We are excited to have you join us for this significant launch and to collaborate on enhancing patient centred cancer care in North East London

About the Community of Practice

Beginning on April 1st, 2024, the North East London Cancer Alliance has initiated its Patient Partners Community of Practice. Our goal is to transform how we engage with and involve our diverse communities across North East London, ensuring representation at all levels of cancer care.

Our vision includes:

- Initiating Projects: Drive projects with direct patient involvement.
- Identifying Gaps: Recognise and address gaps in patient involvement.
- Improving Experience: Enhance the overall patient experience.

This event on Thursday 5th September 2024 will bring together North East London's diverse group of cancer patients, carers, healthcare professionals, community members and charity partners. Through the spirit of collaboration, we believe that we can develop smart solutions to some of the preventable issues that our patients face. The community of practice is a great opportunity to showcase and celebrate the fantastic support for patient's carers in and around our communities.
