

## **Safeguarding Children and Young People Declaration 2023/24**

North East London Integrated Care Board (ICB) are working together with local authorities and providers, to commission services that develop an aligned approach within the Integrated Care System (ICS) to ensure long-term sustainability. The local authorities include City and Hackney, Newham, Tower Hamlets, Waltham Forest, Barking and Dagenham, Havering and Redbridge

NEL ICB will continue to listen and engage with the local community and continue to determine how some of the local NHS services are commissioned. However, where it makes sense, and is in the best interest of patients, the ICB is joining up with local authority to work together.

NEL ICB will remain legally accountable for the delivery of their responsibilities and the new arrangements do not change that. The safety and welfare of babies, children and young people are paramount to NEL ICB.

### **How do we keep babies, children and young people safe across our services?**

The ICB Chief Executive Officer and Chief Nurse Officer have overall responsibility for ensuring that we have the right things in place to safeguard babies, children and young people in line with national and local guidance.

Expert support and advice about keeping babies, children and young people safe and well is provided by: Senior Nurses and Doctors (Designated Professionals) and Named GPs/Nurse consultant.

### **We make this happen by having:**

- Safe recruitment processes and systems when employing staff who plan and deliver care.
- Ensuring that staff have access to training and supervision that helps them to recognise and report safeguarding concerns.
- Safeguarding policies and procedures to support staff to recognise and report safeguarding concerns.
- Ensuring our commissioners and organisations that deliver healthcare services ask service users for the views about their health needs and experiences.
- Safeguarding is included in all the services we commission.
- Regular meetings with organisations that deliver healthcare services for babies, children and young people, to ensure they have systems in place for safeguarding babies, children and young people.
- Joint information sharing arrangements consistent with legal requirements, both national and local to ensure babies, children and young people get the right help at the right time.
- Good partnerships arrangements in place with Local Authority, Police and other organisations involved in keeping children and young people safe.
