Vaccinations – is your child up to date?

Getting our children vaccinated is the most important thing we can do to protect them against serious diseases. Check your child's health record (red book) or contact your GP to make sure they are up to date.

Age	Vaccines	To protect your child against
Babies aged 8 weeks to 18 months old	6-in-1 vaccine (4 doses)	Diphtheria, hepatitis B, polio, Haemophilus influenzae type b (Hib), tetanus, whooping cough
