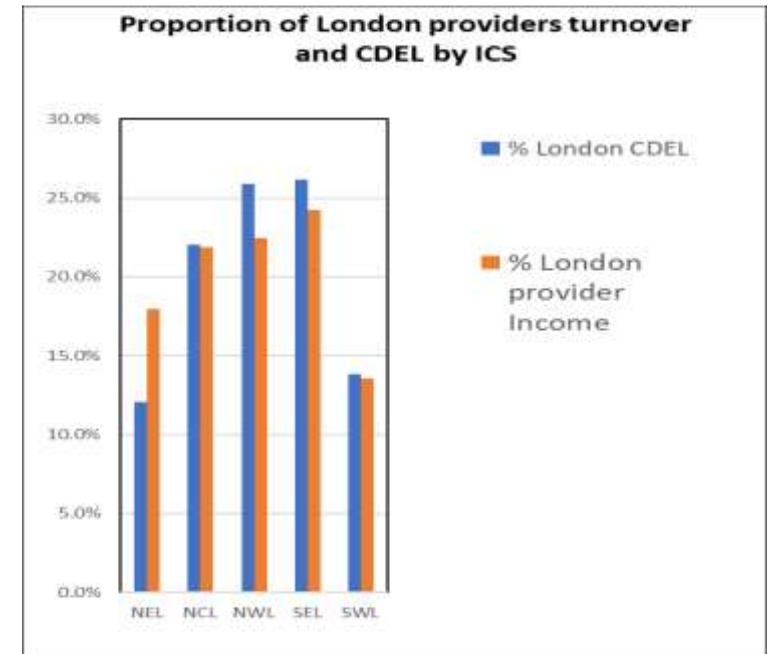
Over the last year, NEL ICB has developed a research strategy to support our learning system ethos. We have developed a portal that helps to connect researchers with local clinicians and the ICB, and we have been awarded two national grants for increasing engagement of our diverse local communities in research. We are undertaking a range of evaluation activities across our programmes to ensure we understand the impact of our investment including in our pioneering work on personalisation and social prescribing. Our Acute Provider Collaborative has also developed plans for delivering a step change in clinical research. Current research projects include closer integration with community services on social prescribing for long-term or medically unexplained conditions.

Systemic challenges that are holding us back

Significant undercapitalisation

- According to NHSE, NEL has the lowest CDEL per population in England. NEL continues to receive the lowest capital allocation in London : in 2023/24 NEL £87.2m, SEL (highest) £225.2m.
- A significant contributory factor to the low capital allocation is the treatment of PFI in the current methodology for deriving capital allocations. The higher the value of PFI assets the greater the negative impact on the non PFI asset capital allocation. This is particularly significant for NEL which has over half of the total London PFI assets (by value).
- There is no unambiguous measure of the relative capital need of an ICS, but, it is possible to use the allocation as a proportion of provider income, as a proxy for total work done and need for capital to support this work. This metric also accounts for local variations such as specialist work and inflows from other systems. This can be seen the charts, NEL with both the lowest CDEL % of provider income and the only London ICS with its allocation % of London lower than its % of London provider income.
- On this basis, the difference: 2.3% for NEL against 3.5% - 4% rest of London. i.e. the next lowest ICS in London has proportionally **50%** higher capital allocation than NEL. NEL is also one of the lowest resourced ICS in the country, using this metric.
- Reviewing the NEL capital position using these benchmarks would suggest an increase in allocation of c.£80m would be appropriate and equitable.
- Whilst recognising the benefits of the PFI estate, the treatment of PFI in the allocation formula results in a significant reduction to the non PFI capital allocation available to the sector of c.£37m/year.





Impact of the disadvantaged capital position in NEL

The impacts and current challenges faced by NEL ICS with our current capital position.

Three key capital challenges facing NEL:

1. **Our allocation is absorbed by the maintenance of our existing basic infrastructure and equipment -**

    - **Backlog / preventative maintenance:** We are currently prioritising essential backlog maintenance to ensure service continuity covering both preventative maintenance and improvement of our assets (90% of our allocation assigned in 23/24). However, this is still insufficient for addressing the backlog which increases each year and is starting to impinge on our ability to keep sites and services operational. Delays to routine replacement of equipment lead to equipment failures we lack resources to address in a timely way.

    - **Climate change and adaption:** Limited funds are available for addressing climate resilience. Scope to incorporate into backlog work is limited due to the need to address basic repairs / maintenance as a priority.

2. **We lack investment for new technologies and digital to increase our productivity -**

    - **New technology:** Investment in new technology (new technology and 'new' for NEL) is inhibited by lack of funds and the need to prioritise essential backlog as above. The lack of investment impacts innovation in service delivery and our ability to increase productivity and accelerate improvement.

    - **Productivity:** concentrating on backlog for safety reasons and keeping services open means little or no investment in equipment that would improve productivity and reduce revenue costs. There are numerous examples across community (delayed IT investments impacting efficiency programmes), infrastructure (can no longer support modern energy requirements for additional diagnostic tools), capacity (sub-optimal use of estate leading to excess overhead) and elevated agency usage (impact on staff recruitment and retention from poor quality environment).

3. **We have insufficient infrastructure to support our growing population -**

    - **Additional capacity:** Capital is required to create additional capacity in new and existing premises to support modern clinical models of care in areas of significant population growth. For example: A&E department at Newham Hospital was built to accommodate 200 contacts a day and now sees in excess of 500 as a result of demographic changes and existing population growth; there is insufficient primary care capacity in Barking town centre to accommodate existing growth.

    - **Delays to existing schemes:** We are awaiting confirmation from the national programme for the Whipps Cross redevelopment which is a key development for our existing population. The ICS is currently holding the risks from significant delays.

Revenue implications of rapid growth in NEL

The National funding allocation formula does not account for NEL's house building increase. The Mayor's London Plan also indicates significant NEL areas as 'London Opportunity Areas'.

The rapid growth and demographic changes as described above, also create two key revenue challenges for the ICS in NEL:

1. **Financial lag** –

As described above, the national funding allocation formula uses ONS population projections which understate population pressures, particularly those related to high levels of housing development and changes in demographics, as is the case in NEL. The London specific GLA projections give a more accurate picture as they account for these factors.

A funding formula that does not take these factors into account takes longer to recognise the rising population and results in financial pressures for the system. This situation perpetuates until the population stabilises (c. 20 years on our calculations) meaning that there are significant delays to establishing the additional services needed to meet the needs of the growing population.

This table illustrates the financial impact of the lower ONS population projection with an estimated unfunded 0.8% difference in 2023/24 which equates to a value of c.£32m. Similar calculation for 24/25 indicates c.£59m shortfall, or c.£91m over the current 2 year allocation period.

	ONS In year growth	GLA in year Growth	Difference	Value of difference 2023/24	Value of difference 2024/25
	%	%	%	£m	£m
Impact difference ONS vs GLA	0.6%	1.4%	0.8%	32	59

2: Accelerated demographic change –

As the age profile of our population changes, the services that are currently in place no longer meet the needs of our rapidly expanding populations. If growth was slower this could be dealt with through incremental changes to the existing services.

A different approach is needed to support us with systemic challenges

The primary finance challenges faced by NEL

We are seeking national support to overcome the following challenges which are beyond our control -

1. **Additional non-recurrent revenue investment in a 10 year programme** that seeks to strengthen, transform and grow capacity in primary and community services to help mitigate the unfunded increased population over and above that assumed in the funding formula towards a more sustainable foundation for our system. Our partnership has a successful track record of transformation where there has been appropriate investment. We want to accelerate adoption of innovation to move more activity out of the acute sector, investing in primary care, community services and prevention. To do this we need additional non-recurrent funding to pump-prime and double run services while evaluating robustly so we have the evidence to support rapid scaling.

2. **Nationally funded programme team** to work through the detail of the above with a view to jointly agreeing a methodology and funding.

3. **Significant non recurrent support to resolve the backlog caused by historic undercapitalisation** built up over the last 5-10 years. Without this NEL will never get to a safe and sustainable position with regard to our clinical estate (e.g. fire works, low numbers of beds), productivity (e.g. lack of additional power supply preventing modernisation of sites), clinical equipment (e.g. low numbers of diagnostic tools), IT (e.g. security, agile community services) and digital systems (e.g. BHRUT EPR). This capital resource problem spills into poor revenue performance and practice and needs to be in place to help resolve these underlying issues.

4. **Additional non recurrent capital investment in new resources, renovations and assets for our growing population** (not currently recognised in the capital allocation) stretching over the next 10 -15 years are needed, otherwise NEL cannot absorb a 20%+ increase in population with an asset base that is already overstretched. Non recurrent funds are necessary to cover the cost of the systemic transformation required by fundamental demographic change that will take place through the much needed housing developments taking place in NEL.

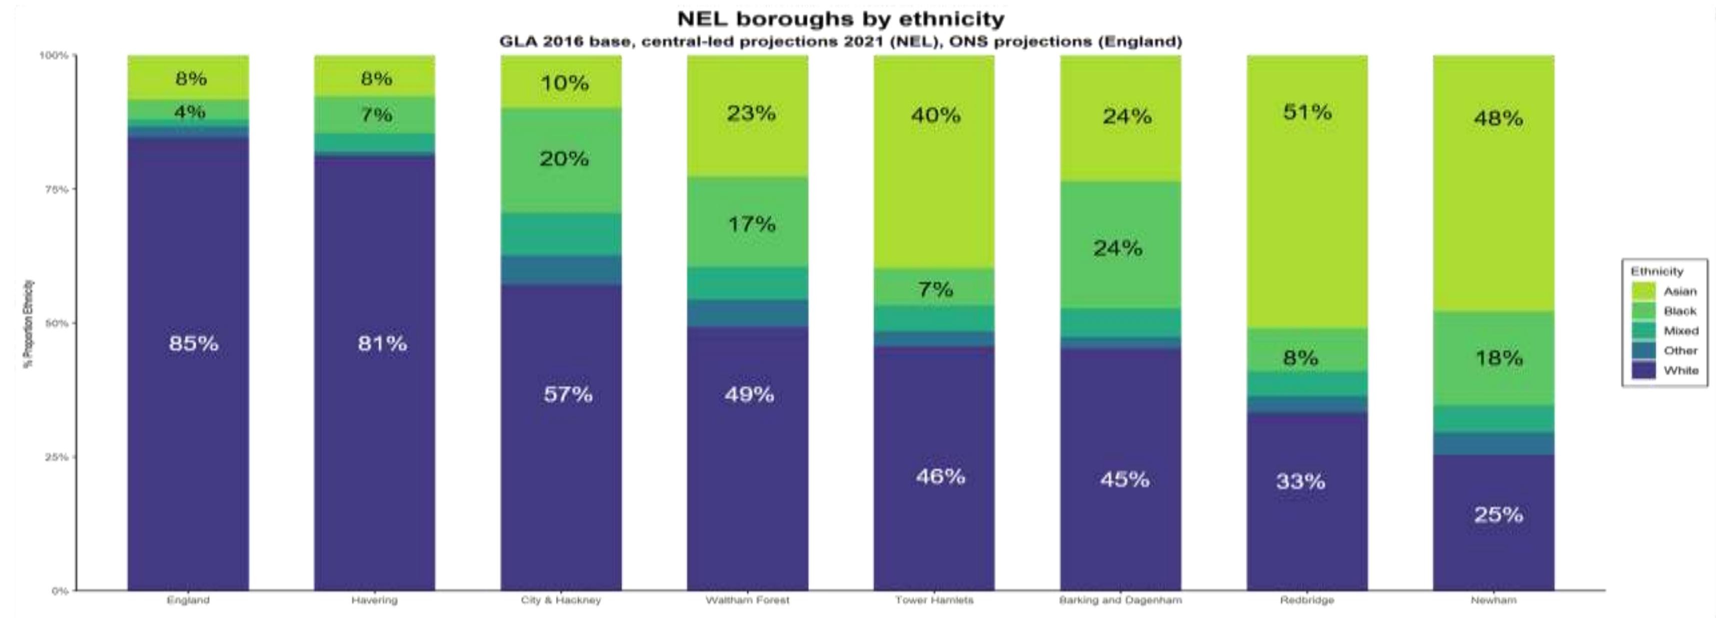
5. **Recurrent amendment to the allocation methodology to address ongoing capital underfunding** and ensure NEL receives a fair and commensurate level of funding in future years.

Annex 1 - our NEL population

NEL ICS has one of the most diverse and deprived populations nationally

Deprivation:

- Barking and Dagenham is ranked 22nd and Hackney 23rd most deprived out of 312 local authority areas in England. Newham is ranked 43rd and Tower Hamlets 50th
- Across ALL of NEL, 24% (approximately 489,000 people) live in areas ranked in the most deprived 20% in England
- In Barking and Dagenham, over half – 54% (116,000 people) live in an area ranked among the most deprived quintile.
- In City and Hackney, 40% of the population (117,000 people), Tower Hamlets 29% (95,000 people), and in Newham 24% (87,000 people) live in LSOAs ranked in the most deprived quintile



Ethnicity:

- More than half (53%) of NEL's population is of Black, Asian or mixed ethnicity compared with 11% across England overall
- The places of North East London vary greatly in their diversity: Newham is the most ethnically diverse place in NEL. In contrast, Havering sits at the other end of the spectrum in NEL with the vast majority (81%) of its population of White ethnicity compared with 8% identifying as Asian ethnicity. However, all are more ethnically diverse than the England average.
- All NEL places except Havering and City and Hackney (combined) have predominately non-white populations.
- Newham is one of the most diverse boroughs in England. Those of white ethnic groups in Newham account for 25% of the population and those of Asian ethnic groups make up nearly half (48%) of the population. This compares to 85% and 8% for England.
- Redbridge is the second most diverse place in NEL, with 67% of its population being of Black, Asian, Mixed or Other ethnicity.

Outcomes are worse for our current population across many key national indicators

Best start in life:

- All NEL places except Hackney and Havering have a higher proportion of term babies born with a low birth weight than the England average (2.86%).
- The stillbirth rate in Newham (5.5 per 1,000), Tower Hamlets (5.5), and Barking and Dagenham (6.2) is significantly higher than the England average (4.0).
- Rates of A&E attendances by young children in Newham (821 per 1,000) and Waltham Forest (728 per 1,000) are significantly higher than the England average (670 per 1,000).
- In Waltham Forest (14%), Barking and Dagenham (14.8%), Hackney (27.7%) and Tower Hamlets (33.6%) the proportion of children claiming free school meals is higher than the England (13.5%) average. The rate in Hackney and Tower Hamlets is more than double the England rate. This indicator is considered a good proxy for low parental income.
- All NEL places, except Waltham Forest, have a rate of children in need that is higher than the England average (635 per 10,000)
- Havering is an outlier having higher rates (117 per 100,000) of hospital admissions of 15-24 year olds due to substance misuse than the England (81 per 100,000) average. Havering is the ONLY place in London where the rates are higher than the England average.

Working Age Adults - Major Health Conditions:

- Higher under 75 mortality – all cardiovascular diseases: Hackney, Tower Hamlets, Newham, Waltham Forest and Barking and Dagenham have a mortality rate from all cardiovascular diseases higher than the England average of 70 per 100,000 population.
- Higher prevalence diabetes: In Havering (7.64%), Barking and Dagenham (8.6%), Newham (8.6%) and Redbridge (9%) the diagnosed prevalence of diabetes is higher than the England (7.1%) average. Rates are increasing in all places except Newham.
- Higher under 75 mortality from cancer: Barking and Dagenham (115.5 per 100,000) has an under 75 mortality rate for cancer that is higher than the England (100 per 100,000) average.
- Tackling chronic respiratory disease is one of the 5 clinical priorities in the NHS Core 20 plus 5. Under 75 mortality rate from respiratory disease is worse than the England average in Tower Hamlets (44 per 100,000) and Barking and Dagenham (60 per 100,000).

Working Age Adults - Mental Health:

- Estimated prevalence of common mental disorders: City and Hackney (24%), Newham (24%), Tower Hamlets (23%), Waltham Forest (23%), and Barking and Dagenham (22%) have an estimated prevalence of common mental disorder higher than the England (17%) average.
- High prevalence severe mental illness: City and Hackney (1.42%), Tower Hamlets (1.32%), Waltham Forest (1.17%) and Newham (1.12%) have a higher prevalence of severe mental illness than England (0.95%). Ensuring annual health checks for 60% of those with severe mental illness is one of the 5 clinical targets included in the NHS Core20 Plus 5 drive to reduce health inequalities.
- High inpatient stays in secondary mental health services: City and Hackney (505 per 100,000), Newham (401 per 100,000), Tower Hamlets (304 per 100,000) and Waltham Forest (282 per 100,000) have a rate of inpatient stays higher than the England (243 per 100,000) average.
- High under 75 mortality for adults with severe mental illness: Tower Hamlets (147 per 100,000), Barking and Dagenham (143 per 100,000), Hackney (119 per 100,000) and Newham (140 per 100,000) have a rate of under 75 mortality for adults with severe mental illness higher than the England (103.6 per 100k) average.

There is evidence of significant unmet need within our current population

We need a greater focus on prevention, addressing unmet need and tackling health inequalities

Child Obesity

Nearly 10% of year 6 children in Barking and Dagenham are severely obese. Nearly a third of children are obese (the highest prevalence rate in London).

NEL also has a higher proportion of adults who are physically inactive compared to London and England.

Mental Health

It is estimated that nearly a quarter of adults in NEL suffer with depression or anxiety, yet QOF diagnosed prevalence is around 9%. Whilst the number of MH related attendances has decreased in 22/23, the number of A&E attendances with MH presentation waiting over 12 hours shows an increasing trend increasing pressure on UEC services.

Tobacco

1 in 20 pregnant women smoke at time of delivery. Smoking prevalence as identified by the GP survey is higher than the England average in most NEL places. In the same survey NEL has the lowest quit smoking levels in England.

Premature CVD mortality

In NEL there is a very clear association between premature mortality from CVD and levels of deprivation. The most deprived areas have more than twice the rate of premature deaths compared to the least deprived areas. 2021/22 figures showed for every 1 unit increase in deprivation, the premature mortality rate increases by approximately 11 deaths per 100,000 population.

Vulnerable housing

NEL has high numbers of vulnerably housed and homeless people, including refugee and asylum seekers, compared to both London and England. At the end of September 2022 11,741 households in NEL were in council arranged temporary accommodation. This is a rate of 23 households per thousand compared to 16 per thousand in London and 4 per thousand in England as a whole.

Homelessness

Shelter estimate in 2022 there were 42,399 homeless individuals in NEL. Inc. those in temp accommodation, hostels, rough sleeping and in social services accommodation: 1 in 47 people, compared to 1 in 208 people across England and 1 in 58 in London. People experiencing homeless have worse health outcomes & face extremely elevated disease and mortality risks which are eight to twelve times higher than the general population.

Childhood Poverty

5 NEL boroughs have highest proportion of children living low income families in London. In 2020/21 98,332 of NEL young people equate to 32% of the London living in low-income families. Since the 2014 the proportion of children living in low income families is increasing faster than the England average.

Childhood Vaccinations

The NEL average rate of uptake for ALL infant and early years vaccinations are lower than both the London and the England rates
There are particular challenges in some communities/parts within Hackney, Redbridge, Newham and B&D where rates are very low with some small areas where coverage is less than 20% of the eligible population.

There is clear indication of unmet need across our communities in NEL

For many conditions there are low recorded prevalence rates, while at the same time, most NEL places have a higher Standardised Mortality Ratio for those under 75 (SMR<75) – a measure of premature deaths in a population – compared to the England average. Whilst some of this may be due to the age profile of our population, there may be significant unmet health and care need in our communities that is not being identified or effectively met by our current service offers.

Annex 2 – some examples of successful transformation in NEL

A track record of successful transformation

Examples of transformation we have driven within existing resources

Cardiovascular Disease:

NEL ICS is the top ranking 1st in England in key Cardiovascular prevention and disease outcomes including management of hypertension, atrial fibrillation, chronic kidney disease, heart disease and stroke, and people at high CVD risk.

Long Term Conditions:

The Non-Invasive Ventilation (NIV) Service, which went live in April 22, has been put in place for the management of chronic hypercapnic respiratory failure (CHRF). Previously the service was only available through Tertiary institutions however will now be delivered locally by BHRUT to patients at home.

Children's LTCs:

City and Hackney practices have led the development of Long term conditions (LTC) integrated management with 80% of eligible children receiving an annual review with personalised care plan, 65% of children with diabetes, sickle cell and epilepsy receiving an annual care contact from their practice.

Elective Services:

We have an established planned care recovery and transformation programme. An integrated system programme initially set up in October 2021 to recover the elective backlog and improve equity of access for our population, led by the Acute Provider Collaborative.

ELFT Community Health Services:

Pharmacy input into district nursing teams (HSJ Award category finalist) improved outcomes for both medicines management and medicines optimisation. Delivered via system innovation and new ways of working

First Contact Physiotherapy:

An integrated PCN wide physiotherapy clinic that required the set-up of a cross organisational booking system. Resulting in beneficial patient experience.

Young Peoples Outpatient Services:

Tower Hamlets has established a young people's GP clinic called 'Health Spot' aligned with youth provision rights in order to provide a trusted approachable environment where young people are able to see a doctor, specialist nurse or mental health worker. Supporting them with integrated holistic healthcare, health literacy and empowerment.

Transforming Outpatient Services:

Our GPs can now receive advice directly from a number of specialist consultants, reducing hospital attendance and giving speedy care. In 2022/23 we achieved against the 16% national ask for advice and guidance requests across 2022/23, and for approximately 29% of all outpatient appointments in January.

North East London Health & Care Partnership

Integrated Care Partnership

10 January 2024

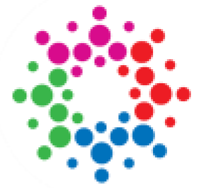
Title of report	Joint Forward Plan refresh 24/25 & System Planning Process
Author	Anna Carratt
Presented by	Jo Moss and Anna Carratt
Contact for further information	a.carratt@nhs.net and warren.leung@nhs.net
Executive summary	This paper provides an update to the ICP membership, focusing on two elements: 1. the proposed changes we are making to the Joint Forward Plan for 2024/25 and 2. to get your view on the prioritisation criteria and process we propose for new investments as part of the system planning for 2024/25. **Joint Forward Plan refresh** The expectation is that our system's joint forward plan/ five-year plan is refreshed yearly and submitted to NHSE by the end of March each year. It will therefore continue to describe how we will, as a system, deliver our Integrated Care Partnership Strategy as well as core NHS services. As part of these annual refreshes going forward we will work with local people, partners and stakeholders to iterate and improve the plan as we develop our partnership, to ensure it stays relevant and useful to partners across the system. For next year's 2024/2025 refresh we have maintained much of the core information and headlines that are in the current iteration. Updating and amending statistics and information where relevant. **System planning prioritisation criteria** On the 4th October the 2024/25 System planning cycle was presented to the ICP Committee. In our initial financial planning assumptions we identified c£20m that could be made available for investment in commissioned services, funded by holding back any non-inflationary growth applied in the national formula.

	In addition, there are currently schemes (total value c£170m) which are 'live' across our system but which do not have an identified, recurrent source of funding. As part of our System Planning Cycle we have developed a prioritisation process and draft criteria for the 2024/25 investment funding.
Action / recommendation	The Board/Committee is asked to: Joint Forward Plan Refresh 24/25: Within the context of our interim integrated care strategy, ICP Committee members are asked to - • note why the JFP refresh is being undertaken and the approach being followed in order to deliver a refreshed NEL 24/25 JFP by March 2024 • note the amended content proposed • review and comment on the changes to the JFP 24/25 System Planning Process: ICP Committee members are asked to - • Note the system planning prioritisation approach • Review and help shape the draft prioritisation criteria outlined on page 15
Previous reporting	The Joint Forward Plan refresh: ▪ CAG – 6th Dec 2023 ▪ Havering HWBB – 20th Dec 2023 ▪ ONEL JOSC – 9th Jan 2024 ▪ Acute Provider Collaborative Execs – 9th Jan 2024 System Planning Process: ▪ System Strategy Group – 14th Dec 2023 ▪ ICB EMT – 19th Dec 2023
Next steps/ onward reporting	The Joint Forward Plan refresh: ▪ All Place HWBBs and/ or Health & Care Partnership Boards – Jan to Feb 2024 ▪ Primary Care Collaborative sub-committee – 10th Jan 2024 ▪ Community Health Collaborative sub-committee – 15th Jan 2024 ▪ INEL JOSC – 23RD Jan 2024 ▪ MHLDA Collaborative sub-committee – 31st Jan 2024 ▪ Exec Committee (sign-off) – 7th Mar 2024 ▪ CAG (sign-off) – 13th Mar 2024 ▪ ICB Board (sign-off) – 27th Mar 2024

	System Planning Process: ▪ The system planning prioritisation criteria will be applied to ranked schemes from our Places, Provider Collaboratives, Providers and System Improvement portfolios ▪ These schemes will be discussed by a joint meeting on 8th February 2024 between the System Strategy Group and our Clinical Advisory Group and a list of schemes will be recommended to the ICS Executive Committee for approval
Conflicts of interest	N/A
Strategic fit	• To improve outcomes in population health and healthcare • To tackle inequalities in outcomes, experience and access • To enhance productivity and value for money • To support broader social and economic development
Impact on local people, health inequalities and sustainability	Both the system planning process and yearly refresh of the NEL Joint Forward Plan support the maturity of our system in being able to deliver our four core priorities and cross cutting themes, which in turn are linked to reducing health inequalities.
Impact on finance, performance and quality	The 'system planning process' item will have financial, performance and quality implications for the system as a whole and relates to resource allocation.

Risks	▪ Timelines are a risk.
	  o Joint Forward Plan submission to NHSE in March 2024
	  o System planning prioritisation to be concluded before the end of March 2024
	▪ Enhance productivity and value for money (BAF)
	  o The system planning process will impact the allocation of resources

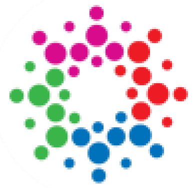
End
Anna Carratt, 19 December 2023



North East London

Appendix 1 – DRAFT Joint Forward Plan 24/25

ICP Committee Meeting – 10th January 2024



North East London (NEL) Joint Forward Plan - Refresh

December 2023

DRAFT ALL SLIDES WITHIN THIS PACK ARE DRAFT VERSIONS

1. Introduction

DRAFT

Introduction

- This Joint Forward Plan is north east London's second five-year plan since the establishment of NHS NEL. In this plan, we build upon the first, refreshing and updating the challenges that we face as a system in meeting the health and care needs of our local people, but also the assets we hold within our partnership.
- We know that the current model of health and care provision in north east London needs to adapt and improve to meet the needs of our growing and changing population and in this plan we describe the substantial portfolio of transformation programmes that are seeking to do just that. We have now also included new slides our cross cutting themes and each of our seven Place based partnerships.
- The plan sets out the range of actions we are taking as a system to address the urgent pressures currently facing our services, the work we are undertaking collaboratively to improve the health and care of our population and reduce inequalities, and how we are developing key enablers such as our estate and digital infrastructure as well as financial sustainability.
- Our Joint Forward Plan will be refreshed yearly to reflect that, as a partnership, we have continual work to do to develop a cohesive and complete action plan for meeting all the challenges we face together. We will work with local people, partners and stakeholders to update and improve the plan yearly as we develop our partnership, to ensure it stays relevant and useful to partners across the system.

Highlighting the distinct challenges we face as we seek to create a sustainable health and care system serving the people of north east London

In submitting our Joint Forward Plan, we are asking for greater recognition of three key strategic challenges that are beyond our direct control. The impact of these challenges is increasingly affecting our ability to improve population health and inequalities, and to sustain core services and our system over the coming years.

- **Poverty and deprivation** – which is more severe and widely spread compared with other parts of London and England, and further exacerbated by the pandemic and cost of living which have disproportionately impacted communities in north east London
- **Population growth** – significantly greater compared with London and England as well as being concentrated in some of our most deprived and 'underserved' areas
- **Inadequate investment** available for the growth needed in both clinical and care capacity and capital development to meet the needs of our growing population

DRAFT

In January 2023, our integrated care partnership published our first strategy, setting the overall direction for our Joint Forward Plan

Partners in NEL have agreed a **collective ambition** underpinned by a set of **design principles** for improving health, wellbeing and equity.

To achieve our ambition, partners are clear that a radical new approach to how we work as a system is needed. Through broad engagement, including with our health and wellbeing boards, place based partnerships and provider collaboratives we have identified **six cross-cutting themes** which will be key to developing innovative and sustainable services with a greater focus upstream on population health and tackling inequalities.

We know that our people are key to delivering these new ways of working and the success of all aspects of this strategy. This is why supporting, developing and retaining our workforce, as well as increasing local employment opportunities, is one of our four system priorities identified for this strategy.

Stakeholders across the partnership have agreed to focus together on **four priorities as a system.** There are, of course, a range of other areas that we will continue to collaborate on, however, we will ensure there is a particular focus on our system priorities. We have been working with partners to consider how all parts of our system can support improvements in quality and outcomes and reduce health inequalities in these areas.

We recognise that a **well-functioning system** that is able to meet the challenges of today and of future years is built on **sound foundations.** Our strategy therefore also includes an outline of our plans for how we will transform our enabling infrastructure to support better outcomes and a more sustainable system. This includes some of the elements of our new financial strategy which will be fundamental to the delivery of greater value as well as a shift in focus 'upstream'.

Critically we are committed to a relentless focus on equity as a system, embedding it in all that we do.

Both the strategy and this Joint Forward Plan build upon the principles that we have agreed as London ICBs with the Mayor of London

Our integrated care partnership's ambition is to
"Work with and for all the people of north east London
to create meaningful improvements in health, wellbeing and equity."

Improve quality and outcomes	Deepen collaboration	Create value	Secure greater equity

6 Crosscutting Themes underpinning our new ICS approach

- Tackling **Health Inequalities**
- Greater focus on **Prevention**
- Holistic and **Personalised** Care
- **Co-production** with local people
- Creating a **High Trust Environment** that supports integration and collaboration
- Operating as a **Learning System** driven by research and innovation

4 System Priorities for improving quality and outcomes, and tackling health inequalities

- Babies, Children & Young People
- Long Term Conditions
- Mental Health
- Local employment and workforce

Securing the foundations of our system

Improving our **physical** and **digital infrastructure**
Maximising **value** through collective financial stewardship, investing in prevention and innovation, and improving sustainability
Embedding **equity**

DRAFT

The delivery of our Integrated Care Strategy and Joint Forward Plan is the responsibility of a partnership of health and care organisations working collaboratively to serve the people of north east London

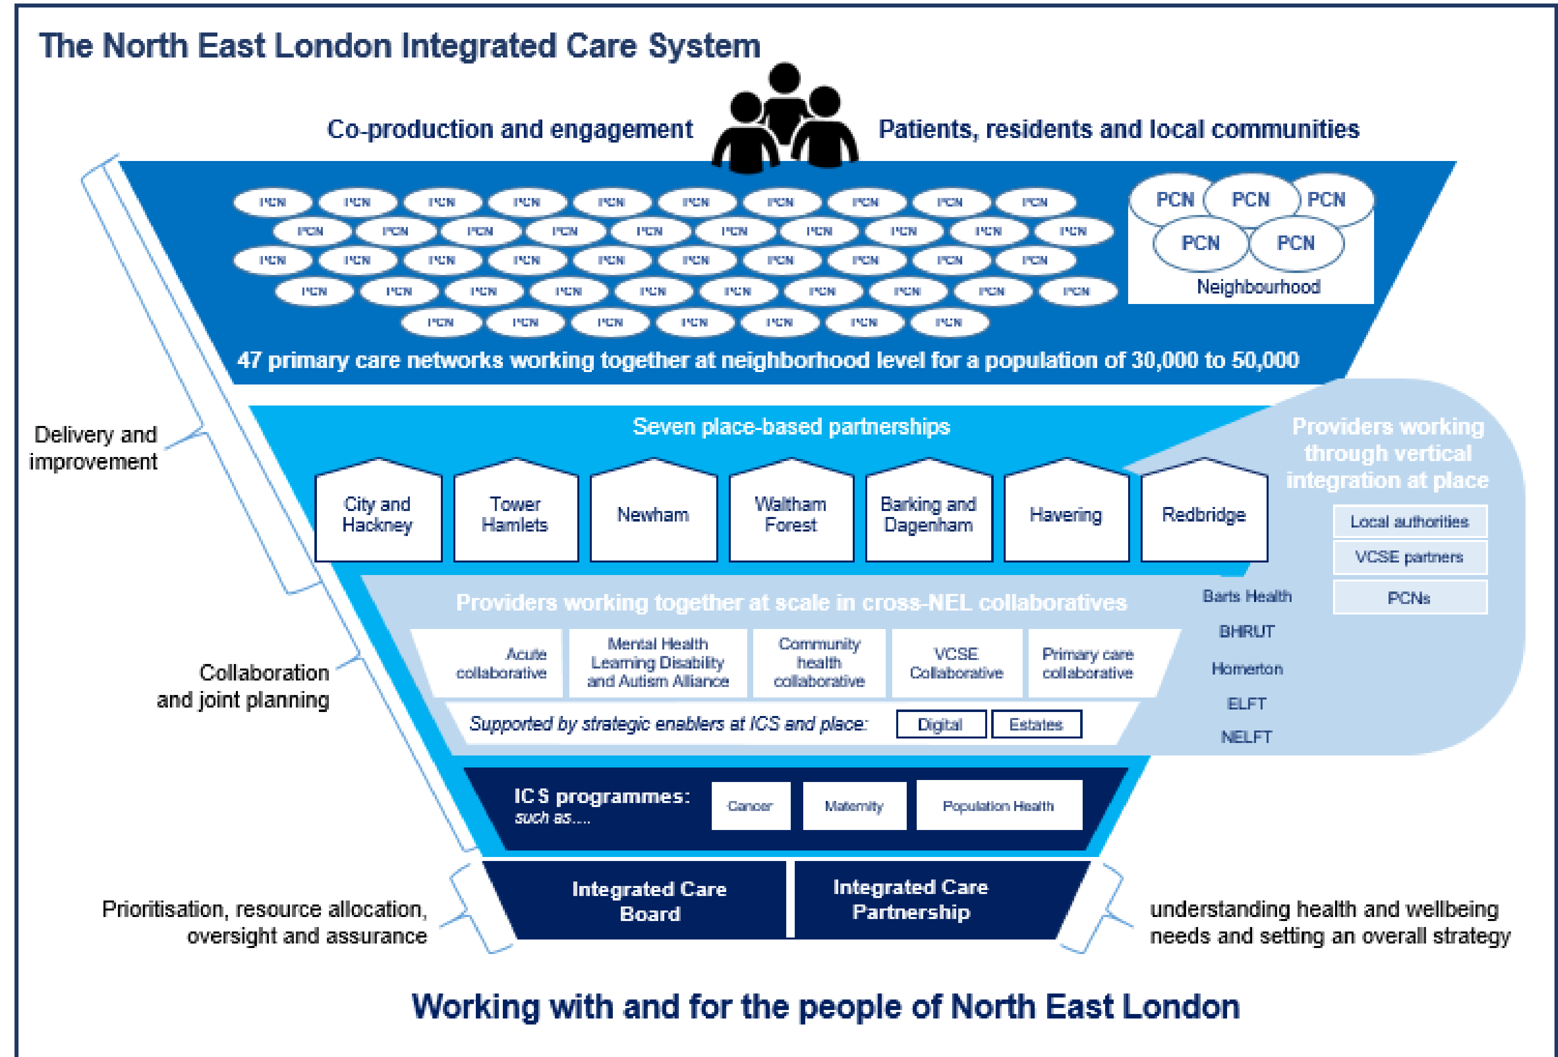
We are a broad partnership, brought together by a single purpose: **to improve health and wellbeing outcomes for the people of north east London**.

Each of our partners have positive impacts on the people of north east London – some providing care, others involved in planning services, and others impacting on wider determinants of health and care, such as housing and education. As we build upon and increase our collaboration and integrated ways of working the opportunity for greater impact will increase.

Our partnership between local people and communities, the NHS, local authorities and the voluntary and community sector, is uniquely positioned to improve all aspects of health and care including the wider determinants.

With hundreds of health and care organisations serving more than two million local people, we have to make sure that we are utilising each to the fullest and ensure that work is done, and decisions are made, at the most appropriate level.

Groups of partners coming together within partnerships are crucial building blocks for how we will deliver. Together they play critical roles in driving the improvement of health, wellbeing, and equality for all people living in north east London.



DRAFT

2. Our unique population

DRAFT

Understanding our unique population is key to addressing our challenges and capitalising on opportunities

NEL is a diverse, vibrant and thriving part of London with a rapidly growing population of over two million people, living across seven boroughs and the City of London. It is rich in history, culture and deep-rooted connections with huge community assets, resilience and strengths. Despite this, local people experience significant health inequalities. An understanding of our population is a key part of addressing this.

Rich diversity

NEL is made up of many different communities and cultures. Just over half (53%) of our population are from ethnic minority backgrounds.

Our diversity means a 'one size fits all' approach will not work for local people and communities, but there is a huge opportunity to draw on a diverse range of community assets and strengths.

Young, densely populated and growing rapidly

There are currently just over two million residents in NEL and an additional 300,000 will be living here by 2040.

We currently have a large working age population, with high rates of unemployment and self-employment. A third of our population has a long term condition. Growth projections suggest our population is changing, with large increases in older people over the coming decades.

Poverty, deprivation and the wider determinants of health

Nearly a quarter of NEL people live in one of the most deprived 20% of areas in England. Many children in NEL are growing up in low income households (up to a quarter in several of our places).

Poverty and deprivation are key determinants of health and the current cost of living pressures are increasing the urgency of the challenge.

Stark health inequalities

There are significant inequalities within and between our communities in NEL. Our population has worse health outcomes than the rest of the country across many key indicators. Health inequalities are linked to wider social and economic inequalities, including poverty and ethnicity.

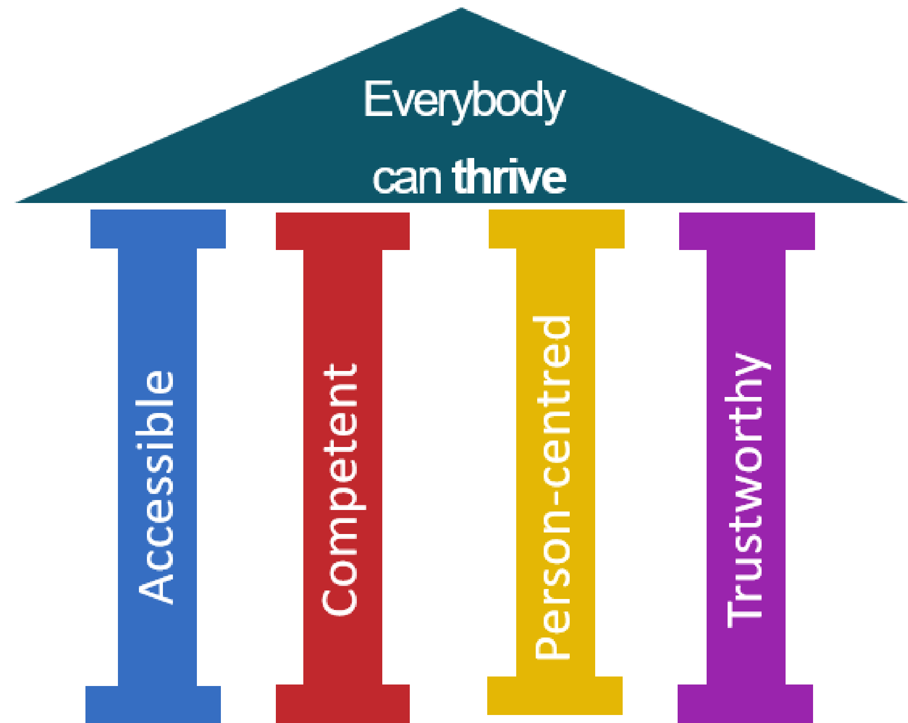
Our population has been disproportionately impacted by the pandemic and recent cost of living increase.

DRAFT

Engaging our residents across NEL about their health, care and wellbeing

We are committed to our '*Working with people and communities'* strategy, working with local people and those who use our services to identify priorities and the criteria against which we will monitor and evaluate our impact.

What does good care look like?



Over summer 2023 we engaged with around 2000 people, including an online survey, face to face community events and targeted focus groups including with Turkish mothers in Hackney, South Asian men in Newham and Tower Hamlets, Black African and Caribbean men in Hackney, older people in the City of London, patients with Long Covid in Hackney, men in Barking and Dagenham, Deaf BSL users in Redbridge, young people in Barking and Dagenham and Pakistani women in Waltham Forest.

What we've heard people would like to see more of and what they believe makes a difference can be summarised as: **Good care.**

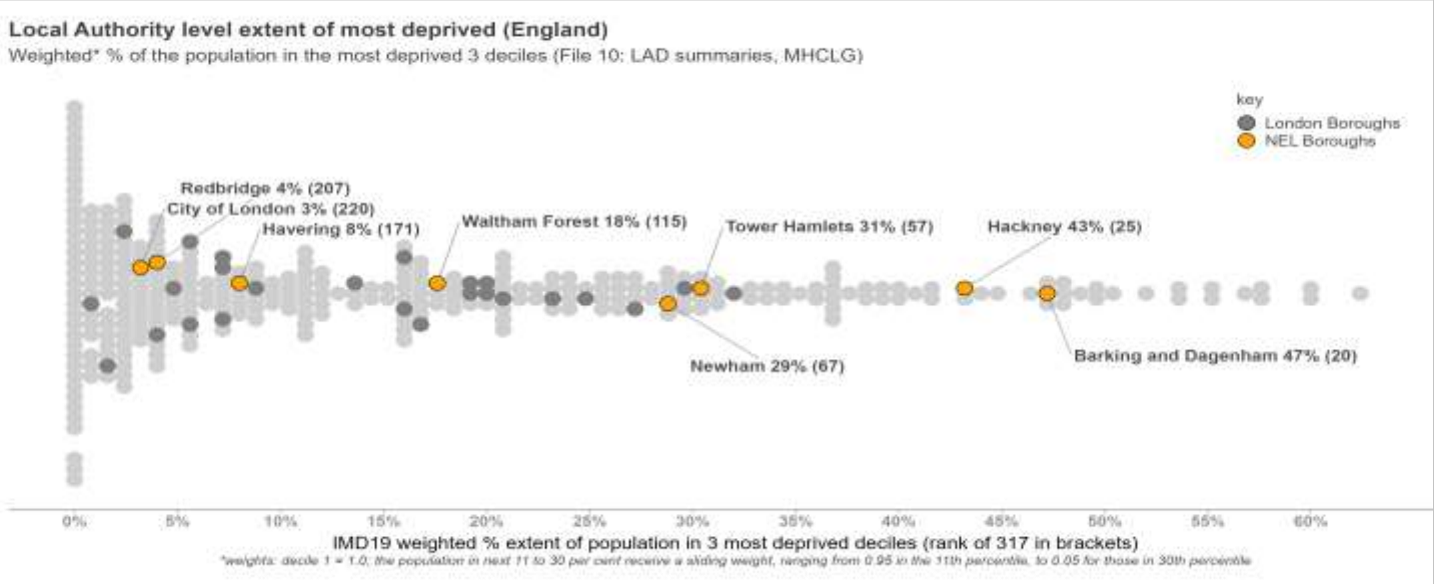
We will use these pillars to help us to understand whether we are making a difference to health and wellbeing outcomes.

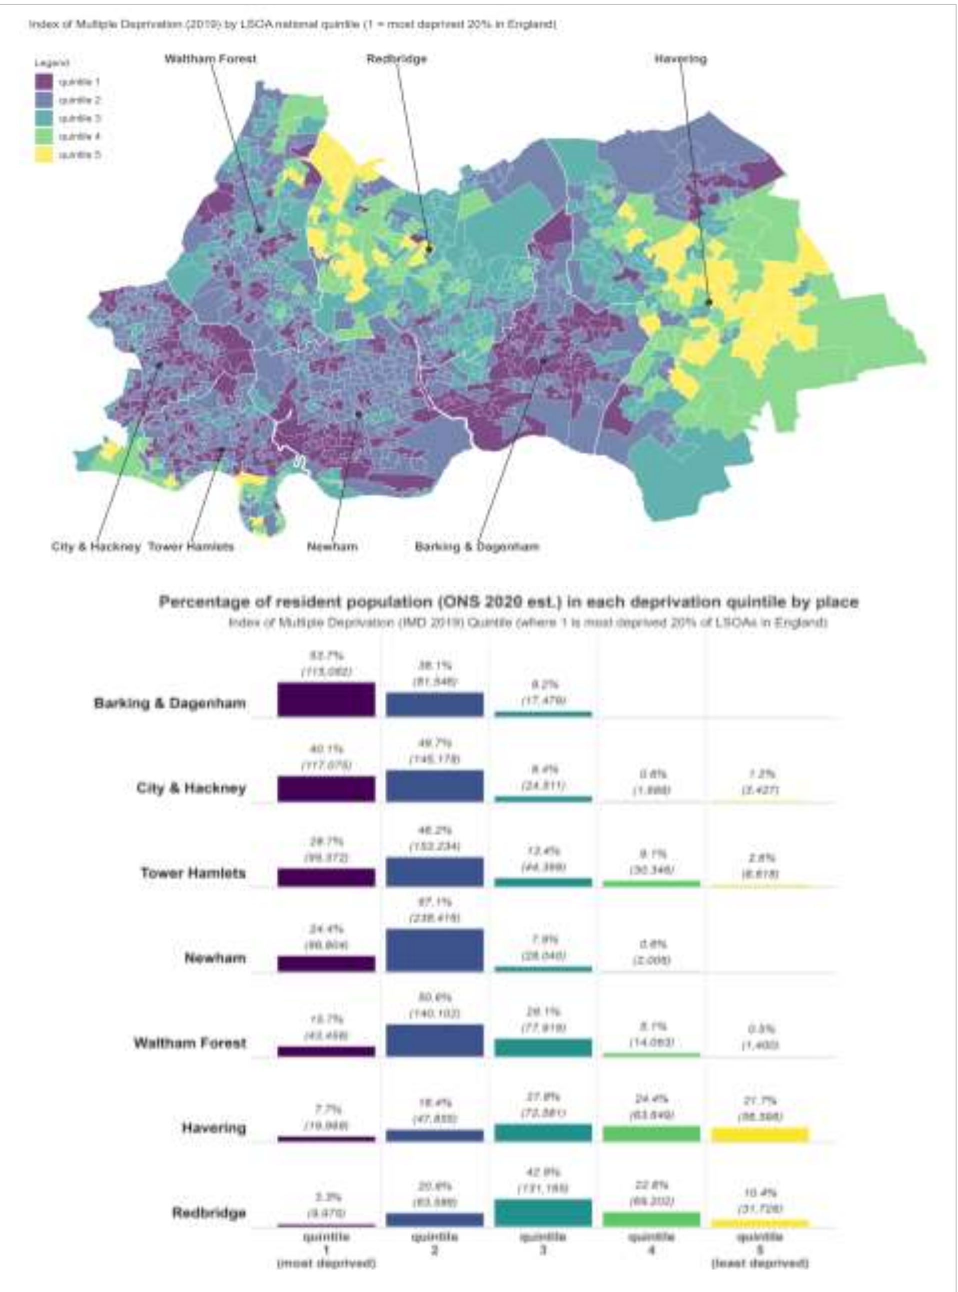
DRAFT

Key factors affecting the health of our population and driving inequalities - poverty, deprivation and ethnicity

Large proportions of our population live in some of the most deprived areas nationally. NEL has four of the top six most deprived Borough populations in London, and some of the highest in the country, with Hackney and Baking and Dagenham in the top twenty-five of 377 local authorities (chart below).

By deprivation quintile, Barking and Dagenham (54%), City and Hackney (40%), Newham (25%) and Tower Hamlets (29%), have between a quarter and more than half of their population living in the most deprived 20% of areas in England (map and chart right).





People living in deprived neighbourhoods, and from certain ethnic backgrounds, are more likely to have a long term condition and to suffer more severe symptoms. For example, the poorest people in our communities have a 60% higher prevalence of long term conditions than the wealthiest along with 30% higher severity of disease. People of South Asian ethnic origin are at greater risk of developing Type 2 Diabetes and cardiovascular disease, and people with an African or Caribbean family background are at greater risk of sickle cell disease.

DRAFT

To meet the needs of our population we need a much greater focus on prevention, addressing unmet need and tackling health inequalities

Child Obesity

Nearly 10% of year 6 children in Barking and Dagenham are severely obese. Nearly are third of children are obese (the highest prevalence rate in London).

NEL also has a higher proportion of adults who are physically inactive compared to London and England.

Mental Health

It is estimated that nearly a quarter of adults in NEL suffer with depression or anxiety, yet QOF diagnosed prevalence is around 9%. Whilst the number of MH related attendances has decreased in 22/23, the number of A&E attendances with MH presentation waiting over 12 hours shows an increasing trend, increasing pressure on UEC services.

Tobacco

One in 20 pregnant women smokes at time of delivery. Smoking prevalence, as identified by the GP survey, is higher than the England average in most NEL places. In the same survey, NEL has the lowest 'quit smoking' levels in England.

Premature CVD mortality

In NEL there is a very clear association between premature mortality from CVD and levels of deprivation. The most deprived areas have more than twice the rate of premature deaths compared to the least deprived areas. 2021/22 figures showed for every 1 unit increase in deprivation, the premature mortality rate increases by approximately 11 deaths per 100,000 population.

Vulnerable housing

NEL has higher numbers of vulnerably housed and homeless people, including refugee and asylum seekers, compared to both London and England. At the end of September 2022, 11,741 households in NEL were in council arranged temporary accommodation. This is a rate of 23 households per thousand compared to 16 per thousand in London and 4 per thousand in England as a whole.

Homelessness

Shelter estimates in 2022 there were 42,399 homeless individuals in NEL inc. those in temp accommodation, hostels, rough sleeping and in social services accommodation. That's 1 in 47 people, compared to 1 in 208 people across England and 1 in 58 in London. People experiencing homeless have worse health outcomes & face extremely elevated disease and mortality risks which are eight to twelve times higher than the general population.

Childhood Poverty

Five NEL boroughs have the highest proportion of children living in low income families in London. In 2020/21, 98,332 of NEL young people were living in low-income families, equating to 32% of London's young people living in low-income families. Since 2014 the proportion of children living in low income families is increasing faster in NEL than the England average.

Childhood Vaccinations

The NEL average rate of uptake for ALL infant and early years vaccinations is lower than both the London and the England rates
There are particular challenges in some communities/parts within Hackney, Redbridge, Newham and B&D, where rates are very low with some small areas where coverage is less than 20% of the eligible population.

There is clear indication of unmet need across our communities in NEL

- For many conditions there are low recorded prevalence rates, while at the same time most NEL places have a higher Standardised Mortality Ratio for those under 75 (SMR<75) – a measure of premature deaths in a population – compared to the England average. Whilst some of this may be due to the age profile of our population, there may be significant unmet health and care need in our communities that is not being identified, or effectively met, by our current service offers.
- Analysis of DNAs (people not attending a booked health appointment) in NEL has shown these are more common among particular groups. For example, at Whipps Cross Hospital, DNAs are highest among people living in deprived areas and among young black men. Further work is now happening to understand how we can better support these groups and understand the barriers to people attending appointments across the system.

DRAFT

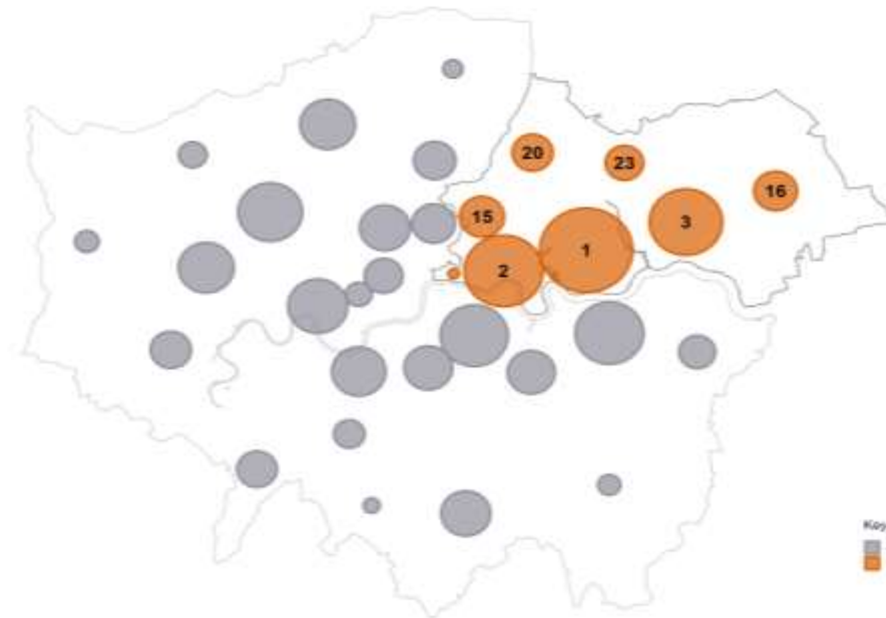
Our population is not static – we expect it to grow by over 300,000 in the coming years, significantly increasing demand for local health and care services

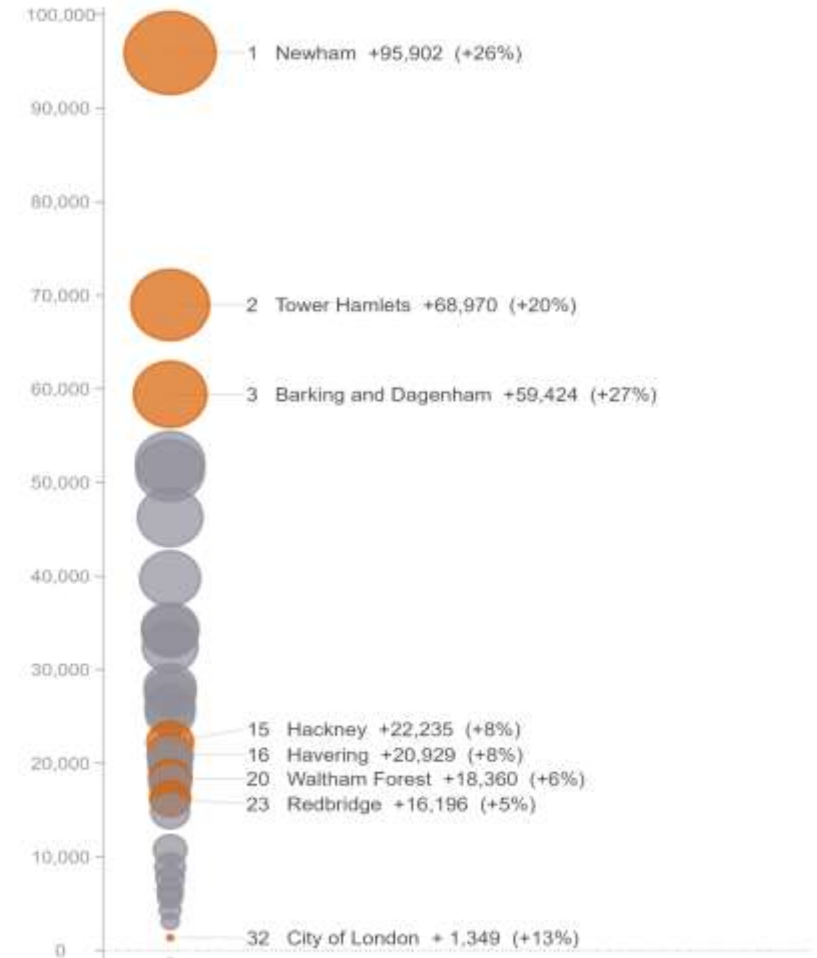
The population of north east London (currently just over 2 million) is projected to increase by almost 15% (or 300k people) between 2023 and 2040. This is equivalent to adding a whole new borough to the ICS, and is by far the largest population increase in London.

The majority of NEL's population growth during 2023-2040 will occur within three boroughs: Barking and Dagenham (27%), Newham (26.3%) and Tower Hamlets (20.3%), all of which are currently home to some of the most deprived communities in London/England.

ICS	Increase in population 2023-2040
NEL	+303,365
SEL	+175,292
NWL	+169,344
NCL	+115,801
SWL	+90,220

In addition, the age profile of our population is set to change in the coming years. Our population now is relatively young, however, some of our boroughs will see high increases in the number of older people as well as increasing complexity in overall health and care needs.



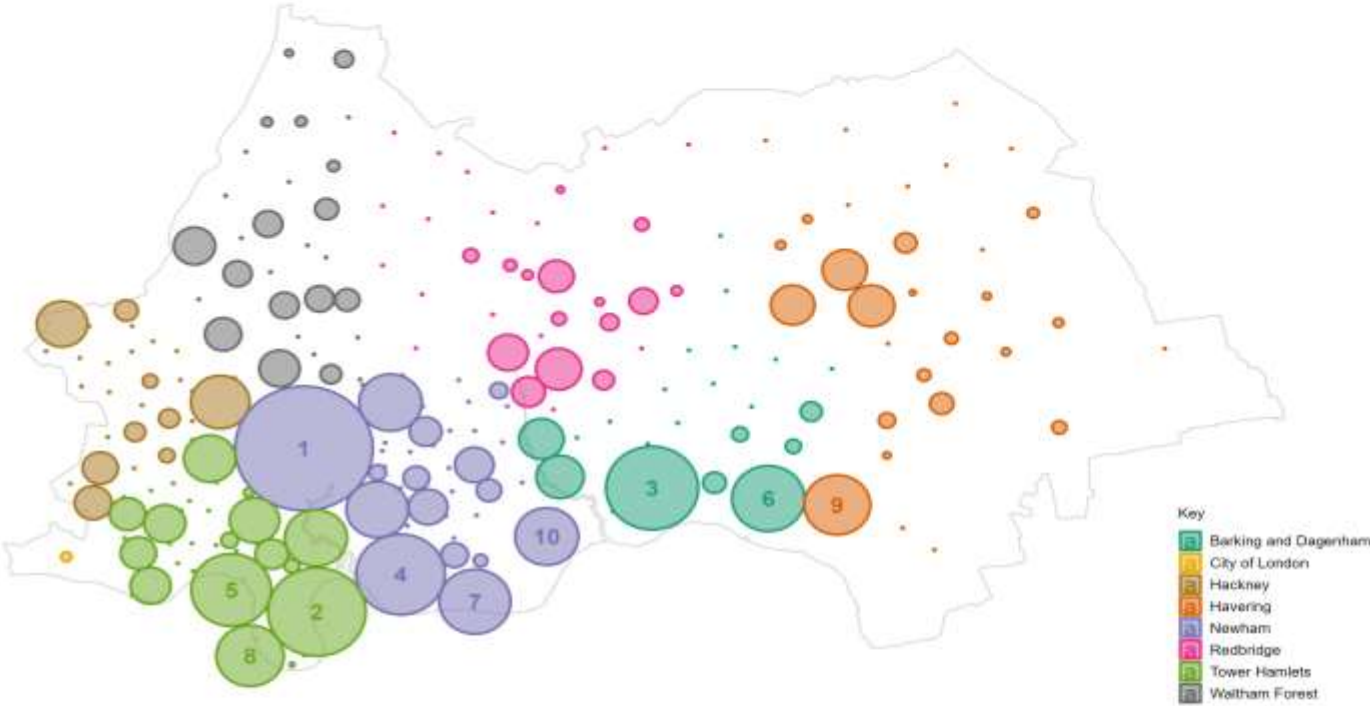


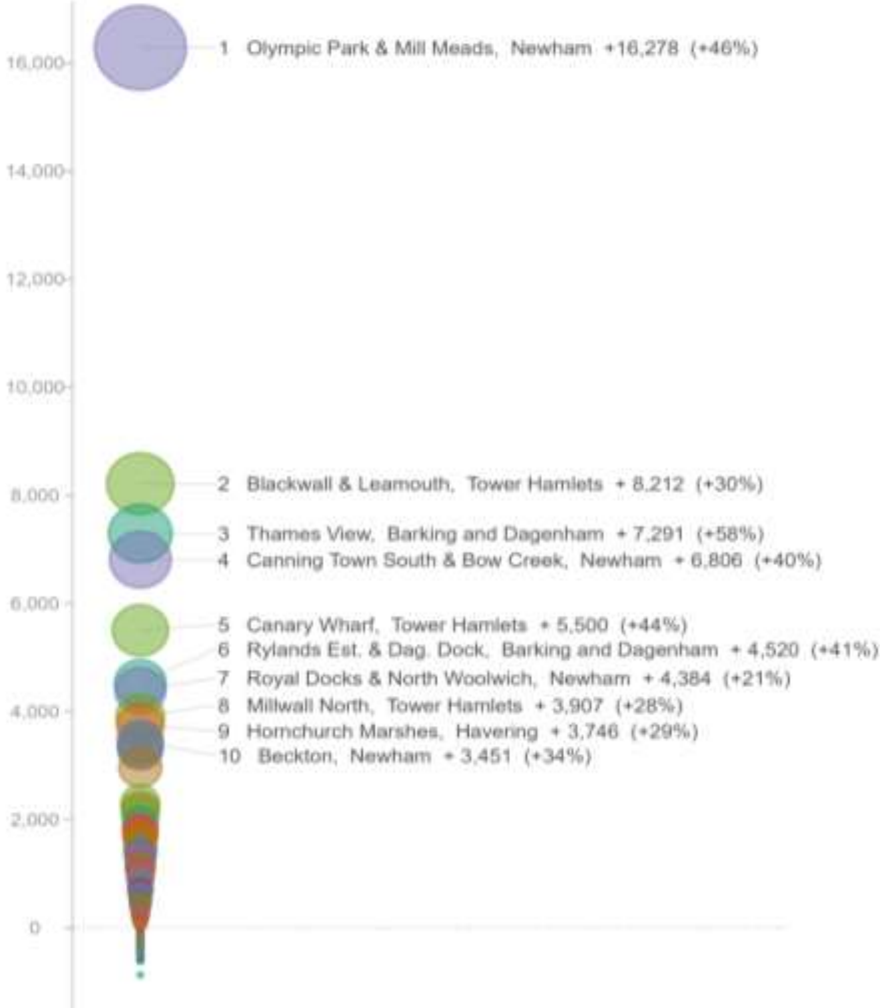
DRAFT

We need to act urgently to improve population health and address the impact of population growth

Across NEL the population is expected to increase by 5% (or 100k people) over the five years of this plan (2023-2028). Our largest increases are in the south of the ICS, in areas with new housing developments such as the Olympic Park in Newham, around Canary Wharf on the Isle of Dogs, and Thames View in Barking and Dagenham.

Sustaining core services for our rapidly growing population will require a systematic focus on prevention and innovation as well as increased longer term investment in our health and care infrastructure.





DRAFT

3. Our assets

DRAFT

We have significant assets to draw on

North east London (NEL) has a growing population of over two million people and is a vibrant, diverse and distinctive area of London, steeped in history and culture. The 2012 Olympics were a catalyst for regeneration across Stratford and the surrounding area, bringing a new lease of life and enhancing the reputation of this exciting part of London. This has brought with it an increase in new housing developments and improved transport infrastructure and amenities. Additionally, the area is benefiting from investment in health and care facilities with a world class life sciences centre in development at Whitechapel. There are also plans for the Whipps Cross Hospital redevelopment and for a new health and wellbeing hub on the site of St George's Hospital in Havering, making it an exciting time to live and work in north east London.

Our assets

- **The people of north east London** – bring vibrancy and diversity, form the bedrock of our partnership, participating in our decisions and co-producing our work. They are also our workforce, provide billions of hours of care and support to each other and know best how to deliver services in ways which work for them.

- **Research and innovation** – continuously improving, learning from international best practice and undertaking from our own research and pilots, and our work with higher education and academia partners, to evidence what works for our diverse communities/groups. We want to build on this work, strengthen what we have learnt, to provide world-class services that will enhance our communities for the future.

- **Leadership** – our system benefits from a diverse and talented group of clinical and professional leaders who ensure we learn from, and implement, the best examples of how to do things, and innovate, using data and evidence in order to continually improve. Strong clinical leadership is essential to lead communities, to support us in considering the difficult decisions we need to make about how we use our limited resources, and help set priorities that everyone in NEL is aligned to. Overall our ICS will benefit from integrated leadership, spanning senior leaders to front line staff, who know how to make things happen, the CVS who bring invaluable perspectives from ground level, and local people who know best how to do things in a way which will have real impact on people.

- **Financial resources** – we spend nearly £4bn on health services in NEL. Across our public sector partners in north east London, including local authorities, schools and the police, there is around £3bn more. By thinking about how we use these resources together, in ways which most effectively support the objectives we want to achieve at all levels of the system, we can ensure they are spent more effectively, and in particular, in ways which improve outcomes and reduce inequality in a sustainable way.

- **Primary care** - is the bedrock of our health system and we will support primary care leaders to ensure we have a multi-disciplinary workforce, which is responsive and proactive to local population needs and focused on increasing quality, as well as supported by our partners to improve outcomes for local people.

DRAFT

Our health and care workforce is our greatest asset

Our health and care workforce is the linchpin of our system and central to every aspect of our new Integrated Care Strategy and Joint Forward Plan. We want staff to work more closely across organisations, collaborating and learning from each other, so that all of our practice can meet the standards of the best. By working in multi-disciplinary teams, the needs of local people, not the way organisations work, will be key. Where necessary, our workforce will step outside organisational boundaries to deliver services closer to communities.

Our staff will be able to serve the population of NEL most effectively if they are treated fairly, and are representative of our local communities at all levels in our organisations. Many of our staff come from our places already and we want to increase this further.

Our workforce is critical to transforming and delivering the new models of care we will need to meet rising demand from a population that is growing rapidly, with ever more complex health and care needs. We must ensure that our workforce has access to the right support to develop the skills needed to deliver the health and care services of the future, and to adapt to new ways of working, and, potentially, new roles. AI and digitalisation will play a major role in determining our workforce needs over the next ten years.

Our ICS People and Culture Strategy will ensure there is a system wide plan to underpin the delivery of our new Integrated Care Strategy and Joint Forward Plan, through adopting a joined up 'One Workforce for NEL Health and Social Care' across the system that will work in new ways, across organisational boundaries and be seamlessly deployed for the delivery of health and care priorities. The strategy will focus on increasing support for our current and potential workforce through the implementation of inclusive retention and health and well-being strategies, and creating innovative, flexible and redesigned heath and care careers.

It will ensure right enablers at System, Place, Neighbourhood and in our provider collaboratives, to strengthen the behaviours and values that support greater integration, and collaboration across teams, organisations and sectors. It will contribute to the social and economic development of our local population through upskilling and employing under-represented groups from our local people, through creating innovative new roles, values-based recruitment and locally-tailored, inclusive supply and attraction strategies in collaboration with education providers.

There are almost one hundred thousand people working in health and care in NEL, and our employed workforce is growing every year.

Our workforce includes:

- Over 5,600 people working in general practice (Aug 23)
- 47,638 people working in our Trusts (Aug 23)
- 46,000 people working in adult social care including the independent sector (22/23)
- These are supported by a voluntary sector workforce roughly estimated at over 30,000

DRAFT

There are opportunities to realise from closer working between health, social care and the voluntary and community sector

Voluntary, Community, and Social Enterprise (VCSE) organisations are essential to the planning of care and to supporting a greater shift towards prevention and self-care. They work closely with local communities and are key system transformation, innovation and integration partners.

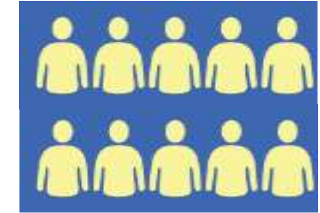
In NEL we are supporting the development of a VCSE Collaborative to create the enabling infrastructure and support sustainability of our rich and diverse VCSE in NEL, also ensuring that the contribution of the VCSE is valued equally.

Social care plays a crucial role in improving the overall health and well-being of local people including those who are service users and patients in north east London. Social care promotes people's wellbeing and supports them to live independently, staying well and safe, and it includes the provision of support and assistance to individuals who have difficulty carrying out their day-to-day activities due to physical, mental, or social limitations. It can therefore help to prevent hospital admissions and reduce the length of hospital stays. This is particularly important for elderly patients and those with chronic conditions, who may require long-term social care support to maintain their independence and quality of life.

In north east London 75% of elective patients discharged to a care home have a length of stay that is over 20 days (this compares to 33% for the median London ICS).

The **work of local authorities more broadly, including their public health teams,** as well as education, housing and economic development, work to address the wider determinants of health such as poverty, social isolation and poor housing conditions. As described above, these are significant challenges in north east London, critical to addressing health and wellbeing outcomes and inequalities.

In our strategy engagement we heard of the desire to accelerate integration across all parts of our system to support better access, experience and outcomes for local people. We heard about the opportunities to support greater multidisciplinary working and training, the practical arrangements that need to be in place to support greater integration, including access to shared data, and the importance of creating a high trust and value-based environment which encourages and supports collaboration and integration.



There are **more than 1,300 charities operating across north east London**, many either directly involved in health and care or in areas we know have a significant impact on the health and wellbeing of our local people, such as reducing social isolation and loneliness, which is particularly important for people who are vulnerable and/or elderly.

Thousands of informal carers play a pivotal role in our communities across NEL, supporting family and friends in their care, including enabling them to live independently.

DRAFT

4. Our challenges and opportunities

DRAFT

The key challenges facing our health and care services

Partners in NEL are clear that we need a **radical new approach to how we work as an integrated care system** to tackle the challenges we face today as well as securing our sustainability for the future. Our Integrated Care Strategy highlights that a shift in focus upstream will be critical for improving the health of our population and tackling inequalities. The health of our population is at risk of worsening over time without more effective **prevention** and **closer working with partners** who directly or indirectly have a significant impact on healthcare and the health and wellbeing of local people, such as local authority partners and VCSE organisations.

Two of the most pressing and visible challenges our system faces today, which we must continue to focus on, are the long waits for accessing **same day urgent care;** and a large backlog of patients waiting for **planned care**. Provision of urgent care in NEL is more resource intensive and expensive than it needs to be and the backlog for planned care, which grew substantially during Covid, is not yet coming down, as productivity levels are only just returning to pre-pandemic levels. Both areas reflect pressures in other parts of the system, and have knock-on impacts.

The wider determinants of health are also key challenges that contribute to challenges. Most of our places we have seen unemployment rise during the pandemic, although this number is dropping, and we still have populations who remain unemployed or inactive.

We currently have a **blend of health and care provision for our population that is unaffordable**, with a significant underlying deficit across health and care providers (in excess of £100m going into 23/24). If we simply do more of the same, as our population grows, our financial position will worsen further and we will not be able to invest in the prevention we need to support sustainability of our system.

To address these challenges and enable a greater focus upstream, it is necessary to focus on **improving primary and community care services**, as these are the first points of contact for patients and can help to prevent hospital admissions and reduce the burden on acute care services. This means investing in resources and infrastructure to support primary care providers, including better technology, training and development for healthcare professionals, and better integration of primary care with community services. In addition, there is a need for better management and **support for those with long-term conditions** (almost a third of our population in NEL). People with LTCs are often high users of healthcare services and may require complex and ongoing care. This can include initiatives such as care coordination, case management, and self-management support, which can help to improve the quality of care, prevent acute exacerbation of a condition and reduce costs.

Achieving this will require our workforce to grow. This is a key challenge, with high numbers of vacancies across NEL, staff turnover of around 23% and staff reporting burnout, particularly since the COVID-19 pandemic.

The following slides describe these core challenges and potential opportunities in more detail. Where possible we have taken a population health approach, considering how our population uses the many different parts of our health and care system and why. More work is required to build this fuller picture (including through a linked dataset) and this forms part of our development work as a system.

DRAFT

Urgent and emergency Care including Transformation - is a system priority following the publication of the National UEC Recovery Plan

Key challenges	*Detail*
Nationally demand for urgent and emergency care continues to grow post Covid-19. Across NEL we have planned for a 2% growth in UEC demand	• Patients are presenting with more complex conditions. • Since the pandemic the increase in complexity and acuity is having knock-on impacts across the urgent and emergency care pathway, this includes ambulance call-outs, ambulance handovers, A&E 4 hour performance and length of stays
Longer term trends point to an increasing need for health and care	• Outside of the immediate challenges presented post pandemic we are facing a growth in demand due to: • 1) population growth, • 2) an ageing population, and; • 3) greater numbers of people living with long term conditions.
Occupancy levels for our general and acute hospitals continues to be a challenge – especially during the winter	• High bed occupancy is a key driver for increased pressure across urgent and emergency care services. In NEL our bed occupancy has seen an increasing trend in the last 8 weeks. When our hospitals are full it is harder to find free beds for patients that need to be admitted. • Higher occupancy coupled with longer lengths of stay also results in challenges in discharging patients back into their own homes or their communities. Across NEL an average of 10.79% of our G&A hospital beds are occupied by patients that are medically fit for discharge
Increasing demand and length of stay on emergency mental health services	• Long waits for people with mental health needs in A&E are increasing. 36.8% of A&E mental health attendances were waiting over 12 hours. This is an uptrend in the last QR across NEL

DRAFT

We have a large backlog of people waiting for planned care

Key messages	***Detail***
Demand for elective care is growing, adding to a large existing backlog	• Demand for planned care is expected to grow by 19.7% between 2022/23 and 2027/28, or by around 4% per year. • There are currently around 174,000 people waiting for elective care As of December 2022, 18 people had been waiting longer than 104 weeks, 843 longer than 78 weeks and 8,646 longer than 52 weeks.
Activity levels vary week on week for many reasons and we haven't yet seen consistent week on week improvements in the total waiting list size	• The 'breakeven' point for NEL's waiting list (neither increasing nor decreasing) requires an activity level of 4,281 per week*. This breakeven point is expected to increase by around 4% per year due to projected increases in demand. • Activity levels vary throughout the year. For instance, in Sept-Dec 2022 trusts in NEL were reducing the overall number of waiters by 391 per week, whereas since then the overall number waiting has increased.
There are financial implications from over/under performance on elective care	• We have an opportunity to earn more income (from NHSE) by outperforming activity targets, thereby bringing more money into north east London. If the additional cost of performing that extra activity is below NHSPS unit prices then this also supports our overall financial position.
Tackling the elective backlog is a long-term goal and will require continuous improvements to be made	• A reasonably crude analysis of our elective activity suggests that delivering elective care at the rate of our peak system performance for last year (Sept-Dec 2022) would lead to no one waiting over 18 weeks by September 2027. This timescale would require an uplift in care delivery each year equivalent to expected demand increases (4% per year).
There may be opportunities for improvements in elective care, particularly around LOS	• An analysis of NEL against other London ICSs indicates that moving to the median LOS for elective admissions would reduce bed days by 13% and moving to the England median would reduce bed days by 31% (comparison excludes day cases).

* Activity calculations are based on assessment of those on waiting list for more than 18 weeks, at end of Feb 2023

DRAFT

We need to expand and improve primary care, including improving the way care is coordinated

- North-east London currently has fewer GP appointments per 100,000 weighted population than other ICSs in England. The national median is around 8% greater than in NEL, suggesting part of the cause of pressure on other parts of the system, including greater than expected non-elective admissions at the acute providers, may be due to insufficient primary care capacity.
- Over the year to September 2023, booked general practice appointments across NEL increased by about a third to over 11 million appointments (two thirds face to face and 77% within a week). NEL is on track to meet the operating plan trajectory of 1 million appointments by March 2024, this is a 3% increase of appointments on the previous year, taking population growth into account
- 47% of appointments were delivered by other professionals such as nurses and 44% of all appointments were seen on the same day as they were booked*. This figure includes both planned and reactive care. 57% of appointments were patient-initiated contacts, booked and seen on the same day.***
- There is wide variation in the number of delivered appointments or average clinical care encounters per week in NEL. For 2022/23 this ranges from 93.56 per 1000 (weighted registered) patients in Tower Hamlets, to 68.01 per 1000 (weighted registered) patients in Havering. The NEL average is 77.78 per 1000 (weighted registered) patients.**
- We are developing processes and technology to streamline patient access to the most appropriate type of appointment and advice, with clear signposting, for health care professionals and local people to ensure they are directed to the full range of services available at Practice and Place, in and out of general practice hours.
- Without substantial increases in primary care staffing the GP to patient ratio will worsen as demand for primary care increases in line with projected population growth. There are pockets of workforce shortages with significant variation in approaches to training, education and recruitment. We are focusing upon initiatives to keep our staff such as mentoring and portfolio careers having developed SPIN (specialised Portfolio innovation) which is the basis for the national fellowship programme which we are offering to GPs and other professional groups.
- There are opportunities to build on our best practice to further develop integrated neighbourhood teams, based on MDTs, social prescribing and use of community pharmacy consultation services, which will strengthen both our continuity of care of long term conditions and our ability to work preventatively.

Primary Care Networks (PCNs)

- Primary networks bring together GPs and other primary care professionals in small local areas to work together. They will work with new Integrated Neighbourhood Teams (INTs) to deliver joined up care based on individual and local needs.
- PCNs will be used to improves access, focus on preventative interventions, support personalised care, health education and harness wider community services through collaboration and navigation
- PCNs will involve practices and federations, social care, community health services, mental health survives, pharmacy, care homes links to hospitals and voluntary/community organisations.

Source(s): *GPAD, **Discovery, ***Edenbridge APEX

DRAFT

Develop and build upon our community care resources

- Community care in north east London is currently fragmented, with four core provider trusts and over 65 other providers offering an array of community services. More work is required to understand the impact this has on patient outcomes and variability across NEL's places, but we know that for pulmonary rehab, for example, there is variation in service inclusion criteria and the staffing models used, and that waiting times vary between 35 and 172 days, with completion rates between 36% and 72% across our places and services.

- There are significant opportunities and synergies to improve community pathways given the co dependencies with neighborhood teams, long term conditions, planned care , primary care and UEC. Community services are key to optimizing admission avoidance and discharge but a resource shift is required to enhance preventative and community pathways

- More children and young people are on community waiting lists in NEL than any other ICS (NEL is about average, across England, for the number of people on adult community waiting lists). Particular challenges are SALT, community pediatrics and neurodiversity pathways

- Our adult waiting lists are very pressured , particularly regarding MSK pathways, SALT, podiatry and dietetics

- Identifying and understanding the areas of greatest population and community need will provide a basis for community health care leads to support a joint planning approach. Allowing for agreement on priority areas under the context of service pressures. Approaching community health care in a targeted way and focusing on those areas of greatest need will also support reducing variance in services across the NEL system

- There is a need for a clear and current overview of community health services across the system and places. Linked to also being able to monitor the outcomes for residents of those services and the resources utilized, this will ensure that the NEL system is able to make the most efficient use of those community health services for the population.

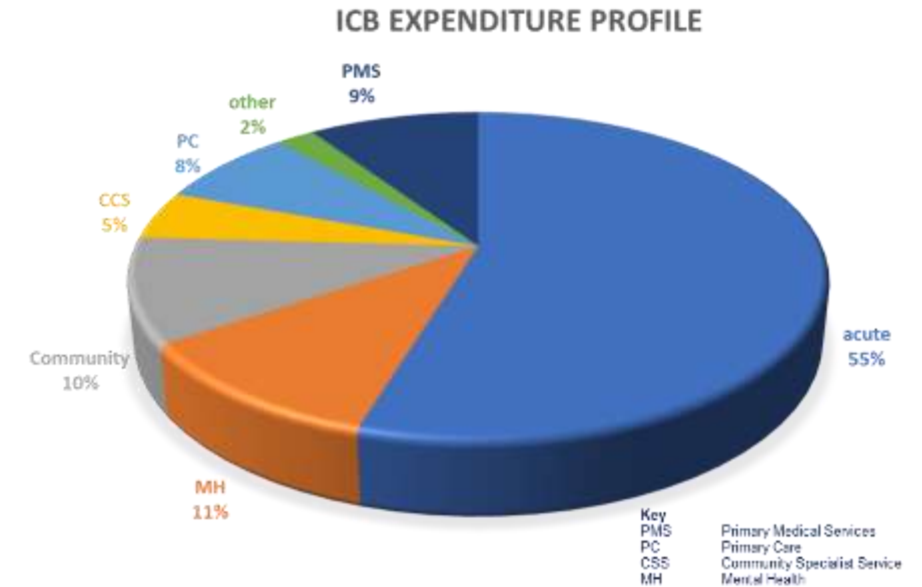
- Improvement networks give us an opportunity to bring together best practice, jointly work on solutions that are led by clinicians and subject matter experts, in partnership with our users and carers. This approach will ensure equitable and consistent pathways, that are delivered locally and tailored to meet local population needs.

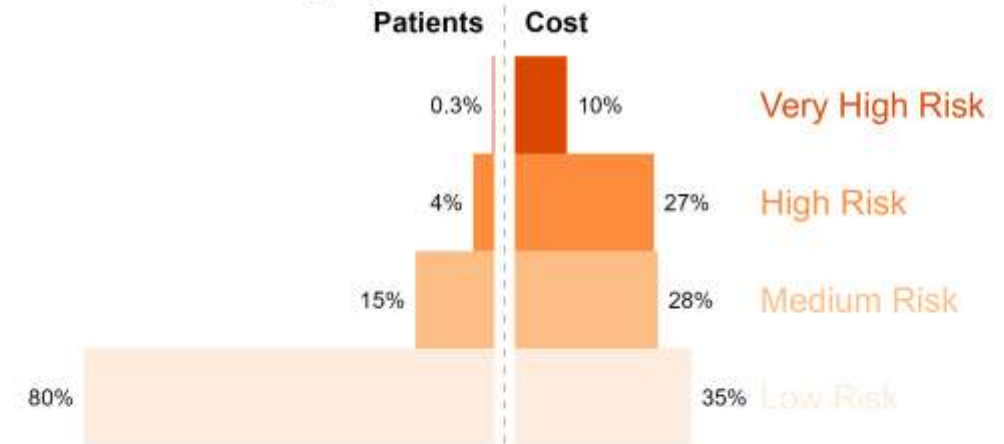
Source(s): *GPAD, **Discovery, ***Edenbridge APEX

DRAFT

We need to move away from the current blend of care provision which is unaffordable

- The system has a significant underlying financial deficit, held within the Trusts and the ICB. Going into 2023/24 this is estimated to be in excess of £100m. This is due to a number of issues, including unfunded cost pressures.
- The system has therefore developed a financial recovery plan, which if delivered would result in a £31m deficit in 23/24.
- Current plans to improve the financial position, such as productivity/cost improvement programmes within the Trusts, are expected to close some of this financial gap and we know there are opportunities for reducing unnecessary costs, such as agency spend. The system is also looking at a range of further measures designed to improve the underlying run rate.
- In addition to a financial gap for the system overall, there are discrepancies between how much is spent (taking into account a needs-weighted population) across our places, in particular with regard to the proportion spent on out of hospital care.
- The system receives a very limited capital budget in 23/24 of £95m, significantly less than other London ICSs (which receive between £130m-£233m) and comparable to systems with populations half the size of NEL*. This puts significant pressure on the system and its ability to transform services, as well as maintain quality estate. In 24/25 the estimated budget is £86m.
- There is huge variation in the public health grant received by each of NEL's local authorities from central government. The variation is at odds with the government's intended formula (which is based on SMR<75) and is the result of grants largely being based on historical public health spend. This impacts on our ability to invest upstream in preventative services.
- As a system the majority of our spend is on more acute care and we know that this is driven by particular populations (0.3% of the population account for 10% of costs associated with emergency admissions; just under 20% account for 65%).





* Capital figures are based on 2022/23. Norfolk and Waveney ICB received £98.5m capital in 22/23 and has a population of 1.1m people

DRAFT

We are making progress – Our successes

Examples of transformation we have driven within existing resources

Cardiovascular Disease:

NEL ICS is the top ranking 1st in England in key Cardiovascular disease outcomes including management of hypertension, atrial fibrillation, chronic kidney disease, heart disease and stroke, and people at high CVD risk.

Long Term Conditions:

The Non-Invasive Ventilation (NIV) Service, which went live in April 22, has been put in place for the management of chronic hypercapnic respiratory failure (CHRF). Previously the service was only available through Tertiary institutions however will now be delivered locally by BHRUT to patients at home.

Children's LTCs:

City and Hackney practices have led the development of Long term conditions (LTC) integrated management with 80% of eligible children receiving an annual review with personalised care plan, 65% of children with diabetes, sickle cell and epilepsy receiving an annual care contact from their practice.

Elective Services:

We have an established planned care recovery and transformation programme. An integrated system programme initially set up in October 2021 to recover the elective backlog and improve equity of access for our population, led by the Acute Provider Collaborative.

ELFT Community Health Services:

Pharmacy input into district nursing teams (HSJ Award category finalist) improved outcomes for both medicines management and medicines optimisation. Delivered via system innovation and new ways of working

First Contact Physiotherapy:

An integrated PCN wide physiotherapy clinic that required the set-up of a cross organisational booking system. Resulting in beneficial patient experience.

Young Peoples Outpatient Services:

Tower Hamlets has established a young people's GP clinic called 'Health Spot' aligned with youth provision rights in order to provide a trusted approachable environment where young people are able to see a doctor, specialist nurse or mental health worker. Supporting them with integrated holistic healthcare, health literacy and empowerment.

Transforming Outpatient Services:

Our GPs can now receive advice directly from a number of specialist consultants, reducing hospital attendance and giving speedy care. In 2022/23 we achieved against the 16% national ask for advice and guidance requests across 2022/23, and for approximately 29% of all outpatient appointments in January.

DRAFT

Across the system we are transforming how we work, enhancing productivity and shifting to a greater focus on prevention and earlier intervention

- The previous section set out the challenges that the north east London health and care system needs to address to succeed in its mission to create meaningful improvements in health and wellbeing for all local people
- North east London's portfolio of transformation programmes has evolved organically over many years: rooted in the legacy CCGs and sub-systems, then across the system through the North East London Commissioning Alliance and the single CCG, and now supplemented by programmes being led by our place partnerships, provider collaboratives, and NHS NEL.
- It has never previously been shaped or managed as a single portfolio, aligned to a single system integrated care strategy.
- As part of moving to this position, this section of the plan baselines the system portfolio with programmes set out according to common descriptors – providing a single view never previously available across the system, with the scale of the investment of money and staff time in transformation clearer than ever before.
- This section sets out how partners across north east London are responding to the challenges described in the previous section. It describes how they are contributing to our system priorities by considering five categories of improvement

1. Our core objectives of high-quality care and a sustainable system

2. Our NEL strategic priorities

3. Our supporting infrastructure

4. Place based Partnerships priorities x7

5. Our cross-cutting programmes

Urgent and emergency care

Portfolio vision, mission and key drivers:
The aim of our portfolio is to improve access to urgent and emergency care for local people that meets their needs and is aligned with the UEC national plan. The portfolio is structured around five strategic system goals: **Prevention** of conditions, **Management** of existing conditions and needs, **Timely intervention** for escalation of needs or new needs and conditions, **Timely and effective return** to community setting following escalation, underpinned by **data, governance, effective pathways and enablers.**
The national and local drivers focus on **increasing capacity**, **growing the workforce**, **speeding up discharge** from hospitals, **expanding new services in the community** and helping people access the **right care first time**.

Key stakeholders:
Place, PCNs, practices, pharmacy, Acute, Community and mental health collaboratives and Urgent and emergency care services. Healthwatch and patient groups.

Key programmes of work that will deliver the vision and mission
The work within the portfolio is mapped against our strategy goals and four outcomes. **1) strengthening provision and access to alternative pathways, 2) optimising flow through hospitals, 3) using population health management to keep people well in the community and 4) setting up governance and pathways to form system wide sustainable plans**.
There are a range of projects to deliver on these outcomes that have been divided into directly managed by UEC portfolio and those sitting in other portfolios.
UEC directly managed – 111 procurement and development, hospital flow, ambulance flow, system co-ordination centre, urgent treatment centres, virtual wards and winter planning.
Other delivery areas such as same day access, urgent community response, mental health pathways and planned care sit in other portfolios but will be monitored and reported to the UEC Board.
Additionally establishing the NEL UEC PMO and governance will provide infrastructure to deliver a measurable impact.

Details of engagement with places, collaboratives and other ICB portfolios
One to ones throughout the summer to understand local strategies and plans to build up the NEL UEC portfolio. Work underway to propose new ways of working and governance structures. Collaboration will be at the heart of the portfolio.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

April 2025:
- System co-ordination centre set up in line with specification
- Reduction in delayed discharges and improvements to A&E performance
- Elimination of ambulance handover waits over 45 minutes
- 111 provider working to a new specification following procurement process
- Expansion and coordination of virtual wards beds

April 2026:
-

April 2027:
-

Engagement with the public:
Engagement activities have taken plan at Place and Trust level which has informed plans and communications – to date there have been NEL UEC patient engagement activities

DRAFT

Community Health Services

Portfolio vision, mission and key drivers:

- Develop a consistent community services offer across NEL
- Improving population health and outcomes, working closely with residents
- Supporting neighbourhoods and PLACEs to enable people to stay well and independent, for as long as possible, wherever they call home
- Creating wider system value by unlocking system productivity gains
- Using evidence to understand the totality of services, outcomes and resources across NEL, identifying opportunities for improved outcomes
- Create and facilitate collaborative partnerships with local authorities, primary care, health providers, and the independent voluntary and charitable sector
- Supporting wider system pressures by maximising CHS opportunities (i.e LAS call outs, UEC attendances, unplanned care, LA residential care pressures)

Key stakeholders:

- 7 PLACEs
- ELFT
- NELFT
- Homerton
- Barts
- 65 plus bespoke providers

Key programmes of work that will deliver the vision and mission

- Leading joint approach to Planning for the first time across NEL
- Coordinating finance discussions across NEL re pressures, risks and priorities
- Developing and evolving Improvement Networks, bringing together subject matter experts and creating a conducive environment to design best practice pathways and consistent offers across NEL
- BCYP Improvement network 15th November
- Rapid Response and Falls Network TBC January '24
- RR and Falls likely to lead to Improvement Network re Community Nursing/integration opportunities across health and social care workforce
- Discussions re MSK pathway in train with Planned Care colleagues
- Aligning with Digital work , Proactive Care, Universal Care Plan, Fuller
- Maximising opportunities for CHS blueprint/integration via Whipps X (WF and RB), St Georges HWB Hub (Havering) and Porters Ave (LBBD)
- Comprehensive CHS Diagnostic planned (to procure Dec '23) giving a bottom up approach from a PLACE perspective, to gain NEL wide understanding of resource, quality outcomes, user and carer experience, cost, workforce across health, local authorities, primary care, VCS

Details of engagement undertaken with places, collaboratives and other ICB portfolios

- Joint planning sessions 1st Nov and 11th Dec (45+ people across PLACEs and providers)
- 121 discussions with Place Directors, core provider leads
- Engagement across collaboratives and programmes (UEC, LTC, BCYP, Planned Care)
- Joint meeting with Primary Care Collab Dec '23

Co dependencies on other programmes

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- Developing Consistent pathways and models for CHS, minimising variances in outcomes and experience
- Maximising opportunities to integrate and avoid duplication

Engagement with the public:

- Patient engagement at an early stage but conversations with Patient experience leads Nov '23 to utilise existing forums
- Well established carer and user infrastructure in BCYP

DRAFT

Primary Care

Portfolio vision, mission and key drivers:
Our vision is for north east London to be a place where you can access consistent high-quality primary care, from a dedicated, motivated and multi-skilled workforce enabling local people to live their healthiest lives
The aim of our portfolio is to deliver on ambitious plans to transform primary care, offering patients with diverse needs a wider choice of personalised, digital-first health services through collaboration with partners across the health and social care and communities. National and local plans place a focus on improving access, prevention, personalisation, tackling inequalities and building trusting environments.
Our local challenges include population growth, deprivation, exacerbating poor physical and mental health and workforce retention and development and a financial challenge urging cost effectiveness and efficiency

Key stakeholders:
Place, PCNs, practices, pharmacy, Acute, Community and mental health collaboratives and Urgent and emergency care services. Healthwatch and patient groups.

Key programmes of work that will deliver the vision and mission
There are a range of programme that make up the primary care portfolio to ensure the delivery of our goals.
Empowering patients - supporting patients to manage own health, stay healthy and access services. Improving access - providing a range of services and assistance to respond to patient needs in a timely manner. Modernising primary care - developing new and digital tools to support highly responsive quality care. Building the workforce - staff recruitment, retainment and develop plans in place to improve job satisfaction and flexibility. Working smarter - reduced workload across primary/secondary services and improvements to sustainable and efficient ways of working. Optimising enablers - estate, workforce and communication plans to support the implementation of our goals.

Integrated Neighbourhood Teams (INT) are pivotal to transforming Primary Care and will be delivered through work responding to the Fuller recommendations. **A framework** will offer a streamlined approach for the delivery by integrating Primary Care, including Pharmacy, Optometry and Dentistry, alongside wider health care, social care and voluntary sector organisations. INTs will facilitate care, through 'teams of teams' approach enabling **continuity of care**. These teams will also be instrumental in broadening the availability of care, providing **extended in and out-of-hours services,** including urgent care. A **single point of contact through advanced cloud-based telephony systems** will streamline access to care, while **improved signage and navigation** will guide patients to the right services.

The Fuller initiatives are accompanied by other enabling programmes. **People**, will bolster the **capacity of the ARRS roles**, **establish training and development opportunities**, and **determine the ideal workforce** for INTs. Infrastructure, including, Estates and Data will align current plans to INT requirements, as well as **Digital First** which aims to improve digital access (including remote consultation), NHS App usage, improving practice efficiency and increasing competence to use digital tools.

Wider programmes which are fully or partly delivered through primary care providers, include, **Pharmacy,** enhancing the role of the community pharmacy to improve access and patient self-management, **Long Term Conditions (LTCs),** including a range of interventions such as case-finding, annual or post-exacerbation reviews for targeted patients, as well as programmes that sit in other collaboratives such as **Personalisation** and **Vaccinations**. Other transformational projects to improve dental and optometry services will be developed in the future as their provider groups mature.

Details of engagement undertaken with places, collaboratives and other ICB portfolios
A number on workshops with collaboratives, places and the UEC/ LTC / digital / workforce programmes.
The portfolio is overseen by a lead for UEC portfolio to strengthen interplay. Working in conjunction with other portfolios is a key improvement area following the deep dive in October
Webinars held for PCNs to promote digital tools

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

April 2025:
- Same day handling of all calls to practices
- All practices transferred to cloud based telephony
- Improvements to NHS app and practices websites and e-Hubs
- All practices offering core and enhanced care for people with LTCs
- Additional services from community pharmacies
- All Places have INTs established for at least one patient cohort

April 2026:
- All practices will be CQC rated as GOOD or have action plans to achieve this further equalisation of enhanced services (IN DEVELOPMENT)

April 2028:
- Streamlined access to a universal same-day care offer, with the right intervention in the right setting and a responsive first point of contact

Engagement with the public: Enhanced access engagement exercise with practices in 2022. London wide digital tools engagement involved NEL residents.
Fuller programme plans to engage on the SDA vision

DRAFT

Planned Care

Portfolio vision, mission and key drivers:

- The aim of the programme is to reduce waiting times for elective care in line with the national recovery plan so that no one is waiting more than 52 weeks by March 2025
- This will be delivered through an integrated system approach to improving equity of access to planned care for the people of North East London by focusing on 3 primary drivers – managing demand, optimising capacity & creating new capacity.
- The portfolio of planned care recovery & transformation work spans the elective care pathway from pre-referral to treatment encompassing out of hospital services, outpatients, diagnostics and surgery.
- The planned care portfolio consists of three significant programmes of work – outpatient & out of hospital transformation; diagnostic recovery & transformation and surgical optimisation. The activities and interventions undertaken with these programmes are designed to improve the management of demand, optimise existing capacity and support and enable the creation of new capacity

Key stakeholders:

- Trusts
- APC
- ICB
- Place Based Partnerships
- Primary Care Collaborative including PCNs
- Community Care Collaborative
- Independent Sector Providers – acute and community
- Clinical and operational teams across all acute Trusts

Key programmes of work that will deliver the vision and mission

The portfolio of planned care recovery & transformation work spans the elective care pathway from pre-referral to treatment encompassing;

- **Outpatients and out of hospital services** - The aim of this programme is to optimise the use of our existing outpatient capacity whilst transforming how we work together across primary, community and secondary care to manage demand for services and create a sustainable outpatient & out of hospital system. Achieving this requires transformation across the whole pathway, as well as the way in which outpatient clinics are organised and delivered
- **Diagnostics -** The recovery and transformation of diagnostics includes a broad portfolio of work encompassing imaging, endoscopy, pathology and physiological measurement. The aim of the programme is to create resilient diagnostic services to support elective, including cancer, pathways
- **Surgical Optimisation** - The focus of this programme is to ensure we are using our available elective surgical capacity to increase volumes of activity and reduce waiting times. This includes Trusts improving the utilisation of their elective theatre capacity and optimising the use of NHS and ISP capacity to reduce waiting times. NEL has secured @ £33m investment from the target investment fund to open new theatres in Hackney, Newham and Redbridge, which are expected to operate as system assets.

Details of engagement undertaken with places, collaboratives and other ICB portfolios

The planned care recovery & transformation programme is an integrated system programme with system wide engagement at its heart. Priorities, governance and delivery structures have been created over the last 2 years with primary care, the ICB, PBP and acute providers.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

In NEL, this will mean delivering reduction in waiting times and reducing the variation in access that exists. Key benefits include;

- Reduce variation in service provision and improve equity of access
- Improve referral pathways. Enable patients to get the right service at the right time
- Improve patient accessibility to diagnostics, in order to; reduce pressures on primary and unplanned care, reduce waiting times, reduce steps in patient pathway, reduce follow-up activity; reduce non-admitted PTL, improved utilisation of imaging capacity
- Increase surgical activity at all sites, avoid wasted capacity, enable patients to be offered surgery at sites with shortest wait

Engagement with the public:

The national elective recovery plan has been developed with widespread public engagement. Our programme reflects these priorities, which are adapted to meet the needs of our local population.

DRAFT

Cancer

Portfolio vision, mission and key drivers:

The North-East London Cancer Alliance is part of the North East London Integrated Care System and is committed to **improving cancer outcomes and reducing inequalities for local people.**

Our aim is that everyone has equal access to better cancer services so that we can help to:

- Prevent cancer
- Spot cancer sooner
- Provide the right treatment at the right time
- Support people and families affected by cancer

- **Drivers**
- Our work enables the ICB to achieve its objectives, as set out in the strategy, across the ICB's six cross-cutting themes:
- Tackling Health Inequalities
- Greater focus on Prevention
- Holistic and Personalised Care
- Co-production with local people
- Creating a High Trust Environment that supports integration and collaboration
- Operating as a Learning System driven by research and innovation

Key stakeholders:

Patient and Carers
Providers, Partners, PLACE
Cancer board
APC Board and National / Regional Cancer Board

Key programmes of work that will deliver the vision and mission

- The programme consists of projects to improve diagnosis, treatment and personalised care.
- Key milestones to be delivered by March 2025 and 2026 include:
  - Deliver BPTP milestones in suspected prostate, lower GI, skin and breast cancer pathways:
  - Delivering the operational plan agreed for 28d FDS, combined 31d treatment and 62d cancer standards.
  - Deliver 100% population coverage for Non-Specific Symptoms (NSS) pathways.
  - Ensure sustainable commissioning arrangements for NSS pathways are in place for 2024/25
  - TLHCs provided in 3 boroughs with an agreed plan for expansion for all boroughs by 2025.
  - Develop and deliver coproduced quality improvement action plans to improve experience of care.
  - Support the extension of the GRAIL interim implementation pilot into NEL.
  - Ensure all patients are offered the personalised care package with equal access to psychological support, pre-habilitation and rehabilitation services.
  - Personalised stratified pathways can reduce outpatient attendance and allow patients to be monitored remotely reducing the need to attend clinics.
  - Improve the quality of life and support patients need to live beyond cancer.

Details of engagement undertaken with places, collaboratives and other ICB portfolios

- Weekly APG Operational delivery meeting
- Tumour specific Experts Reference Group (ERG)
- Project Delivery Groups (PDG)
- Cancer board – internal assurance
- Programme Executive Board – NEL operational delivery
- APC Board, CAB and National / Regional Cancer Board

Summary of the benefits/impact that North East London local people will experience by April 2025 and April 2027:

2025/26:

- Access to Targeted Lung Health Check service for 40% of the eligible population
- Invitation for up to 45,000 people into the GRAIL pilot
- Continued mainstreaming as part of the Lynch Syndrome pathway
- Improved quality of life and experience of care.

- **2027/ 28:**
  - Early cancer diagnosis: 75% of cases diagnosed at stage 1 or 2 by 2028.
  - Improved uptake of cancer screening
  - Every person in NEL receives personalised care and support from cancer diagnosis

Engagement with the public:

Patient Reference groups
Campaign workshops

DRAFT

Maternity

Portfolio vision, mission and key drivers:

- Three year delivery plan for maternity and neonatal services: 2023-2026. . This has consolidated the improvement actions committed to in Better Births, the NHS Long Term Plan, the Neonatal Critical Care Review, and reports of the independent investigation at Shrewsbury and Telford Hospital NHS Trust and the independent investigation into maternity and neonatal services in East Kent. The expectations on Local Maternity and Neonatal Systems are that they focus on the following areas;
- ➢ Listening to, and working with, women and families with compassion
- ➢ Growing, retaining, and supporting our workforce
- ➢ Developing a Culture of safety, learning and support
- ➢ Standards and structures that underpin safer, more personalised and more equitable care

Key stakeholders:

All LMNS and APC board Stakeholders (PBC, LA, Trusts, MNVPs- service users, Third sector organisations) Regional Maternity Transformation Team, Chief Midwife Office, ICB BCYP, Public Health.

Key programmes of work that will deliver the vision and mission

- Pelvic Health Service: All women experiencing urinary incontinence to be able to access postnatal physiotherapy up to 1 year post delivery
- Increased breastfeeding rates, especially amongst babies born to women from black and minority ethnic groups or those living in the most deprived areas.
- Midwifery Continuity Care, prioritising the provision to women from Black and minority ethnic (BAME) groups who will benefit from enhanced models of care.
- Perinatal Optimisation Programme:
- Develop pathways to manage abnormally invasive placenta across NEL
- Workforce and Development Projects

Details of engagement undertaken with places, collaboratives and other ICB portfolios

All LMNS and APC board Stakeholders (PBC, LA, Trusts, MNVPs- service users, Third sector organisations) Regional Maternity Transformation Team, Chief Midwife Office, ICB BCYP, Public Health.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- By reducing stillbirth, maternal mortality, neonatal mortality, and serious brain injury in women and babies from BAME groups and women from deprived areas. National ambition to reduce by 50% by 2025
- By closely aligning maternity and neonatal care to deliver the best outcomes for women and their babies who need specialised care by achieving <27 weeks IUT.
- By improving personalised care for women with heightened risk of pre-term birth, including for younger mothers and those from BAME groups and deprived backgrounds
- By ensuring that all providers have full baby-friendly accreditation and that support is available to those who are from BAME groups and/or living in deprived areas who wish to breastfeed their babies
- Ensuring local maternity and neonatal voice partnerships (MNVPs) have the infrastructure they need to be successful and put service user voices at the heart of service improvement. This includes funding MNVP workplans and providing appropriate training, and administrative and IT support.

Engagement with the public: MNVPs, Third Sector organisations and communities identified in the E&E LMNS report.

Babies, children and young people

Portfolio vision, mission and key drivers:

Vision: To provide the best start in life for the babies, children and young people of North East London.

Mission: The BCYP Programme aims to reduce unwarranted variation and inequality in health and care outcomes, increase access to services and improve the experience of babies, children, young people, families and carers and strengthen system resilience.

Through strong working relationships across health and social care partners, we will increase collaboration, enhance partnership working and innovation, share best clinical and professional practices with each other and deliver high quality services.

Drivers: NEL Integrated Care Strategy, NHS Priorities and Operational Planning Guidance, NHS Long Term Plan, Ongoing impact of COVID-19 pandemic, Royal College of Paediatrics and Child Health – State of Child Health, Academy of Medical Royal Colleges – Prevention is better than cure and NHS England (London Region) Children and Young People's mandated requirements.

Key stakeholders:
ICB Executive, BCYP SRO, Place Directors; Collaborative/ Programme Directors; Provider Directors; GP CYP Clinical Leads;
Directors of Children's Social Care; Designated Clinical/Medical Officers; NHSE (London) CYP Team; North Thames Paediatric Network; Safeguarding Team; Parent Forums

Key programmes of work that will deliver the vision and mission

Acute care - priorities are CYP elective care recovery, diabetes, allergy and addressing urgent and emergency care priorities for BCYP.
Community-based care -priorities are local integrated care child health pilots, increasing capacity (including 7 day access to children's community nursing and hospital@home), improving children's community service waiting times;
National/regional mandated priorities including long term conditions;
Primary care – priorities are BCYP unregistered with a GP, YP access to integrated health hubs; 'You're Welcome standards and Child Health training curriculum;
Special Education Needs and Disabilities (SEND) - SEND Inspection Readiness Group to ensure Places and ICB are prepared for new Ofsted Inspection framework and are meeting NHSE requirements. Focus Areas – Autism and Diagnostic pathways and Pre and Post offers of support for families.
Special cohorts including Child Sexual Abuse (CSA) hub, looked after children and care experienced young people.

Details of engagement undertaken with places, collaboratives and other ICB portfolios

Acute, community, mental health/learning disabilities and autism and primary care collaboratives. LTC and UEC Programmes. Places via NEL BCYP Delivery Group

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

Care is delivered closer to home as our children, young people, their families and carers have requested;
Enhanced quality of care for BCYP with asthma, diabetes and epilepsy;
Improved access to primary and integrated care for BCYP via integrated health hubs;
CYP with SEND will receive integrated support across education, health and care and reduced waiting times for SLT and autism;
Prescription poverty for our care leavers will be tackled.
Reduce the impact of child sexual abuse through improved prevention and better response.

Engagement with the public:
Via Providers.
SEND Parent's Forum
National Voices

Long Term Conditions

Portfolio vision, mission and key drivers:

Our vision - To support everyone living with a long-term condition in North East London to live a longer, healthier life and to work to prevent conditions occurring for other members of our community, and support communities to prevent LTC onset or progression

Mission - Listening to communities to understand how we can support patients in managing their own conditions

- Reduce working in silos and embed a holistic approach to LTCs
- Reduce unwarranted variation and inequality in health and care outcomes
- Increase access to services and improve the experience
- Working partners to prevent residents from developing more than one LTC through early identification of risk factors
- To ensure there are appropriate interventions and services that support a patient in preventing or managing an exacerbation of their condition
- Keep hospital stay short and only when needed
- To ensure we effectively plan and provide services that are value for money

Key drivers –

Long-term conditions have a national and regional focus as a core component of the Long Term Plan, with attention on Cardiovascular disease, stroke, diabetes, and respiratory. Furthermore, LTCs are entwined with us to address inequalities, and we support projects such as Core25Plus and Innovation for Healthcare Inequalities Programme

Long-term conditions (LTCs) is 1 of NEL's 4 System Priorities for improving quality and outcomes and tackling health inequalities. This is reflected in Place-based priorities which all have identified one or more LTCs

- Across NEL, one in four (over 600 thousand people) have at least one long-term condition, with significant variation between our places (in Havering, the figure is 33%, vs 23% in Newham and Tower Hamlets)
- NEL is the highest performing ICB in England for many outcomes related to CVD, stroke, and renal, but local social demographics put the system at risk of continued growth in demand
- Nationally, long-term conditions account for half of GP appointments, 64 percent of all outpatient appointments, and over 70 percent of all inpatient bed days.
- The most deprived areas, people acquired three or more conditions (complex multimorbidity) when they were 7 years younger, compared with the least deprived.

Key stakeholders:

- Residents and communities
- Place based teams
- Regional and National colleagues
- Organisation Delivery Networks
- Voluntary organisations
- Specialised Services
- Pharmacy and Medicine Optimisation
- Primary care
- Babies, Children and Young People
- Communities services
- Community collaborative
- Planned care
- Acute Provider Collaborative
- Mental health programme and collaborative
- Urgent Care programme
- BI and insights
- Communication and engagement
- Contracting and finance

Key programmes of work that will deliver the vision and mission

Primary LTC prevention & Early identification

Social determinants of health (SDOH) impact 80% of health outcomes from chronic disorders and across NEL we have areas of significant deprivation which is linked with increased prevalence of long-term health conditions and lower life expectancy

We want to work with our local population to empowering and enabling people to manage their own health and engage in healthy behaviours across their lives, so they don't develop a LTC.

Secondary prevention and avoiding complication

DH data has demonstrated that 9 out of 10 strokes could be prevented and up to 80% of premature CVD deaths are preventable, if risk factors could be controlled. Working with social communities, and ensuring we provided person focused early identification, secondary care and avoiding complication enables us to improve outcome and reduce exacerbation of an LTC

Co-ordinated care and equability of service

Across NEL, one in four (over 600 thousand people) have at least one long-term condition, with significant variation between our places. The feedback from the Big Conversation reflects the need to join-up care and move forwards person focused approach. Working with colleagues at place we aim to continue to review current provision and reduce unwarranted variation in care across the pathway, with an aim of improving health outcomes

Enabling people to live well with a LTC and tertiary prevention

The effective support and management of LTC will increasingly require the management of complexity, and moving away from a single condition approach. In NEL 3 in 5 patients with a diagnosed long term condition have only one condition, the other 2 in 5 have multiple co-morbidities, of which diabetes and hypertension were most common

Details of engagement undertaken with places, collaboratives and other ICB portfolios

Places – working with Heads of Live well across the 7 places who are responsible for LTCs

Clinical/improvement Networks – wider engagement with trusts, community providers, pharmacy, primary care and place

Organisation Delivery Networks (renal and CVD/cardiology)

Other programme directors including specialised service, community, mental health, BYCP.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

Work toward national targets including:

- Improve detection of atrial fibrillation and ensure appropriate stroke risk reduction through anticoagulation - by 2029 85% of expected numbers with AF are detected, and 90% of patients with AF and high risk of a stroke on anticoagulation.
- Improve detection of undiagnosed hypertension and ensure those with hypertension are controlled to target – by 2029 80% of expected numbers with hypertension are detected and 80% of people with high blood pressure are treated to target
- Improve access to and uptake of Cardiac Rehabilitation (CR) – by 2029 85% of eligible patients are accessing CR
- Reduction of type 2 diagnoses / delayed onset in residents developing Type 2 (T2) diabetes delivered through an increase the number of people referred and starting the National Diabetes Prevention Programme (DPP) 45% of eligible populations).
- nting with symptoms of Transient Ischaemic Attack will have access 7 days a week to stroke professionals who can provide specialist assessment and treatment within 24 hours of symptom onset thus preventing long term disability

Engagement with the public:

The big conversation which consists of 56 focus groups, 430 attendees of key community events and local survey focused on LTCs and the outputs are incorporated into priorisation for 24/25.

Furthermore, we have incorporated feedback at service level such PR and diabetes

Mental Health

Portfolio vision, mission and key drivers: the aim of the Mental Health, Learning Disability and Autism Collaborative is to work together to improve outcomes, quality, value and equity for people with, or at risk of, mental health problems and/or learning disability and autism in North East London. We do this by putting what matters to service users and their families front and centre of everything we do.

The service user and carer priorities that represent our key drivers include:

- Improving peoples' experience of accessing mental health services, including their first contact with services, and ensuring equity of access
- Children and young people can access different support from different people, including those with lived experience, when and where they need it
- People with a learning disability have the support they need and a good experience of care, no matter where they live

Key stakeholders: NHS North East London, East London NHS Foundation Trust, North East London NHS Foundation Trust, local authorities, primary care, voluntary, community and social enterprise sector organisations, service users, carers & residents

Key programmes of work that will deliver the vision and mission

1. Investing in and developing lived experience leadership across the MHLDA Collaborative so that experts by experience are active and equal partners in leading improvement and innovation across mental health, learning disability and neuro-developmental services
2. Continuing the work led by our children and young peoples' mental health improvement network to reduce unwarranted variation across boroughs, and to do more of what works to reduce self-harm and improve outcomes for young people
3. Accelerate the work of our talking therapies improvement network to improve access, and continue to transform and improve community mental health services, with a particular focus on improving equity of access for minoritised groups and people with neurodevelopmental needs
4. Continue our focus on improving mental health crisis services and alternatives to admission - while also working to ensure that quality inpatient services are available for those who need them - making sure that people get the right support, at the right time, and in the right place
5. Working to develop core standards for community learning disability services, with a view to reducing unwarranted variation between boroughs, and sharing good practice to support our specialist workforce better

Details of engagement undertaken with places, collaboratives and other ICB portfolios: Place based priorities for mental health are the cornerstone of our plans. We also connect closely with the Acute Provider Collaborative on mental health support in emergency departments and form part of their programme governance on UEC. We also have strong links into the BCYP programme and community health.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- Improved access, outcomes and experience of NHS Talking Therapies for minoritised communities and other under-served populations
- Improved system-wide response to children and young people presenting with self-harm through the introduction of new evidence-based interventions, including better support to teachers, GPs and parents
- Improved offer of pre-diagnostic, diagnostic and post-diagnostic support for people with neurodevelopmental support needs
- Greater equity in the community learning disability support offer across boroughs
- Improved inpatient services with lower lengths of stay, and better options of high-quality supported housing / residential care for those who need it
- Widespread adoption of personalised and person-centred care planning processes with an emphasis on continuity of care and biopsychosocial assessment

Engagement with the public: Our Lived Experience Leadership arrangements ensure we are continually engaging with children and young people, adults with mental health needs and people with learning disabilities and their families, and coproducing our work with service users

Employment and workforce

Portfolio vision, mission and key drivers:

- Our vision is to create a transformational and flexible "One Workforce for NEL Health and Social Care" that reflects the diverse NEL communities and meets our system priorities.
- The mission focuses on developing a sustainable and motivated workforce, equipped with the right skills, competencies, and values, to improve the overall socio-economic outcomes of our NEL populations.
- The key drivers are responding to population growth and increasing demand, and developing meaningful and rewarding careers within health and social care services for local residents.

Key stakeholders:

- Provider CPOs
- People Board
- Place Directors
- Staff
- Local Authorities
- Care Sector

Key programmes of work that will deliver the vision and mission

- **System Workforce Productivity:** Continuing to address NEL's difficult financial position through urgent investigation of workforce productivity drivers and implementation of productivity improvement initiatives.
- **System Strategic Workforce Planning:** Development of a strategic workforce planning function with the capacity, capability and digital enablers to provide the enable evidence-based decisions to ensure the long-term sustainability of the NEL Health and Social Care workforce. With the ultimate aim of developing of a system-wide health and social care workforce database and an integrated workforce planning system.
- **System Anti Racist Programme:** Embedding inclusive, anti-racist and empowering cultures across the system.
- **System wide scaling up and corporate services:** Identification of corporate services with scope for rationalisation. Streamlining operations, improving efficiency, standardising approach and reducing costs.
- **NEL Health Hub Project Programme:** Connecting local health and social care employers with colleges for employment opportunities. . Healthcare part is in partnership with Newham College and London Ambulance service and funded by GLA until March 2024. Social Care part is led by Care Provider Voice, aiming for 150 job outcomes, and funded until March 2025.
- These programmes are subject to approval by the People Board, Exec Committee, CPOS, Place, and collaboratives, aligning with the goal of enhancing socio-economic status in NEL through workforce development.

Details of engagement undertaken with places, collaboratives and other ICB portfolios

- Engaged with a broad spectrum of Health and Social Care partners through workshops and sessions.
- Involved Local Authorities, Voluntary and independent Care Sectors, Primary Care, NHS Trusts, Provider collaboratives, and Education Providers.
- More engagement is required.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- **Integrated Health and Social Care Services:** Enhanced workforce development will lead to more integrated and effective health and social care services, improving overall care delivery.
- **Workforce Expansion and Skilling:** Initiatives like the NEL Health Hub and Social Care Hub are set to expand the healthcare workforce, providing training and development opportunities, leading to better staffed and skilled services.
- **Healthcare System Sustainability:** Focus on financial stewardship and innovation will contribute to a more sustainable healthcare system, ensuring long-term service delivery and effectiveness.
- **Equity in Healthcare Employment:** Targeted employment opportunities for under-represented groups in health and social care sectors will enhance workforce diversity, contributing to more inclusive and equitable healthcare services.
- **Enhanced Health and Well-being Services:** Programs like the Keeping Well Nel programme, funded until June 2024, will enhance health and well-being services, directly benefiting the ICS, workforce, and indirectly impacting local population health.

Engagement with the public:

- Actively engaged ICS staff via hackathons and NEL residents through community events and job fairs.
- Utilized feedback from the Big Conversation for inclusive strategy development.
- More engagement is required.

Specialist Commissioning

Portfolio vision, mission and key drivers:

Our vision:

- is to ensure that the population of north east London have good access to high quality specialist care that wraps around the individual, and ensures the best possible outcomes

Our mission and drivers:

- We are responsible for planning and commissioning of delegated specialised health services across north east London. We are responsible for specialised spend, performance and outcomes, and ensuring all parts of the local health system work effectively together to deliver exemplary specialist care
- We are responsible for integrating pathways of care from early intervention and prevention of LTC through to specialist provision, ensuring end to end pathways to improve outcomes and manage future demand of costly specialist care.
- We set priorities for specialised services and work with our local ICS, multi ICB partners and London regional partners to deliver world class specialised services to benefit patients within north east London, North London or London ensuring access to the right level of care.
- We will do this by working together with health partners, specialist providers, local authorities and the voluntary community and social enterprise (VCSE) sector, with residents, patients and service users to improve how we plan and deliver specialised services.

Key programmes of work that will deliver the vision and mission

From 2024/25, ICBs will have budget allocated to them on a population basis, and from April 25 this will be allocated on a needs based allocation basis. The specialised allocation will follow a similar formula to that of other nonspecialised services that ICBs hold, and **so can be considered and contracted for alongside the rest of the pathways we commission**. Delegation of specialised services and transformation of specialised services allows us to consider the totality of resources for our population, making it easier to ensure investment in the most optimal way to improve quality and outcomes, reduce health inequalities and improve value.

The key programmes of work are to:

1. Ensure safe delegation of specialised services working alongside the NHSE regional team
2. Joint work with NHSE, London ICBS and locally in NEL focussed on specialised transformation: sickle cell disease (Haemoglobinopathies), HIV and Hepatitis (including liver disease), Renal disease, Neurosciences, Cardiology, complex urogynaecology and specialist paediatrics
3. Working alongside other portfolios will deliver this mission, mainly LTC to ensure a whole pathway approach routed in place, cancer, planned care, critical care, BCYP and mental health

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

HIV

- People living with HIV will have improved follow up care with investment in a community led peer programme with an aim to reduce by 70% the number of eligible patients that are lost to care/failed by care. This follow up care will include regular testing, counselling, mentoring, group support, assurance and information and advice.

Renal

- Working towards maximise patient dialysing at home - 496 patients on home therapies by 31/32 (target of 28% of patients on home therapies by 2032).
- Working towards maximise patients being transplanted - 280 transplant operations completed in 31/32

Sickle Cell

- Local people with sickle cell will receive appropriate analgesia and other pain management measures (ideally within 30 minutes) when attending any acute A&E in NEL
- Residents will have timely access to multi-disciplinary team to support delivery of trauma-informed care based on the principles of safety, trust, choice, collaboration, empowerment and cultural competence.

Hepatitis and HIV

- To achieve micro elimination of HCV across NEL (2025).
- Improved access to diagnostics and increase local prevention programmes by aligning with the British Liver Trust optimal pathway. This will support the reduction in the growth rate of liver disease (currently 20%).

Neurosciences

- 10% of eligible stroke admissions will have consistent 24/7 access to mechanical thrombectomy to reduce the impact of stroke
- Improve detection of atrial fibrillation and ensure appropriate stroke risk reduction through anticoagulation - by 2029 85% of expected numbers with AF are detected, and 90% of patients with AF and high risk of a stroke on anticoagulation.

Cardiology

- Shorter waiting times and reduced elective and non-elective
- HF 30 day readmission rates have recently risen to more than 20%. We aim to reduce this to reduce this <15% with roll out of dedicated HF pharmacist to review and titrate patients post discharge

Key stakeholders:

- NHS London Region and London ICB partners
- NEL Provider Trusts
- North London ICB Programme Board partners (NCL/NWL)
- ODNs, mandatory and local clinical networks
- EoE Region
- Local authorities
- VCSE

Details of engagement undertaken with places, collaboratives and other ICB portfolios:

- APC Executive
- APC Joint Committee
- NEL Executive leads
- Close working with other ICB portfolios: LTC, Cancer, Planned Care, Critical Care, CYP, mental health

Engagement with the public:

- Engagement via regional and local clinical networks including Renal service users to inform dialysis provision
- Cardiac ODN: women, family
- HIV work with charities

DRAFT

Digital

Portfolio vision, mission and key drivers: There are four key elements to the ICS digital strategy; patient access, population health, shared record access and provision of core infrastructure:

- **Patient Access** gives residents the ability to view their records and interact digitally with health and care providers. This is and will be provided through expanding use of the NHSApp, Online and Video consultation tools, online registration and the patient held record system, Patients Know Best
- **Population Health** utilises a variety of data sources to build a picture of care needs at various levels, primarily identifying specific cohorts of patients requiring intervention but also providing overviews at population level, allowing providers to alter service provision
- **Shared Records** is the mechanism for ensuring that clinicians and other care professionals have as full a picture as possible to allow them to provide the most appropriate care to individual patients / residents. This was pioneered in NEL and is now used across London and beyond
- **Core infrastructure** is the fundamental basis for all digital activity; the foundational work done at each provider that allows them to operate effectively and puts them on a sure footing to be able to contribute to and receive data from systems external to themselves

Key stakeholders:
All ICS health and care providers including NHS trusts, local authorities, GPs, community pharmacists, care home providers, third sector health and care providers, NHS England

Key programmes of work that will deliver the vision and mission
The largest investment currently taking place is the replacement of the core electronic patient record (EPR) system in BHRUT. This is being replaced by extending the existing Oracle Millennium system in use at Barts Health. Planning is underway, with the system expected to be live by March 2025. Other significant investments in Trusts include:

- The expansion of the functionality available via the NHSApp to include the ability to manage hospital and community appointments, and the ability for patients and clinicians to interact digitally where appropriate, thus improving the experience for digitally enabled patients and freeing up resource to support those wishing to use traditional methods. This is enabled by the PHR programme
- Use of artificial intelligence and robotic process automation to support diagnostics and faster completion of administrative tasks such as clinic management within trusts, thus improving patient experience and reducing the administrative burden on trusts
- All acute trusts using the same imaging platform to store and view x-rays, scans, etc., reducing the requirement for repeat diagnostic procedures and making them available to any clinician that needs access. ICS-wide cyber security plans are in place with funding having been secured
- Introduction of remote monitoring equipment to support expansion of virtual wards

Details of engagement undertaken with places, collaboratives and other ICB portfolios
Members of the digital team attend portfolio and collaboratives' meetings. A meeting has taken place with place directors but further meetings are needed.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- Residents can choose to interact with health and care professionals via the use of the NHSApp, Patient Held Record, online consultation and video consultation tools, which will smooth their interaction with the NHS and free up capacity to deal with people choosing to use other routes
- Patient level and aggregated information is provided to clinicians, managers and researchers, subject to a strict approval process. This helps change the planning and delivery of healthcare provision
- NEL hosted data is used across London and neighbouring ICS's, breaking down barriers by facilitating the sharing of information and good practice
- Information is provided to individual clinicians and other professionals from within their main system, giving access to information held by most London Trusts, which enables them to provide
- Key strategic programmes are co-ordinated by the ICS team, including Community Diagnostic Centres, Frontline Digitisation, Virtual wards, Care Sector, secondary care Appointment Systems and Primary Care Digital First, working with health, social care and third sector partners

Engagement with the public:
The One London programme has held various consultation meetings with patients across London, the results of which inform the strategies of each of the ICS' across London. Further engagement has been requested through further 'Big Conversations' planned in NEL

DRAFT

Finance

The benefits that north east London local people will experience by April 2024 and April 2026:

- Improving quality and outcomes for local people of north east London
- Securing greater equity for our residents
- Maximising value for money
- Deepening collaboration between partners

How this transformation programme reduces inequalities between north east London's local people and communities:

- Incentivising transformation and innovation in clinical practice and the delivery of services to improve the outcomes of local people
- Supporting delivery of care closer to patients' homes, including investing in programmes that take place outside the hospital environment
- Refocus how the money is spent to focus on population health, including proactive measures that keep people healthier and to level up investment to address historical anomalies of funding
- Increasing investment in prevention, primary care, earlier intervention and the wider determinents of health, including environmental sustainability

Key programme features and milestones:

- Supporting our providers to reduce transactional costs, improve efficiency and reduce waste and duplication
- Support the financial stability of our system providers and underpinning a medium to long term trajectory to financial balance for all partners
- Recognising existing challenges, including that NEL is, as a SOF 3 ICS, financially challenged with a growing population and an acute provider (BHRUT) in SOF 4 for financial performance.
- Ensuring we do not create unnecessary additional financial risk, especially in the acute sector
- ICS investment pool to fund programs designed to reduce acute demand
- Finance development programme to agree overall budgets and develop place based budgets and budgetary delegation to place
- Effective integration of specialised commissioning, community pharmacy, dental and primary care ophthalmology services

Further transformation to be planned in this area:

- Supporting the integration of health and social care for people living with long term conditions who currently receive care from multiple agencies
- Ensuring that all partners are able to understand and influence the total amount of ICB resources being invested in the care of local people.

Programme funding:

- ICB plan submitted with a total budget of £4,218m in 23/24
- Specific transformation budgets, including health inequalities, virtual wards, physical, demand and capacity funding

Leadership and governance arrangements:

- Reporting to the ICB Board and Place Partnership Boards
- Finance, Performance and Investment Committee
- Audit and Risk Committee
- CFO lead monitoring of monthly and forecast performance

Key delivery risks currently being mitigated:

- Risk to delivery of a balanced financial position. Mitigated by delivery of efficiencies, delay of planned investments

DRAFT

Physical infrastructure

Capital pipeline work to be completed Jan. Review in January 2024

The benefits that north east London local people will experience by April 2024 and April 2026:

- Across NEL ICS organisations, there are 332 estates projects in our pipeline over the next 5 /10 years, with a total value of c. £2.9 billion
- These include the redevelopment of Whipps Cross hospital and a new centre on the site of St George's, Hornchurch
- Formal opening of new St George Health and Wellbeing Hub – **Spring 2024**

How this transformation programme reduces inequalities between north east London's local people and communities:

- Infrastructure transformation is clinically led across the footprint whilst also achieving the infrastructure based targets set by NHSE.
- Our vision is to drive and support the provision of fit for purpose estate, acting as an enabler to deliver transformed services for the local population. This is driven through robust system wide Infrastructure planning aligned to clinical strategies, which is providing the overarching vision of a fit for purpose, sustainable and affordable estate.

Key programme features and milestones:

- Acute reconfiguration £1.2bn (includes estimated total for Whipps Cross Redevelopment of c. £755m)
- Mental Health, £110m
- Primary and Community Care, £250m
- IT systems and connectivity, £623m (inc. NEL Strategic digital investment framework c.£360m)
- Medical Devices replacement, £256m
- Backlog Maintenance, £315m
- Routine Maintenance inc PFI, £160m

Further transformation to be planned in this area:

- Construction will be undertaken where possible using modern methods in order to reduce time and cost and will be net carbon zero.
- Consider use of void spaces and transferred ownership of leases to optimise opportunity to meet demand and contain costs.
- Support back-office consolidation

Programme funding:

- Over the next 10 years there is expected to be a c£2.9bn capital ask from programmes across NEL

Leadership and governance arrangements:

- System-wide estates strategy and centralised capital pipeline
- Capital overseen by Finance, Performance and Investment Committee of NHS NEL.

Key delivery risks currently being mitigated:

- Recent hyperinflation has pushed up the cost of many schemes by as much as 30%. Currently exploring how to mitigate this risk, including reprioritisation
- Exploring opportunities for investment and development with One Public Estate, with potential shared premises with Councils

DRAFT

Barking & Dagenham

Portfolio vision, mission and key drivers:
Vision
By 2028, residents in Barking and Dagenham will have improved physical and mental health and wellbeing, with a reduction in the gap in health inequalities between Barking and Dagenham resident and people living elsewhere. Our strategic aims are to:
- Enable babies, children and young people to get the best start in life
- Ensure that residents live well and when they need help they can access the right support at the right time in a way that works for them
- Enable residents to live healthier for longer and be able to manage their health, have increased opportunities to have an early diagnosis of health conditions and be provided with appropriate care to manage a condition before it becomes more serious

Interdependent ICB programmes
- Babies, Children and Young People; Maternity programme; Fuller programme; Population Health programme; Long Term Conditions programme; Urgent & Emergency Care programme; Estates

Interdependent Collaborative programmes
- Acute; Community Health; Mental Health, Learning Disability and Autism; Primary Care; VCSE

Key programmes of work that will deliver the vision and mission
- **Improving outcomes for CYP with SEND** with a focus on therapy support, ASD diagnosis and pre-and post-diagnostic support, mental health in schools
- **Tackling childhood obesity** leveraging the opportunities through family and community hubs for prevention
- **Development of Integrated Locality Health and Social Care Teams** (physical and mental health)
- **Developing a proactive and prevention approach to delivery of services** with targeted prevention approaches for falls prevention, dementia diagnosis and early support; long-term conditions identification and support and health outcomes for people who are homeless
- **Optimising outcomes and experience for pathways - d**eveloping a 24/7 Community End of Life Care Model; integrated Rehab and Reablement services; high Intensity User Services; demand and capacity management of high risk pathways (waiting list management)
- **Improving the physical health of people with SMI**

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:
- BCYP get the best start, are healthy, happy and achieve, thrive in inclusive communities, are safe and secure and grow up to be successful young adults
- Providing accessible services and support for residents to prevent the development of health conditions wrapped around local communities
- Improving physical and mental health and wellbeing for residents, particularly those with long term conditions
- Reduced reliance on acute and crisis services
- Improved physical health outcomes for those with a serious mental illness

Key stakeholders:
NELFT
Primary care/PCNS
BHRUT/Barts
VCSE
Healtwatch
Local Authority- childrens and adults services; public health
Estates and housing teams

Engagement with the public:
Best Chance Strategy for CYP and families; Just Say Parent Forum, engagement in Adults and Community strategy (ongoing)

DRAFT

Havering

Havering Place based Partnership vision, mission and key drivers:

A Healthier Havering where everyone is supported to thrive; The vision of the Havering Partnership is to pool our collective resources to create person centred, seamless care and support designed around the needs of local people throughout their life course, with a strong focus on prevention, addressing inequalities and the wider determinants of health. This compliments Havering Council's vision for the 'Havering that you want to be a part of', with a strong focus on people, place and resources. We will do this by; Tackling inequalities and deprivation to reduce the impact that this has to access to services, and outcomes; Improving Mental and Emotional Support, Tackling Havering's biggest killers; Improving earlier care and support; coordinating and joining up care; working with people to build resilient communities and supporting them to live independent, healthy lives.

Interdependent ICB programmes

- Mental Health
- Long Term Conditions
- Urgent and Emergency Care
- Workforce and other enablers such as digital
- Planned Care
- Carers work and other cross place programmes

Interdependent Collaborative programmes

- Acute Provider Collaborative
- Community Provider Collaborative
- VCSE Provider Collaborative
- Mental Health Provider Collaborative
- Primary Care Collaborative
- North East London Cancer Alliance

Key programmes of work that will deliver the vision and mission

- **Start Well**; Children and young people get the best start in life, are able to achieve the best opportunities and keep as healthy and well as possible throughout their lives
- **Live Well**; People enjoy and are able to maintain a sense of wellbeing and good health, supported by resilient communities. They can access care and information when needed.
- **Age Well**; People are able to live independently in their own homes with appropriate care and support to maintain and develop their social and community networks
- **Die Well**; People are supported to ensure the last stages of their life happen in the best possible circumstances, receiving the right help at the right time from the right people
- **Building community resilience programme and other key enablers**; including improvements to Primary Care and delivery of the recommendations in the Fuller review, roll out of the Joy App as our single database of services and referral mechanism for social prescribing, making better use of our estate and delivery of new models of care such as the St Georges project, improvements to urgent and emergency care, imbedding a prevention approach, addressing our key workforce challenges by working together, creating the enabling framework for place including information sharing agreements between partners to enable decisions and service improvement to be driven by joined up data.
- Built on a foundation of a **joint health and care team**, bringing together the Havering Place NHS team with the Local Authority Joint Commissioning Unit to deliver improved outcomes for local people and better value for money in our commissioned services

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

Start Well Ambitions

[illegible]

Live Well Ambitions

[illegible]

Age Well Ambitions

[illegible]

Die Well Ambitions

[illegible]

Full details of the benefits are captured in the Havering Place based Partnership interim strategy

Key stakeholders:

- Local People
- Staff
- VCSE
- London Borough of Havering and their staff, who are coming together with the NHS Place team to form a joint team
- NELFT
- BHRUT
- Healthwatch
- Care Providers Voice (including Home Care and Care Home providers)
- PELC
- Primary Care including the GP Federation and PCNs
- NHS North East London partners
- Police and other community partners
- Wider NHS partners
- Wider Community partners and groups

Local People are at the heart of all of the work of the Place based Partnership

Engagement with the public:

A significant engagement programme has been underway with local people, VCSE groups, and stakeholders since the inception of the partnership. We are building an ongoing relationship with local people, and developing case studies to embed their experiences to drive improvements locally.

Redbridge

Place vision, mission and key drivers:

VISION: The Redbridge Partnership will relentlessly focus on improving the outcomes for the people of Redbridge and seek always to make a positive difference to people's lives. Together, we will build on what we have already achieved and use our combined resources to create person-centred, responsive care to build services around the needs of our communities within Redbridge. We will have a strong focus on prevention, addressing inequalities and the wider determinants of health.

KEY PRIORITIES: Babies,Children & Young People (BCYP)-Childhood Immunisations, **Housing & overcrowding, Multi-Disciplinary Team working(MDT)-** service integration, **Mental Health (MH)**– Access & wellbeing

DRIVERS: Good governance and accountability, a focus on the patient/resident's voice, a focus on Organisational Development, Commitment to working in partnership and beyond organisational boundaries, reliable data to inform impacts and adequate resourcing

Interdependent ICB portfolios

Long Term Conditions (LTC), Learning Disabilities (LD)/Mental Health (MH), Planned Care (PC), Health Inequalities (HI), Babies, Children and Young People (BCYP), Urgent and Emergency Care (UEC)

Interdependent Provider Collaboratives

Community Collaborative, Acute Provider Collaborative, Cancer, Collaborative, Primary Care Collaborative, Mental Health Collaborative

Key programmes of work that will deliver the vision and mission. (PLEASE NOTE THE PRIORTIES ARE PLANNED TO BE FORMALLY SIGNED OFF AT THE JANUARY 24 PARTNERSHIP BOARD.)

Start Well: Hospital at Home, Paediatric Integrated Nursing Service (PINs), Learning Disability Key workers, Integrated child health hubs, Special Education Needs & Disability (SEND), Children & Young People Asthma one stop shop

Live Well: Long Term Conditions Prevention/diagnosis, A Cardio renal and cardio vadcular programme, Increase health checks for residents with Serious Mental Illness (SMI) , Mental Health & Learning Disability, Review of Commissioning overlaps between organisations, Improve quality of life for residents of Redbridge.

Urgent & Emergency Care/Ageing Well: Keeping people well at home, Same day access to urgent care, Hospital flow-length of stay in hospital, Discharge from Hospital, End of Life Care, Avoidance of unnecessary attendance and admissions to hospital.

Primary Care: Fuller Programme (Integrated Multi-Disciplinary Care, Staying well for longer, Access to care & advice), Direct Enhanced Services, Local Incentive Schemes, Same Day Access and extended hours care, Asylum Seekers services, Homeless Services, Spirometry

Health Inequalities: Various schemes addressing Core 20+5

Ilford Exchange Health Centre: To develop and deliver a new health centre in Ilford town centre following an extensive public consultation in September 2022. The consultation was over 6 weeks and included a range of engagement tools and events such as public surveys, information stands, 4 public engagement events and 1 event with a local charity One Place East.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

By April 2025 and 2027 the Redbridge Place Based Partnership will:

- Significantly reduce the variation in undiagnosed Long Term Condition diagnosis rates and improve early treatment intervention.
- Significantly improve the uptake of childhood immunisations
- Improve the rate of Healthchecks for residents with Serious Mental Illness.
- Reduce the number of Children & Young People patients attending A&E through the hospital at homes programme
- Significantly reduce health inequalities underpin by the Core20+
- Improve same day access for residents across both health and care
- Have a new integrated health centre operational in the Ilford Exchange by 2025.

Key stakeholders:

- London Borough of Redbridge (LBR)
- Redbridge Community Volunteer Service (RCVS)
- Healthwatch
- Healthbridge (GP Federation),
- The Primary Care Networks (PCNs) in Redbridge
- North East London NHS Foundation Trust (NELFT),
- NHS NEL ICB
- Barking Havering & Redbridge University Hospitals NHS Trust (BHRUT)
- Barts Health NHS Trust (specifically Whipps Cross),
- Provider Collaboratives
- Care Provider Voice CPV)
- PELC
- LMC
- BHR CEPN

Engagement with the public:

The RBP will engage with local communities and organisations to create a strategic priorities programme that is informed by the views of local people. In particular we plan to have engagement workshops once the key priorities are signed off in January 2024, to shape the work programmes.
We will also have resident rep's on each Steering Group which are sub-committees of the Partnership Board.

Tower Hamlets

Portfolio vision, mission and key drivers:
- Tower Hamlets residents, whatever their backgrounds and needs, are supported to self-care, thrive and achieve their health and life goals
- Health and social care services in Tower Hamlets are accessible, high quality, good value and designed around people's needs, across physical and mental health and throughout primary, secondary and social care
- Service users, carers and residents and children are active and equal partners in health and care and equipped to work collaboratively with THT partners to plan, deliver and strengthen local services
- All residents - no matter their ethnicity, religion, gender, age, sexuality, disability or health needs - experience equitable access to and experience of services, and are supported to achieve positive health outcomes

Interdependent ICB programmes
- ICB anti-racism workstream
- ICB CYP workstream
- ICB long term conditions workstream
- ICB MH workstream
- Primary Care Access
- ICB Fuller workstream
- ICB urgent care review
- Access to data & insights

Interdependent Collaborative programmes
- Community collaborative model for health and care
- Primary care collaborative
- Supporting out of borough NEL discharges
- Mental Health collaborative
- Planned Care workstream

Key programmes of work that will deliver the vision and mission
- Improving access to primary and urgent care
- Building resilience and self-care to prevent and manage long term conditions
- Implementing a localities and neighbourhoods model
- Facilitating a smooth and rapid process for hospital discharge into community care
- Being an anti-racist and equity driven health and care system
- Ensuring that Babies, Children and Young People are supported to get the best start in life
- Providing integrated Mental Health services and interventions

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:
- Ensuring residents can equally access high quality primary and urgent care services when and where they need them
- Better prevention of long term conditions and management of existing conditions
- Ensuring that every resident can access the health and care services they need to support their continued health and wellbeing within their local area or neighbourhood, including GP, pharmacy, dental and leisure facilities
- A smooth and rapid process for discharging residents from hospital to suitable community-based care settings when they are ready for this transition
- Ensuring our health and care system and services are achieving equitable outcomes for all residents and addressing inequalities that exist, e.g. access, experience, representation and outcomes
- Ensuring babies, children and young people (and their families) are supported to get the best start in life, especially where they have additional needs
- Providing integrated services and interventions to promote and improve the mental wellbeing of our residents

Key stakeholders:

LBTH
NEL ICB
Barts Health Trust
TH GP Care group
ELFT
Healthwatch
TH CVS

Tower Hamlets residents and service users

Engagement with the public:

The workstreams and the THT Board include VCS and resident stakeholders who input into the design of the programme.

Newham

Portfolio vision, mission and key drivers:
Working with our diverse communities of all ages to maximise their health, wellbeing and independence. Supported by a health and care system that enables easy access to quality services, in your neighbourhood, delivered by people who are proud to work for Newham.

Interdependent ICB programmes
- Babies, Children and Young People
- Fuller
- Long Term Conditions
- Maternity
- Population Health
- Urgent & Emergency Care

Interdependent Collaborative programmes
- Acute
- Community Health
- Mental Health, Learning Disability and Autism
- Planned Care
- Primary Care
- VCSE

Key programmes of work that will deliver the vision and mission
- Joint Planning Groups (JPGs) for Babies, Children and Young People; Mental Health; Learning Disabilities and Autism; Ageing Well; Primary Care; and Urgent Care
- Additional JPG for Long Term Conditions being explored
- Local Authority-led programmes across Health Equity and Well Newham (prevention)
- Population growth programme

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:
- Reduce the prevalence and impact of long-term conditions on residents' lives
- Enable people to stay well in their own homes by proactively organising and managing their care & support
- Improve the mental wellbeing of residents and ensure people have access to mental health support when and how they need it
- Involve, engage and co-produce all our plans with residents
- Ensure people stay in hospital for the optimum time and are supported to rehabilitate and recover
- Ensure when people need urgent help they can access it quickly and as close to home as possible
- Develop and integrate children's services to ensure children have the best start in life
- Prepare for significant population growth in Newham and North East London and strengthen prevention initiatives

Key stakeholders:
ELFT
Healthwatch
LBN
NEL ICB
NUH
Primary Care
Residents
VCFS

Engagement with the public:
Residents and People & Participation Leads attend Partnership Board, JPGs and project groups

Waltham Forest

Portfolio vision, mission and key drivers:

Our aim is for the population of Waltham Forest to have healthier lives by enabling them to **start well, live well, stay well and age well**, supporting each individual through to the end of their lives. We will do this by working together, as partner organisations and with our residents, **to improve health outcomes and reduce health inequalities.**

- We will engage and involve our residents to coproduce our interventions and services
- We will focus on supporting all residents to stay well and thrive throughout their lives
- We will use population health management approaches to understand the needs of our residents and target our resources to improve equity
- We will ensure when people need help, they can access high quality, good value services quickly and easily and are enabled to stay in their homes or return home as soon as possible.

Interdependent ICB programmes

- ICB anti-racism workstream
- ICB UEC workstream
- ICB CYP workstream
- ICB long term conditions workstream
- ICB MH workstream
- Primary Care Access
- ICB Fuller workstream
- ICB Digital workstream

Interdependent Collaborative programmes

- Whipps Cross redevelopment programme
- MH Collaborative
- Community Collaborative
- Primary care Collaborative
- Planned care workstream

Key programmes of work that will deliver the vision and mission

- Delivery of a programme of locality **prevention, wellbeing and self-care** to intervene earlier with residents to improve health outcomes dentification for intervention and support for residents with **LTCs.**
- Delivery of proactive anticipatory care through delivery of **Care Closer to Home** transformation programme and establishing **Integrated Neighbourhood teams and hubs.**
- Deliver alternative to unplanned attendances and admissions to acute hospital and improve discharge pathways through the delivery of the **Home First programme** of transformation and improving **same day access to primary care.**
- To publish a **children's health strategy** , improve access to **therapies** and reduce the need for children to attend hospital.
- To transform **EOL** services in Waltham Forest to ensure residents have the support to die in their choice of place.
- Publishing a strategy for **children's health**, improving access to children's therapies, and developing services to reduce the need for children to attend Whipps Cross Hospital in an emergency.
- Improving access to **Mental Health** support in community for all ages and promoting positive well-being for all.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

Key stakeholders:

Engagement with the public:

City & Hackney

Portfolio vision, mission and key drivers:

City & Hackney PbP Vision: Working together with our residents to improve health and care outcomes, address health inequalities and make City and Hackney thrive, by focussing on 3 key areas:

1. **Giving every child the best start in life (often by recognising the role of families)**
2. **Improving mental health and preventing mental ill-health**
3. **Preventing, and improving outcomes for people with long-term health and care needs**

Supporting our population health priority outcome areas (above), we are implementing 6 cross cutting approaches: Increasing social connection, ensuring healthy places, supporting greater financial wellbeing, joining up our local health and care services around resident's and families' needs, taking effective action to address racism and other discrimination, and supporting the health and care workforce. City and Hackney Neighbourhoods programme is about fostering community connections.
Our aim is to improve quality of care (clinical cost effectiveness, experience and safety) including access and waiting times for all our residents particularly those experiencing Health inequalities. We apply the principles of right time, right place, right support. We acknowledge that the solution lies at "whole-system" level and requires detailed collaboration with wider system partners including local authorities, public health and our voluntary sector partners and strengthening partnership working and synergies to maximise benefits in terms of outcomes and system sustainability. Residents and Families are at the heart of everything we do.
Key drivers: - national and regional policy frameworks, local needs, and addressing areas in C&H where we have poor outcomes and evidence of inequalities (as articulated in JSNAs, Population Health data, and more)

Interdependent ICB programmes

Start Well –BCYP programme priorities on Community Capacity (waiting lists, insights), Primary Care (new models, better integration) Acute care (capacity i.e.. diabetes, allergy)
Live Well - LTC and Specialised Commissioning; Planned Care; Urgent and Emergency Care; Personalised Care
Age Well - Palliative & End of Life Care; NEL Care Home / Care Provider Forum / Network; Continuing Healthcare: NEL Carers Network
Mental Health - Children (C&H); Unplanned / Crisis Care (C&H); Community Care (C&H); NEL MH Delivery Group

Interdependent Collaborative programmes

Start Well – APC, Community Collaborative (Waiting lists, SLT), Mental health collaborative, C&H CAMHS Alliance, Primary Care Collaboratives
Live Well – APC; Community Collaborative
Age Well - Mental Health Alliance; Primary Care Collaboratives
Mental Health - Mental Health Integration Committee (MHIC); C&H Children's Emotional Health and Wellbeing Partnership; C&H Psychological Therapies and Wellbeing Alliance (PTWA); C&H CAMHS Alliance; C&H Dementia Alliance; C&H Primary Care Alliance; Hackney SIG

Key programmes of work that will deliver the vision and mission

Start Well – CAMHS / Improving wellbeing and MH (ACEs), improving outcomes for CYP with SEND, complex health needs, ASD and LD, increasing immunisations and vaccinations, reducing maternity inequalities and improving perinatal mental health
Live Well - Neighbourhoods (Proactive Care, Community Navigation); Better Care Fund Partnership; Primary / Secondary Care Interface; Long Term Conditions Management
Age Well - Discharge Improvement Programme; Integrated Urgent Care - NEL Same Day Access Programme, Enhanced Community Response (Virtual Wards and Urgent Community Response), Frailty / Proactive Care
Mental Health - ADHD / ASD Assessment and Aftercare (All ages) – Backlog and Waiting times; Adult Talking Therapies – Integrated Pathways. Quality Improvement. Demand / Capacity and Waiting Times; Community Transformation / Continued Improvement with Neighbourhoods offer – aligning existing provision; Neurodevelopmental Pathways Review (CYP); Crisis / T3.5 Pathways Review (Including ICCS, Surge and IST); Whole System Approach (iThrive) – CYP Emotional Health and Wellbeing Continue to enhance THRIVE working with Schools (WAMHS / MHSTs integration) / Youth Hubs (Super Youth Hub); SMI Pathway Improvement
Improving and optimising 117 Aftercare;

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

All our work is aimed at improving the health and wellbeing of our local residents and reducing inequalities

Start Well

- Reductions in crisis mental health presentations to ED for CYP and Improvements in mental health and wellbeing outcomes for specific communities
- An increase % of children achieving good level of development - Improved health and educational outcomes for those at risk of exclusion and those with complex needs, SEND and autism and LAC
- Increase immunisation coverage
- A reduction in infant mortality rate, and in the rate of neonatal mortality and stillbirths, including a reduction in inequalities in maternity and birth outcomes for children and families. Improvements in patient experience.

Live Well and Age Well

- Patients will feel safe and supported with any ongoing care needs following a hospital admission
- Patients will know about services are available and have increased confidence in them to meet their needs
- Patients feel supported to access the care they need
- Patients will have more care being provided outside hospital, closer to their home, where appropriate

Mental Health

- ***Improved experience, waiting times and overall quality of care*** - Neurodevelopmental assessment (CAMHS and Adults); Psychological therapies intervention (CAMHS and Adults); 117 Aftercare; Wellbeing in School and Youth Hubs; Crisis Care including Crisis prevention and wellbeing
- ***Better meeting the needs of residents who experience greater health inequalities*** - Protected characteristics – Equalities act; Social deprivation; Serious mental illness; Neurodevelopmental (ASD / ADHD / LD); Looked After Children / Care Leavers].

Key stakeholders:

- Residents / Carers
- Local Authorities and the CoL (ASC; PH; MH; LD&A)
- Voluntary& Community Sector;
- Homerton Hospital
- ELFT
- LBH / CoL – Adult Social Care
- LBH CoL – Children Social Care
- Hackney Education
- ELFT – CAMHS / Adults
- HUH CAMHS / Adults / Acute / Paediatrics
- C&H Public Health
- Primary Care / GP Confed
- VSO Partners / SIG

Engagement with the public:

- Healthwatch
- Programme / Project Service-user reps
- Engagement with the public
- Advocacy Project (MHIC)
- Alliance coproduction and Participation
- Maternity voices partnership
- SEND parent carer forum

Health Inequalities

Portfolio vision, mission and key drivers:
Health inequalities exist between NEL and the rest of the country – for example we have particularly high rates of children with excess weight and poor vaccination and screening uptake – but they also exist between our places and communities. These inequalities are avoidable and unfair and drive poorer outcomes for our population. We want to improve equity in access, experience and outcomes across NEL. To do this we have made reducing health inequalities a cross-cutting theme that is embedded within all of our programmes and services within places and across NEL – everyone has a role to play.

Key stakeholders:
Public health teams
Local authority departments
Voluntary and community sector
Primary care
NHS trusts
NHS E and TPHC
ICB

Key programmes of work that will deliver the vision and mission
- Dedicated health inequalities funding has been provided to each place-based partnership to lead locally determined programmes to reduce health inequalities within their local communities. These projects will be evaluated and the learning shared and showcased.
- Development of a NEL Health Equity Academy to support all people and organisations working in health and care in NEL to be equipped with the knowledge, skills and confidence to reduce health inequalities for the benefit of local people
- Implementation of a community pharmacy scheme to provide targeted pharmacist advice and free over the counter medicines for people on low incomes and experiencing social vulnerability across NEL, to support our communities in the context of cost of living pressures.
- Taking a Population Health Management (PHM) approach, led by places and neighbourhoods, will support frontline teams to identify high risk groups and identify unmet need. A PHM Roadmap has been developed for NEL and is being implemented.
- Embedding the NEL Anchor Charter, working with system partners to ensure we are measuring and creating the opportunities that being an anchor institution affords are leveraged for our local population, to address structural inequalities such as ensuring the NHS in NEL is a London Living Wage accredited employer, embedding social value in procurement process and better utilising our infrastructure to support community activation and supporting a greener, healthier future.
- Delivering our ICS Green Plan including developing an Air Quality Programme, ICS wide net zero training programme, and embedding net zero into our procurement processes to support our aim of reducing our collective carbon footprint by 80% by 2028 and to net zero by 2040.
- Improving access to primary care for health inclusion groups (homeless and refugee and asylum seekers) through safe surgery programme, supported discharge for homeless through the out of hospital care programme, supporting families in temp accommodation to access support out of borough, commissioning a NEL wide initial health assessment for those seeking sanctuary housed in contingency accommodation, and commissioning a needs assessment for health inclusion in NEL to identify needs for other underserved groups that require focus.

Details of engagement undertaken with Places, collaboratives and other ICB portfolios
- NEL Population Health and Inequalities Steering Group is made up of representatives from places and collaboratives, and leads from across the ICS.
- Significant engagement across the system on what is useful from a Health Equity Academy
- Engagement from across the system on Anchors, Net-zero and health inclusion around homelessness and refugee and asylum seeker programmes

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:
- Reduced differences in health care access, experience and outcomes between communities within NEL, particularly for people from ethnic minority communities, people with learning disabilities and autism, people who are homeless, people living in poverty, and for carers.
- Improved health life expectancy for all communities across NEL, irrespective of who you are or where you live.
- Our population receives more inclusive, culturally competent and trusted services, underpinned by robust equity data.

Engagement with the public:
Engagement on specific topics, and in depth at place level.

DRAFT

Prevention

Portfolio vision, mission and key drivers:
We want to increase our focus as a system on prevention of ill-health and earlier intervention. This means increasing our focus and resources 'upstream', to prevent illness in the first place.
Preventive health offers need to be appropriate for all in our diverse communities, and will only be effective if we also work to address the wider determinants of health.
In NEL we face significant challenges around preventable ill health, for example more than 40% children are overweight or obese and nearly all of our places have worse screening rates for breast, bowel and cervical cancer than England. This has an impact on health outcomes, demand for care and health inequalities, so these are key drivers for enhanced action.

Key stakeholders:
Public health teams
Local authority departments
Voluntary and community sector
Primary care
NHS trusts

Key programmes of work that will deliver the vision and mission
- Mobilising tobacco dependence treatment services across all of our trusts so that they are available in all inpatient, maternity and community services, and making these services sustainable for the long term.
- Alcohol care teams (ACTs) have been established at the Royal London Hospital and Homerton Hospital, and we will continue to make these services sustainable moving forwards and make the case to expand coverage to other hospitals in NEL.
- Population Health Management (PHM) is a key methodology that can be utilised as an approach using population health data as a means of targeting cohorts of our population that will benefit from focused approaches that include preventative interventions where appropriate. The NEL ICB has recently employed a dedicated PHM lead who will be able to support the building upon of current examples of PHM from across NEL.
- Delivering equitable vaccination programmes in NEL builds on our experience during the Covid-19 pandemic and will continue to deliver according to national programmes and local need. We will work as a system to work with and target communities with low vaccination rates
- Cancer prevention, awareness and screening is a focus of the work of the NEL Cancer Alliance, who are strongly involved with active awareness campaigns targeting our local NEL population. These campaigns cover different cancers and aim to raise awareness and prevent cancer and support early diagnosis. For example, prostate, lung, breast, cervical and endometrial cancer awareness campaigns have been developed targeting population cohorts.
- Anchor Institutes are evolving across our system with all of our NHS Trusts and Local Authority Chief Executives having signed up to the NEL Anchor Charter. These are a set of principles that support using our institutions and the organisations as assets to better support out local communities. These aim to help tackle and reduce the wider determinants of health supporting prevention of ill health alongside health inequalities.
- We will deliver Long Term Condition programme collaboratively (for example cardiovascular, stroke, respiratory and diabetic related diseases) ensuring they are aligned with the national and regional programmes that focuses on entire pathways from LTCs prevention to escalations of LTC management within acute care. The NEL LTCs teams are linking in with systemwide colleagues with several key activities focused on LTC prevention and early identification.

Details of engagement undertaken with Places, collaboratives and other ICB portfolios:
Key prevention engagement related to specific programmes are well documented by each of the organisations and programmes leading on each area of work.

Central NEL ICB oversight of all prevention related engagement across all programmes and services is a challenge and therefore an alternative approach is to ensure that the system (via Places, Collaboratives and workstreams) is able to identify, scale and spread those areas of Prevention engagement which has proven successful.

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:
- Increased smoking quits, leading to a wide range of improved health outcomes and lives saved, particularly in more deprived communities.
- ACTs support patients experiencing harm as a result of alcohol use disorders, and will lead to a reduction of alcohol-related conditions such as CVD, cancers and liver disease, as well as harm from accidents, violence and self-harm.
- There is a commitment over time to increase the proportion of our budget that is dedicated to prevention and earlier interventions, this would be done concurrently to shifting the system partners have a greater focus on prevention.
- Our anchor institutions will also begin to play more of a role in tackling poverty and promoting social and economic development.
- A maturing infrastructure including population health management awareness and digital population data availability will help impact the NEL system in supporting prevention by helping to identify those population cohorts that will greatly benefit from prevention and earlier intervention services and engagement.
- NEL ICB has developed a draft Immunisation Strategy with system partners to build on the legacy of the covid vaccination programme. This will be refined in line with the National Immunisation Strategy. The ambition is to build on the digital advancements for service delivery, develop the workforce to support access for local people and embed engagement with all communities to support uptake of vaccinations across the whole life course, thereby preventing ill health.

Engagement with the public:
Key public engagement is occurring within our workstreams that encompass a preventative element. For example as mentioned Cancer and Long term conditions

Alignment to the integrated care strategy:

DRAFT

Personalised Care

Portfolio vision, mission and key drivers:

Personalised care involves changes in the culture of how health and care is delivered. It means holistically focussing on what matters to people, considering their individual strengths and their individual needs. This approach is particularly important to the diverse and deprived populations of NEL, where health inequalities have been exacerbated by the pandemic and further compounded by the cost of living increase. Embedding personalised care approaches into clinical practice and care, which take into account the whole person and address all their needs holistically will ensure our most vulnerable communities are supported in the years ahead. We have built a strong foundation for personalised care over the last three years as a system, with an early focus on social prescribing and personal health budgets. Our vision is to lead and enable the delivery of the six components of personalised care and embed these in local population health approaches.

Key stakeholders:

Primary care
Place-based directors
Local authority
Public health teams
VCSFE
NHSE and TPHC
Acute teams e.g. social prescribing & discharge

Key programmes of work that will deliver the vision and mission

- Ensuring all social prescribing link workers can capture the NEL social prescribing minimum dataset via a digital template and analyse the data in a PowerBI dashboard
- Expanding the implementation of Joy platform across NEL to provide a directory of service platform in alignment with Fuller actions relating to same day access
- Developing personalised care workforce plans with primary care and training hubs to support the Fuller actions relating to integrated neighbourhood teams
- Support equity of offer and quality assurance of personal health budgets across NEL for the Right to Have cohorts
- Piloting new approaches to deliver personal health budgets for rough sleepers and discharge from hospital to support underserved groups and address winter planning pressures
- Developing a strategy to embed creative health in services across the system with specific focus on addressing health inequalities
- Promote supported self-management and digital enablement through Patients Know Best
- Standardise personalised care and support planning including increasing use of digital tools e.g. Patients Know Best and Universal Care Plan
- Invest in social prescribing 'community chests' to increase resources in the community and voluntary sector locally, targeted at addressing local inequalities and providing social value to our communities where it is needed most.

Details of engagement undertaken with Places, collaboratives and other ICB portfolios

- NEL Population Health and Inequalities Steering Group is made up of representatives from places and collaboratives, and leads from across the ICS
- Engagement with place at the CPPO SMG

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

- Local people are asked what matters to them in setting their treatment or care goals and can access a wide range of non-medical support in the community.
- Particularly vulnerable people and underserved groups are identified and given additional support to access services ensuring their experience and outcomes of care are equitable.

Engagement with the public:

- Engagement on specific topics, and in depth at place level

Learning System

Portfolio vision, mission and key drivers:

The transition to an Integrated Care System has provided an opportunity to work in a different way in how we deliver and approach change to services within north east London. In order to improve the care we provide our residents, it is crucial to embed the improvement process of learning from the current delivery. As such the ICB needs provide an environment that facilitates the ability to deliver a systematic approach to iterative data-driven improvement

To ensure an effective learning system, the organisational culture must support a strong learning approach. The three stage learning cycle (learning before, during and after) describes how staff can interact with the learning system to inform their work. Each stage is informed by the following principles:

- We are well-informed – before we act, we fully consider the impact of our decisions on individual, community and system outcomes and equity.
- We are responsive – we are effectively monitoring our interventions and taking action in a timely manner
- We reciprocate –we work together sharing knowledge openly and valuing collaboration over competition

Key stakeholders:
Quality and safety
Complaints
Strategy
Programme Management Office
Place-based directors

Key programmes of work that will deliver the vision and mission

Initial scoping still to be concluded and so no programme of work has been developed/

Details of engagement undertaken with Places, collaboratives and other ICB portfolios

First discussion meeting yet to take place and so as yet no engagement has taken place

Summary of the benefits/impact that north east London local people will experience by April 2025 and April 2027:

.

- Participation in evidence-informed decision making, promoting legitimacy
- Development of a localised evidence-base, helping us to make decisions most suitable to our context and populations
- Reduction in duplication, improving productivity and sustainability
- Proportionate approaches to transformation, improvement and innovation, not driven by whim or external pressures

Engagement with the public:

First discussion meeting yet to take place and so as yet no engagement has taken place with Places, collaboratives and other ICB protfolios

6. Implications and next steps

DRAFT

Lessons Learnt

Post the submission of the first NEL Joint Forward Plan 23/24 an 'after action review' was undertaken in order to reflect on the work undertaken by those stakeholders involved in developing the first Joint Forward Plan. The review included aspects such as recognising what went well and what lessons can be learnt. These outputs were considered when developing the JFP 24/25 refreshed document and will continue to be built upon going forward as the JFP will be refreshed annually.

What went well?	What can we learn for next time?
▪ Capturing what key stakeholders are doing in one place ▪ Engagement and developing the place contributions at place ▪ Good support from PMO team ▪ Worked well with local authorities ▪ Involvement from wider range of people across the system ▪ Summary slides are effective in the plan ▪ Collaborative working	• Ensuring that the early draft documents are shared with leads • Ensuring the right people are involved in writing narrative • Too many people involved in drafting JFP, need to narrow this down to only key people that should be involved • Ensuring clinicians are involved from primary care perspective • Need clearer delivery milestones • Clearer guidelines, more notice, understand purpose, value and benefits • Better planning and give enough notice to leads • More connected across finance/strategy/programme in developing the plan • Be clear on how this links with wider programmes/ collaboratives/ Places • Co-ordination of plans at NEL and local level • Need clearer understanding of governance and decision making, accountabilities around programme areas • Ability of contributors to raise queries and seek clarification as required

How will we know we have succeeded - NEL Outcomes Framework

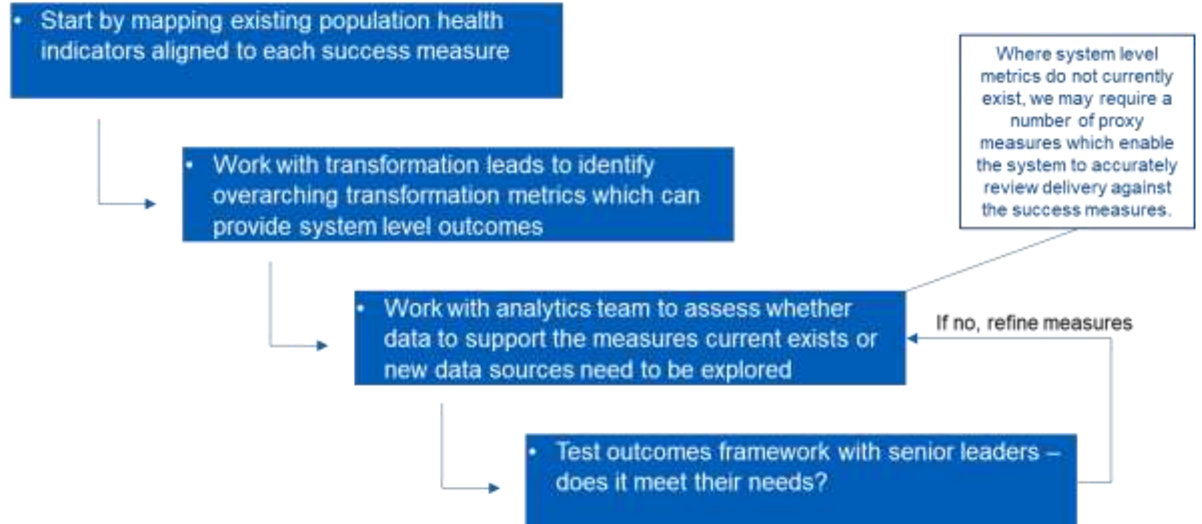
- The interim North East London Integrated Care Strategy was published and adopted by the Integrated Care Board in January 2023.
- The strategy highlights our four system priorities for improving quality and outcomes and address health inequalities as well as our six crosscutting themes which are part of the new approach for working together across NEL.
- The strategy was developed in conjunction with system partners, along with a set of 61 success measures, which aimed to measure delivery against the priorities and crosscutting themes.
- This slide deck outlines the steps we are proposing to develop an outcomes framework.

What do we mean by an outcomes framework?

- An outcomes framework is a way for us to measure the effectiveness of our ICS strategy by focusing on the outcomes that are achieved, rather than just the activities that are carried out. That way we can assess whether our strategy is making a positive difference in people's lives.

In order to support the development of the outcomes framework, the below principles have been drafted to shape the design and implementation:

- **Assess delivery against ICS strategic themes and objectives**
- **Demonstrate current delivery on priority areas**
- **Develop outcome measures in conjunction with transformation leads, provider collaboratives, and ICS partner organizations**
- **Avoid developing an outcomes framework in the model of a performance framework**
- **Importance of recognising that outcomes are often long-term goals**
- **Assess wider population health measures rather than focus on statutory or mandated targets**
- **Make the system responsible for delivering metrics**



DRAFT

Next steps for our transformation programmes

- As the early analysis shows, all programmes within the portfolio can demonstrate alignment with elements of the integrated care strategy and operating plan requirements. The extent to which the portfolio responds to the more specific challenges described in the first half of this plan is more variable.
- Our shared task now is to prioritise (and therefore deprioritise) work within the current portfolio according to alignment with the integrated care strategy, operating plan requirements, and additional specific local challenges.
- This task is especially urgent in light of the highly constrained financial environment that the system faces, along with the upcoming significant reduction in the workforce within NHS North East London available to deliver transformation.
- The work required to achieve this is two-fold – part technical and part engagement – and will be carried out in parallel, with the technical work providing a progressively richer basis for engagement across all system partners and with local people.

Technical work

Tightening descriptions of the current programmes of work as the basis to inform prioritisation, especially:

- the **quantifiable beneficial impact** on local people, beyond the broad increases or decreases in certain measures currently signalled;
- the definition of **firm milestones** on the way to delivering these benefits;
- the **financial investment** in each programme and the anticipated returns on this investment; and
- quantifying the **staff resource** going into all programmes, and from all system partners.

Engagement

There is an important cross-system conversation needed, that enables us to create a portfolio calibrated to the competing pressures on it. Principle pressures to explore through engagement include:

- achieving early results that relieve current system pressures *and* creating the resources to focus on achieving longevity of impact from transformation around prevention;
- implementing transformation with a wide range of benefits across access, experience, and outcomes *and* ensuring, in the current financial climate, that we achieve the necessary short-term financial benefits;
- focussing on north east London's own local priorities *and* being open to additional regional or national opportunities, especially where new funding is attached;
- focussing on fewer large-impact transformation programmes *and* achieving a breadth that reflects the diversity of need and plurality of ambition across north east London; and
- ensuring that benefits are realised from transformation work already in train *and* pivoting to implementing programmes explicitly in line with current priorities.

DRAFT

We will continue to evolve as a system

Our system has been changing rapidly over recent years, including the inception of provider collaboratives, the launch of seven place based partnerships, the merger of seven CCGs followed by the creation of the statutory integrated care board and integrated care partnership in July 2022.

Since becoming an ICS we have designed our way of working around teams operating:

- At **Place** delivering services and improvement for Neighbourhoods and Place;
- In **Collaboratives** reducing unwarranted variation, driving efficiency and building greater equity;
- For **NEL** sharing best practice, implementing NEL solutions for NEL work, providing programmatic support and oversight, and delivering enabling functions to our organisation and ICS through a business partner model.

Coordination between our Places, Collaboratives and NEL wide programmes is critical so that we:

- Operate as a learning system and spread best practice
- Ensure that activity, transformation and engagement happens at the most appropriate level, duplication is reduced and tensions are identified and resolved
- Identify where there is NEL work which should be done once for NEL
- Deliver value for money
- Deliver beneficial and sustained impact for the health and wellbeing of local people.

We are now looking to work with our partners to further develop how we work together, underpinned by our ambition to create a **High Trust Environment** that supports integration and collaboration and to operate as a **Learning System** driven by research and innovation.

Designing together *how* we want to work will be as critical as agreeing *what* we want to deliver.

This will help us get greater clarity on the responsibilities of different parts of the system, and critically how we want each part of the system to interact with another to enable integration and continuous improvement.

DRAFT

North East London

System planning update

ICP Committee 10 January 2024

Introduction

This paper provides an update on the system planning process, focusing on two elements:

1. the proposed changes we are making to the Joint Forward Plan for 2024/25 and
2. to get your view on the prioritisation criteria and process we propose for new investments.

North East London

Joint Forward Plan 24/25 Refresh Update

10th January 2024

DRAFT

Introduction and considerations for the ICP Committee:

- NEL ICB was formed on 1 July 2022 following the Health and Care Act 2022, and we published our interim Integrated Care Strategy in January 2023. This was followed by the Joint Forward Plan 2023/24, our first five-year plan.
- We are required to refresh the Joint Forward Plan (JFP) yearly, to reflect what we set out to deliver in the coming years.
- We heard from our partners last year that they would like us to engage with them earlier in the process. These slides outlines how we have structured our system planning process for 24/25 and where the JFP fits in, the steps we are taking to refresh the JFP for 24/25 as well as the main changes from the previous year.
- Our Places-based Partnerships have been developing their plans for 2024/25, of which an overview is included in the JFP 24/25.
- We have included an unedited first DRAFT of the JFP 24/25 as an appendix, to indicate the direction of travel. A further draft will be available by end of January 2024, with a final draft by end of February. The ICB Board will be asked to approve the JFP 24/25 in March 2024.

Considerations for the ICP committee membership:

Within the context of our interim integrated care strategy, ICP Committee members are asked to

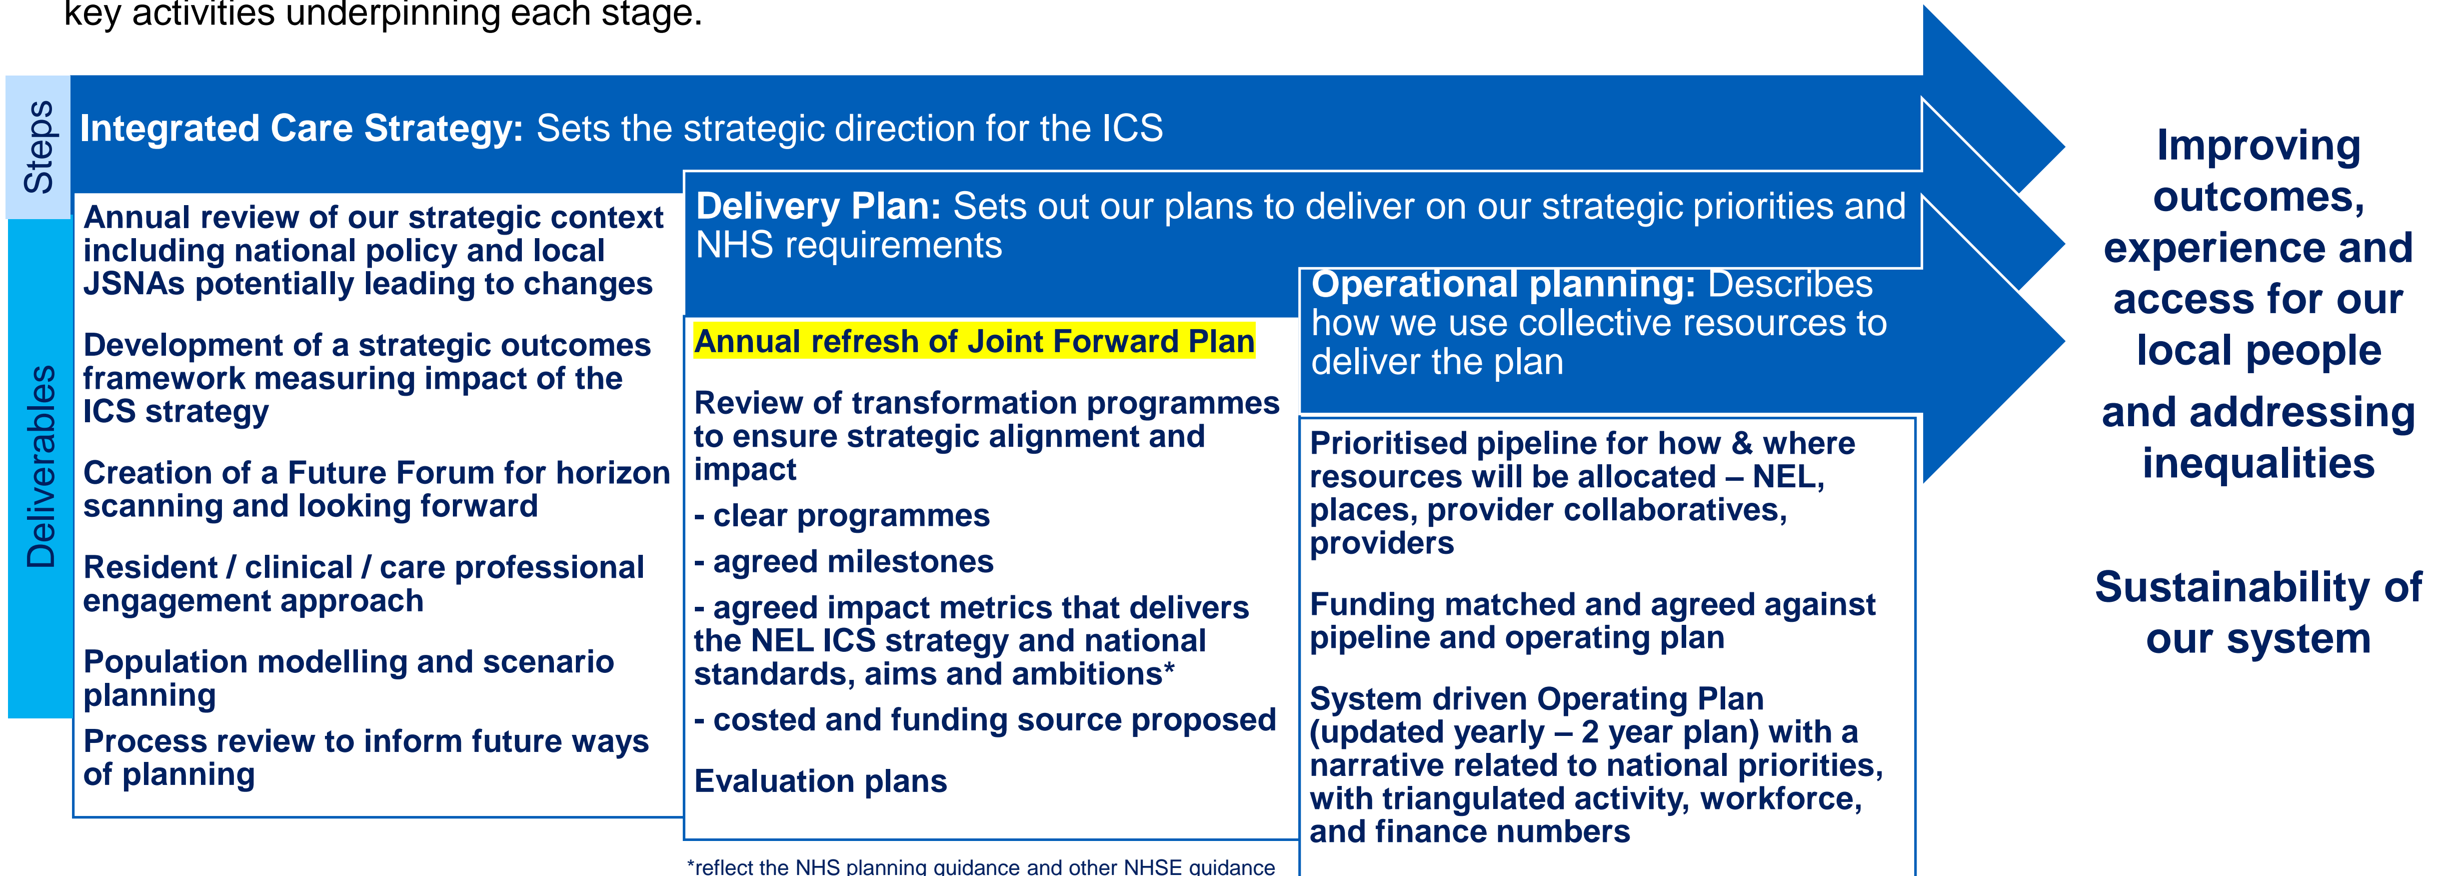
1) note why the JFP refresh is being undertaken and the approach being followed in order to deliver a refreshed NEL 24/25 JFP by March 2024
2) note the amended content proposed
3) review and comment on the first JFP 24/25 draft document (Appendix 1- Draft JFP 24/25)

Overview of system planning approach

The NEL system planning cycle has been divided into three steps:

1. integrated care strategy
2. delivery plan
3. operational planning

These are outlined below with related deliverables included below each step. These are not comprehensive but indicate some of the key activities underpinning each stage.



Joint Forward Plan (JFP) Refresh for 24/ 25 - next steps

- Based on feedback and lessons learnt from this year's JFP development, we are now engaging with NEL System stakeholders earlier within the system planning cycle in order to ensure improved awareness and input to the 24/25 JFP.
- There will be annual refreshes of the JFP going forward in order to ensure that the document remains current. This JFP refresh continues to describe the challenges that we face as a system in meeting the health and care needs of our local people, but also the assets we hold within our partnership.

High-level timeline

24 November 2023
We asked all slide contributors to submit their initial draft plans for 2024/25 for the JFP, providing a summary list of projects, and resourcing requirements.

13 December 2023
A portfolio workshop will be held with leads from the system portfolios, Places, cross-cutting themes and enablers. We aim to develop greater cohesion between portfolios, identify any synergies or duplication we need to address, but also to allow everyone share feedback on each other's plans.

9 January 2024
We will ask for updated slides based on the feedback from the December workshop.

February 2024
By 23rd February, all JFP contributors will need to submit their final plans/ JFP slide input, ready for sign off via appropriate meetings prior to submission by end of March 2024.

Main changes from the previous JFP

As we published our first JFP on 30 June 2023, we propose to keep the 2023/24 structure of the JFP, with some minor adjustments, as outlined below. Where references are made to figures, these will be updated to reflect the latest position.

Main additions:

- New slides to ensure we cover:
    - all our strategic system improvement portfolios in addition to our four strategic system priorities
    - our Place plans
    - our six cross-cutting themes and
    - our enables
- We have also included new slides outlining:
    - what is important to our residents and how it impacts our plans
    - our successes to date
    - how we are developing a strategic outcomes framework to help us assess if we are having an impact

North East London

System planning prioritisation: criteria and process

Content

- Introduction and recommendations
- Principles for our system prioritisation approach
- Schemes requiring revenue resources
- What is informing our prioritisation criteria
- Proposed priorities for 24/25
- Areas to be considered for prioritisation
- Prioritisation process – timeline
- Overall system planning timeline
- Appendix: What does Core20PLUS5 mean for NEL?

Introduction and recommendations

- On 4 October we presented the 2024/25 System Planning Cycle to the ICP Committee which is now in progress (see slide 5 for a summary slide)
- In our initial financial planning assumptions we identified c£20m that could be made available for investment in commissioned services, funded by holding back any non-inflationary growth applied in the national formula
- In addition there are currently schemes (total value c£170m) which are 'live' across our system but which do not have an identified, recurrent source of funding
- As part of our System Planning Cycle we have developed a prioritisation process and draft criteria for 2024/25 investment funding
- We ask the ICP committee to:
    - Review and help to shape the draft prioritisation criteria outlined on page 15

Principles for our system prioritisation process

We propose that as a system we use the following principles to underpin our approach to prioritisation;

- Collaboration across providers to mitigate and minimise the uncertainty created by our current operating environment
- Transparency of any data and insight used to inform prioritisation decisions
- Clarity and transparency of any criteria used in prioritisation decisions
- Transparency of the resource considered ‘in scope’ for any prioritisation decisions
- Inclusivity and transparency of who is involved in prioritisation decisions
- Each part of our ICS (Place Based Partnerships, Provider Collaboratives, Providers, the ICB) has a role in shaping our prioritisation decisions
- All decision makers will adopt a system mindset, seeking to do the right thing for NEL residents rather than acting in the interests of particular team or organisation

Schemes requiring revenue resources

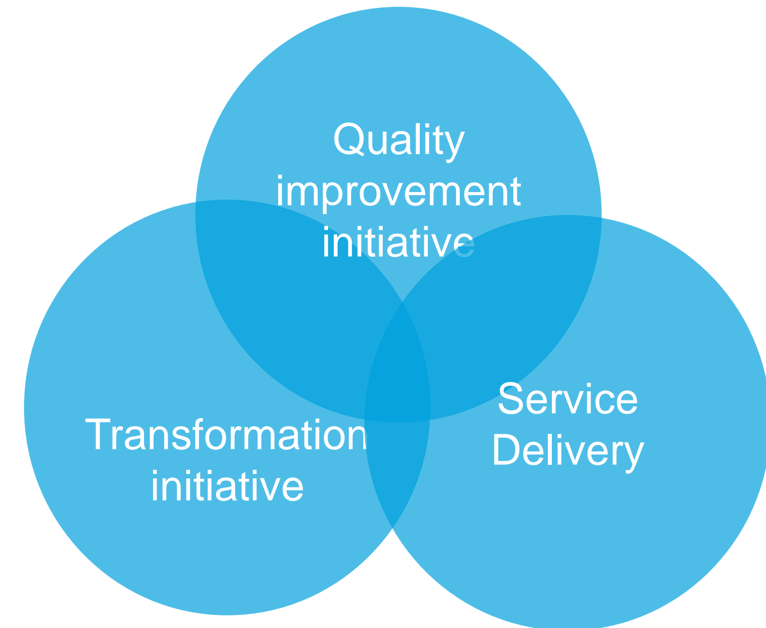
This prioritisation approach brings together three areas that all require a level of revenue resourcing, depicted in the venn diagram to the right:

- Quality improvement initiatives: projects or programmes where staff resources (from a change team) are deployed to lead continuous improvement

- Transformation initiatives: schemes which may require both staff resources (from a change team) and other funding to implement a step change in service provision or develop new capabilities that previously did not exist within our system

- Service delivery: funding for front line service provision, on a recurrent or non-recurrent basis

The proposed criteria outlined in this slide deck will cover all three types of schemes.



Areas to be considered for prioritisation

To manage expectations and to limit abortive work, we propose a limited set of projects/services that will be considered for any new investment decision;

1. Revenue funding to sustainably deliver a service which has received short-term funding in prior years (for example the Long COVID service)

2. Revenue funding to sustainably implement an innovation tested through a pilot project (for example Cancer Alliance pilots where funding will cease in 24/25)

3. Revenue funding for new services which has previously been approved by NEL but is not in the 2023/24 run-rate (for example St Georges). A list of existing known schemes will be shared.

4. One off funding to deliver specific benefit (for example clearing waiting list backlogs or capital project)

5. Revenue funding to level up service provision across NEL

Schemes that are funded by the health inequalities allocation agreed by the Population Health and Integration Committee is exempt from this process for 2024/25.

What is informing our prioritisation criteria

To help guide our thinking we will use the ICS strategy, as well as the key operational challenges outlined in our Joint Forward Plan.

As a system we have jointly developed an integrated care strategy that sets out our four system priorities:

- Babies, children & young people
- Long term conditions
- Mental health
- Local employment and workforce

In our joint forward plan we identified two key system-wide operational challenges:

- substantial pressures on same day urgent care
- a large backlog of people waiting for planned care

In addition, there are other factors we need to consider as part of our prioritisation process;

- unprecedented population growth and changing / increasing need of our residents
- significant and growing backlog of residents waiting for care
- patient safety concerns
- requirements to recover our current financial position to break even and thereafter operate within a financial envelope as an NHS system

NEL health needs analysis

Backlog clearance

NEL risk assessment

Financial envelope

Proposed priorities for 2024/25

Overall we spend c£4bn on NHS services and the prioritisation criteria will only apply to non-inflationary growth money held back from providers (c£20m) and any 'live' schemes without an identified recurrent revenue source (c£170m). Whilst we want to develop robust and appropriate prioritisation criteria, we need to be proportionate in the effort we invest in refining them.

In the context of our current financial deficit we need to agree where, as a system, to invest in 2024/25 and where we want to defer investment to future years. This will enable us to adopt a phased approach to implementing our ICP strategy within our allocated financial envelope.

Based on analysis of our major pressures as a system, the following three priority areas are proposed for 2024/25:

- Any work that supports crisis management/urgent care pathways
- Any work that reduces waiting lists
- Any work that contributes to an improved financial position

Based on our stated ambition in our ICP strategy and system financial strategy, the following three tests are proposed for 2024/25:

- Schemes should not exacerbate health inequalities, with a focus on the Core20PLUS5
- Investments should prioritise community based care
- To level up historic investment, ONEL PbPs should be prioritised for new investment

Prioritisation matrix – 2024/25	Schemes should not exacerbate health inequalities	Investments should prioritise community based care	ONEL PbPs should be prioritised for new investment
Any work that supports crisis management/urgent care pathways			
Any work that reduces waiting lists			
Any work that contributes to an improved financial position			

Prioritisation process – timeline

- The NEL Integrated Care Partnership will help shape the 2024/25 priorities and focus for our system at their meeting on **10 January 2024**
- Each Place, Provider Collaborative, Provider and system improvement portfolio team will collate and rank all requests from their teams, submitting these to the NEL PMO team by **22 January 2024.** NEL PMO available to support the teams with any questions
- The ICB PMO team will collate the ranked requests submitted by each Place, Provider Collaborative* and NEL programme teams **w/c 22 January 2024**
- A one-off internal prioritisation group consistent of representatives from Strategy, Finance, PMO, PHM and Insight to review the top 5-10 ranked schemes from each area against the prioritisation criteria by **31 January 2024**
- The full request pack, including internal analysis, to be shared with the System Strategy Group, including CAG members, by **1 February 2024**. This will allow the group sufficient time to review the pack
- The NEL System Strategy group, with members from the Clinical Advisory Group invited, to review the requests and the internal analysis and make recommendations to the ICS Executive Committee in a **PM session on 8th February 2024**, with an additional meeting on **22 February 2024** to resolve any remaining queries. It is proposed that these meetings will be externally facilitated
- ICS executive Committee meet to review the recommendations from the System Strategy Group in February
- A final decision on schemes to be funded in 2024/25 will be made by **1 March 2024** and communicated to all teams
- This will inform the final operating plan and contracts for 2024/25 as required

Proposed role of Place team, Provider Collaboratives* and system portfolio teams	Role of the NEL System Strategy Group, with members from the Clinical Advisory Group invited
• Coordinate a call for proposed schemes • Undertake a process to rank their schemes • Submit a ranked list of all schemes to the ICB PMO	• Note the full list of proposed schemes • Consider the top-ranked schemes by each Place team, Provider Collaborative* and system portfolio team • Recommend to the ICB Executive Committee which schemes should be funded in 2024/25

*We recognise the maturity of our Provider Collaboratives varies. Where Provider Collaboratives do not wish to lead this process in 2024/25 individual Providers may submit separately ranked requests for investment.

Overall system planning timeline

Joint Forward Plan

- First refresh draft based on portfolio submission on **24 November 2023**
- Second refresh draft based on refined portfolio submission on **9 January 2024**
- Final refresh draft based on final portfolio submission **23 February 2024**
- Engagement with PbP boards, HWB boards, Collaborative boards and other stakeholders such as CAG throughout
- Final sign off ICB Board end of **March 2024**
- Publication **31 March 2024**

Strategic portfolios

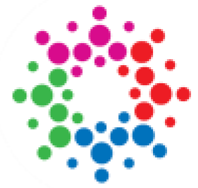
- Initial draft submitted of its 2024/25 plans by **24 November 2023**
- A system workshop on **13 December 2023** to review and comment on the proposed plans
- Revised portfolio plans to be submitted by **9 January 2024**
- The NEL System Strategy group to review the plans and make recommendations to the ICB Executive Management Team on the allocation of ICB employed staff on **25 January 2024**
- The portfolio to be informed of the proposed staff allocation and submit their final plans by **23 February 2024** for approval by the ICS Executive Committee

New investments

- The NEL ICP tol help shape the 2024/25 priorities and focus for our system on **10 January 2024**
- Each team to collate and rank all requests from their teams, to submit by **22 January 2024**
- The ICB PMO team will collate the ranked requests
- The NEL System Strategy group, with members from the Clinical Advisory Group invited, to review the requests and make recommendations to the ICS Executive Committee
- A final decision on schemes to be funded in 2024/25 will be made by **1 March 2024** to provide certainty to all teams

Operational plan

- Provider indicative activity plans **w/c 18 December 2023**
- Publication of priorities and operational guidance **23 December 2023**
- Technical planning guidance and non-functional template issues **w/c 9 January 2024**
- Internal NEL deadline **23 February 2024**
- DRAFT submission **w/c 26 February 2024**
- Contracts signed **17 March 2024**
- Internal NEL deadline **22 March 2024**
- Final submission deadline **31 March 2024**



Appendix

What does Core20PLUS5 mean for NEL?

What does Core20PLUS5 mean for NEL?

The Core20PLUS5 agenda will guide our prioritisation approach by:

- We will assess the most deprived 20% of our population across NEL, rather than on a place-by-place basis
- We have identified the following population groups as experience poorer-than-average health access, experience and/or outcomes (PLUS):

Homelessness	Refugees & asylum seekers	People with learning disabilities and autism

- The final 5 are mandated by NHSE and include:
  - Maternity: Ensuring continuity of care for women from Black, Asian and minority ethnic communities and from the most deprived groups.
  - Severe mental illness: Ensure annual physical health checks for people with SMI to at least nationally set targets.
  - Chronic respiratory disease: Drive up uptake of COVID, flu and pneumonia vaccines to reduce infective exacerbations and emergency hospital admissions due to those exacerbations.
  - Early cancer diagnosis: 75% of cases diagnosed at stage 1 or 2 by 2028
  - Hypertension case-finding and optimal management and lipid optimal management
